JAMES HECTOR.

No. 6.

MEMORANDUM of Reports, Maps, &c., relating to the Geological Survey of Otago, furnished by
Dr. HECTOR.

27th August, 1862.—Relative to the distribution of Gold in the Province.—(Published.)

25th September, 1862.—Progress Report.—(Published.)

25th April, 1863.—Report of first Expedition to West Coast.—(Published in newspapers.)

8th June, 1863.—Progress of West Coast Expedition.—(Published.)

5th November, 1863.—Report of second West Coast Expedition.—(Published.)

13th April, 1864.—Progress Report, with full details respecting the minerals, coals, fossils, plants, &c., which had been discovered up to date.—(Published.)

21st October, 1864.—Progress Report.—(Published.)

Various official letters published in newspapers.

January, 1865.—Descriptive Catalogue of Geological and other Collections in the Exhibition.

5th February, 1866.—Various Papers in the Jurors' Reports, and Supplement to Class I., which gives a minute account of mineral and other natural productions of the Colony then known, and especially of those in Otago.

Maps, &c. (Unpublished.)

April, 1865.—Geological Map of the Province of Otago—scale 8 miles to inch—showing results of reconnoissance survey up to date, and giving also a large amount of original topographical details. (This map was specially compiled for the Geological Survey, as at that time no complete topographical map of the Province was in existence.)

Map of the North-west District of the Province, showing the surface configuration, with special relation to the opening of communication with the land fitted for settlement on the West Coast.

Ten Geological Sections illustrating the structure of the Province.

Seventeen large Sketches and Views illustrative of the geological features of Otago scenery.

J. HECTOR.
