1888. NEW ZEALAND.

NEW ZEALAND POLICE FORCE

(ANNUAL REPORT ON THE).

Presented to both Houses of the General Assembly by Command of His Excellency.

The Commissioner of Police to the Hon. the Defence Minister.

Commissioner's Office, Wellington, 3rd May, 1888. Sir,-

I have the honour to submit for your information a report on the Police Force, with statis-

tics, for year ending the 31st March, 1888.

On that date the police shows a strength of 487, as against 502 in 1887 and 494 in 1886, not including 21 Native constables at small salaries and 13 district constables at rates varying from £10 to £100 per annum, being an increase of five in this branch of the service. These men are stationed at Taupo, Hokianga, Nelson, and in Wellington (2), and are for the most part transfers from the Permanent Militia.

A new district has been formed at the Bay of Islands, under Inspector McGovern. This step was rendered necessary by the large amount of sly grog-selling in that district, and the belief, more or less well founded, that smuggling has been carried on to a large extent. The result has been

most satisfactory, as will be shown when dealing with the offences for the year.

The retirement of four Inspectors in consequence of retrenchment in the Government service has enabled me to effect the amalgamation of several districts, as follows: Kawhia, Waikato, and Tauranga have been placed under Inspector Goodall, Inspector Kiely being transferred to Napier, vice Inspector Bullen. The County of Thames has been detached from Tauranga District and added to Auckland under Inspector Broham, vice Inspector Shearman, who retires. Wanganui and Taranaki have been joined and placed under Inspector Pardy, Inspector James retiring. Lawrence has been added to Dunedin, and Timaru joined to Oamaru, under Inspector Thompson. Inspector Moore, from Lawrence, has taken charge of Southland, Inspector Buckley retiring.

Four new police-stations have been opened during the past year, viz., Waipu, Taupo, Hunter-ville, and Ashurst. The latter station, however, is merely temporary, and depends on the continuous of the Corre relivery works.

ance of the Gorge railway-works.

It has been deemed necessary to increase the strength of the police at each of the following stations: Auckland, 2; Russell, 2; Te Awamutu, 1; Wellington, 3; and it will further be necessary to form a small reserve of trained men, to be stationed in Wellington and used as necessity may dictate. Reductions have, on the other hand, been made in the strength of police at Opotiki (1) The state of the strength of police at each of the following stations: Auckland, 2; Russell, 2; Te Awamutu, 1; Wellington, 3; and it will further be necessary to form a small reserve of trained men, to be stationed in Wellington and used as necessity may dictate. Reductions have, on the other hand, been made in the strength of police at each of the following stations: (1), Hamilton West (3), Wanganui (2), Manaia (1), Greymouth (1), Brunnerton (1), Kaiapoi (1), Lawrence (1), Queenstown (1), Masterton (1), and at Kawhia 2.

The stations below mentioned have been closed, either as being no longer required, or as being a source of expense to the country without adequate benefit in return: Alexandra North, Paika-

kariki, Macrae's, Waimea, Rimu, Boatman's, Portobello, and Ravensbourne.

During the past year the casualties in the Police Force have been 28, as against 33 and 24 in the two previous years, viz., by superannuation, 3; retirements on reduction, 4 Inspectors; resignations, 13; discharges, 3; dismissals, 3; deaths, 2.

The criminal statistics for the year ending the 31st December, 1887, show a very satisfactory diminution in the more serious offences (schedule attached), such as murder, attempted murder, arson, manslaughter, forgery, and horse- and cattle-stealing, and fewer cases of larceny have occurred. The year has, however, been specially noticeable for a marked decrease in the offence of drunkenness, the number of cases being 842 less than in the previous year. Much the same may be said of wife-desertion, which, at one time, bade fair to become a common offence. The decrease in this criminal item is, I think, fairly attributable to the prompt measures taken for the arrest and enforced return of men who had fled to the adjoining colonies during the same period.

The actual decrease in crime throughout the colony has been 393 cases as compared with last year, viz., a decrease of 747 cases in the South Island, and an increase of 364 in the North Island. So far the balance is in favour of the former, but in that Island there has been an increase in many of the serious offences, while in the North they have decreased, notwithstanding that the minor

offences have increased.

H.—6.

Since Inspector McGovern assumed charge of the Bay of Islands District there have been 24 convictions for sly grog-selling within its boundaries, in which fines and costs to the amount of £412 have been inflicted. I attribute the suppression of this fertile source of crime almost entirely to the efforts of the Inspector, who has infused new life into men who, for some years, had practically been their own masters, without the supervision of either officers or sergeants. Small wonder that these men, who were beyond the influence of either admonition or encouragement, should have grown supine. The Inspector at Auckland has been in no way to blame for this state of things: he had

simply too many duties to perform, and attended to the most important.

I have stated that there is a decrease in the crime of arson. This, however, requires explanation, for the police have every reason to believe that numerous instances of this crime remain undetected and unpunished, not from want of suspicion or vigilance, but from the want of sufficient evidence to justify a criminal information. The only solution of the difficulty would appear to be condensed in the recommendation of a London jury in a late case, viz., "That provision should be made by law for an official inquiry into the origin and circumstances of all fires. That such inquiry would tend to diminish the frequency of fires by making felony more easy of detection, and by bringing public censure, if not punishment, on persons responsible for fires arising from carelessness or want of precaution. That the information and statistics which would result from searching-fire inquiries would expose faulty and inferior work, and thus lead to improvements in building construction."

There is a general impression among the public that the insurance companies are primarily responsible for many of the suspicious fires, but, without committing myself to so strong an opinion as the above, I may, nevertheless, say that so long as house-owners are allowed to over-insure, so

long will there be suspicious fires, and the police powerless to stop them.

Among the many duties performed by the police outside of their own special functions as guardians of the peace the following may be enumerated: Agents of Public Trustee, Bailiffs, Clerks of Resident Magistrates' Courts and Licensing Committees, Collectors of Agricultural Statistics, compilers of jury-lists, Inspectors of Weights and Measures, Slaughterhouses, Distilleries, and Factories, Licensing Officers under Arms Act, Mining Registrars, Magazine-keepers, Officers under Beer Duty Act, Police Gaolers, Postmasters and Telephonists, Receivers of Gold Revenue, Supervisors of the Estates of Lunatics and Intestates, and Truant Officers under School Boards. Numerous as these duties are, I cannot say that they have, as yet, interfered materially with police-work proper. I must, however, make an exception to this statement in the instance of Inspectors of Weights and Measures. Here we have at least four men whose services are entirely taken up in these duties, and consequently lost to the police, and there are others whose time theoretically is only partially occupied, but who practically are of very little use to their department, for the reason that in a town the duties are so divided that if a man cannot be depended on to take his regular turn of beatduty he becomes an extra man, and, as such, of comparatively little use. In Auckland there is a first-class sergeant employed in the above capacity at a cost of £191 per annum, and there can be no doubt that the work would be equally well done by a civilian at £100, there being nothing in the work that a very ordinary man might not do. Much the same prevails at each of the chief centres of population, where the Police Department is paying men to do work which I respectfully submit should not devolve on the force except in out-districts.

I would also bring before your notice that some Inspectors complain that Resident Magistrates require the police to attend the civil sittings of their Courts. This practice is inconvenient, and takes men away from their duties on the streets unnecessarily, for by sections 13 and 14 of "The Resident Magistrates Act, 1867," it is provided that bailiffs shall attend sittings of Courts, and shall have the powers of constables. It would, therefore, appear that there is no actual necessity

for the presence of the police on these occasions.

In the first part of my report I have mentioned that there are thirteen district constables employed, being an increase of five on the previous year. These men are paid at rates ranging from £20 to £100, but the general average of their pay does not exceed £60 per annum. This class of constable meets the requirements of small or isolated districts, where there is not sufficient work for one of the regular staff (whose whole time should be fully occupied), but where it is absolutely necessary to have a representative of the force. There have been grave objections hitherto to this class of constable, viz., that they never acquired sufficient knowledge of their duties or of the law of the land to make them efficient guardians of the police; and, secondly, that, being taken from the settlers of a district among whom they have resided for many years, they would have acquired all the prejudices and animosities incidental to such a life—a state of feeling highly prejudicial to their usefulness as police constables, and one not calculated to engender confidence in the settlers' minds. Such have been, and no doubt will continue to be, the objections felt and expressed towards district constables. But, on the other hand, it is absolutely necessary to have such officers, for I estimate that there are at least twenty sub-districts now in charge of members of the regular force which could be more economically and as satisfactorily worked by district constables. Such being the case, I would suggest for your consideration the advisability of effecting this alteration whenever it is found convenient to do so, viz., by filling up the district constable-ships from superannuated members of the regular force, men who, though unable to perform the eight hours' hard duty in the streets of a town, or to make long journeys on horseback through rough country, would nevertheless be quite equal to the duties of district constables, and, from previous training, would nevertheless be quite equal to the duties of Resident Magistrates' Court

During the past year a modification of the Victorian regulations as to the attendance of police at sports, races, or other public amusements wherein an entrance-fee is demanded has been adopted. This step was rendered necessary by the large sums of money paid under this head, in

some districts, as travelling allowance. It is now provided by general order that the manager of such sports, races, &c., shall requisition for the number of police required on each occasion, and shall at the same time guarantee the payment of the expenses of transit, meals, &c., of the men so employed. These expenses have heretofore been a charge upon this department, and have, in the aggregate, amounted to a large sum, especially in districts where communication could only be

had by means of coach or horseback, and where, in consequence, small race-meetings are numerous. It having been considered advisable to cancel section 10 of the Police Regulations, whereby it was provided that officers should retire at the age of sixty-five and men at the age of sixty, it will, in the interests of the public, be necessary to name some age at which both officers and men must retire from the service. I would suggest that both officers and men should do so at the age of sixty-five, at which period of their lives they would not be likely to be of much value to the public service. I regret that I have been unable to decide on any system by which it would be possible to provide a general pension scheme for the force, unless assisted by a yearly grant-in-aid from the Government. As pointed out in last year's report, it might be made compulsory on those under the age of thirty years to insure for not less than £50 per annum; but this would not touch the majority of the men now in the force.

I would also draw your attention to section 59 of the same regulations, by which it is compulsory that all recruits for the police force should be drawn from the Permanent Militia of the colony. This rule limits the choice for police in a manner that cannot fail to be detrimental to the service now that the Militia are reduced in number. I would, therefore, suggest for your consideration that the rule should be altered to this extent: that, while the Militia should have the first chance, yet, in the event of their being no suitable man available from that corps, I should be at liberty to

take on men from outside.

For some years the police have been under certain vexatious restrictions in the matter of conducting prosecutions in Resident Magistrates' Courts. In 1876, in the case of Piper v. McCluskey, on appeal against a conviction by a Resident Magistrate for illegally permitting the sale of liquor, it was decided by His Honour Judge Ward that "No police officer is entitled to act as counsel or solicitor, nor has he a right to conduct a case unless he be the actual informant." The result of this judgment has been that counsel for the defence have frequently objected to experienced Inspectors or Sergeants conducting cases, on the ground that they were not the informants. As it generally happens that the constable who lays the information has had comparatively little experience, the objection thus taken has generally damaged the prosecution and tended to bring about a miscarriage of justice. I would therefore urge that the police be empowered by statute to prosecute in all criminal cases, as is already the case under the Police Offences Act, section 46.

I regret that I have been unable to get a handy volume of police statutes printed, but have not felt it advisable to urge this matter lest the Criminal Law Consolidation Act should pass this year, in which case the majority of the Acts selected by me for the volume in question would not be

I attach schedules showing lands reserved for police purposes in various districts throughout New Zealand since the 31st March, 1887; and also of works authorised and completed, showing the police-stations which have been repaired, rebuilt, or purchased; as well as a return showing the proportion of police to population, and cost per inhabitant, in this and the adjoining colonies, the comparison being highly favourable to New Zealand.

Police-buildings are urgently required at Dunedin, Riverton, Bluff, Otautau, Wyndham, and Naseby, where the quarters are either uninhabitable from age or rented at ruinous prices. I would point out that, as a rule, properties can now be purchased for but little over five years' purchase of

the rent paid by us.

I have much pleasure in reporting that the behaviour of the force under my command has been excellent, and leaves nothing to be desired in the matter of conduct and discipline.

The Hon. the Defence Minister.

I have, &c., W. E. Gudgeon, Commissioner. Return showing the Number of Offences Reported, Persons Apprehended, and Comparison of Crime during the Year ending 31st December, 1886, and Year ending 31st December, 1887.

RETURN showing the Proportion of Police to Population and Cost of Police per Inhabitant in each of the under-mentioned Places.

Place.		Proportion of Police to Population.		Police abitant.	Remarks.
New Zealand	••	1 to 1,328	8.	d. 13	Calculated for the basis of population, 646,913, on the 31st March, 1888, as furnished in the Registrar-General's return, published in the New Zealand Gazette of the 17th May, 1888; and the net expenditure for police, £101,922 11s. 7d. (vide Appropriation Account for year ended 31st March, 1888).
Victoria	••	1 to 770	4	7 <u>3</u>	From the Victorian Year Book, 1886-87, viz.: Population on the 31st December, 1886, 1,003,043; police expenditure, 1886-87, £233,056; number of police, 1,316.
New South Wales	••	1 to 672	5	8	Calculated on strength of police, 1,491 (vide Inspector-General's report of the 9th January, 1888). Population, 1,001,966, from Victorian Year Book, 1886-87; and vote for year ended the 31st December, 1886, £285,395. No later estimates received.
South Australia	••	1 to 769	5	8	Calculated from estimates as voted for year ending the 30th June, 1888, viz.: Number of police, 406; amount of vote, £88,250; and population, from Victorian Year Book, 1886–87, 312,439.
Queensland	••	1 to 367	8	5	Calculated on number of police according to estimates for 1886-87, 935 persons; amount of estimates, £144,705. Population on the 31st December, 1886, 343,768 (vide Victorian Year Book, 1886-87, page 38). Note.—Deducting native trackers (200), there are only 785 police, according to which the proportion of police to population would be 1 to 467.

Schedule of Land reserved for Police Purposes since 31st March, 1887.
