Alluvial Mining (Middle Island)— <i>continued</i> .		Coal-mining (Middle Island)— <i>continued</i> .	
Otago District— <i>continued</i> .		West Coast— <i>continued</i> .	
Clutha Valley— <i>continued</i> .		Westport Colliery Company ..	168, 169
Island Block Extended	131, 132	Granity Creek Mine	169
Hercules Company	132	Greymouth-Point Elizabeth Company ..	169, 170
Enterprise Company	132	Blackball	170
Roxburgh Amalgamated Company ..	132	Brunner	170, 171
Bald Hill Flat	132, 133	East Coast, Middle Island	171, 172
Manuherikia Valley	133	Southland	172
Ophir, Ida Valley, and German Gully ..	133, 134	Statement showing Mines in the Colony where Out-	
Mount Ida	134, 135	put has exceeded 9,000 tons for Past Year, Number	
Hyde and Hamilton	135, 136	of Men Employed, &c... ..	172
Blackstone Hill	136	The Origin and the Mode of the Formation of Coal:	
St. Bathans	136-138	Paper read by Adolph Firket, Professor of the	
Ewing's Claim (Hydraulic Elevating) ..	137, 138	University of Liège, at the Meetings of the Asso-	
Scandinavian Water-race Company ..	138	ciation of Engineers	173-185
United M. and E. Company	138	Extraction of Gold and Silver from Ores by Potas-	
Muddy Creek Tailings Channel	138	sium-cyanide Solutions	185-210
St. Bathans Water-race Company	138	Experiments by W. Skey, Colonial Analyst, on the	
Eagle and Gray and P. Tiernan and Com-		Solvent Properties of Ores in Cyanide Solutions ..	186-189
pany	138	Mr. MacLaurin's Experiments	189
Garty and Gallagher	138	Bromo-Cyanogen Solvents	190
St. Bathans Channel Company	138	Cyanide-potassium Patent Rights tested in England ..	190-202
Vinegar Hill	138, 139	Judgment of Mr. Justice Romer.—Plaintiffs have	
Morgan and Hughes	139	no Patent	194, 195
Hughes and Owen	139	Judgment of the Court of Appeal	197-202
Cambrian's	139	The Sulman-Teed Process	202-204
Tinker's (Matakanui)	139, 140	The Cyanide Process in the Transvaal Mines ..	204-208
Devonshire	140	The New Recovery Process.—Electrical Precipita-	
Dry Bread	140	tion from Cyanide Solution	208-210
Cromwell	140	Patent Rights granted	211-250
Cardrona and Criffel	140, 141	Extraction of Gold and Silver by Solvents ..	211-224
Arrowtown	141, 142	Improvements in, or relating to, the Extraction	
Arrow Falls	142	of Precious Metals from their Ores, by Henry	
Shotover	142, 143	Livingstone Sulman and Frank Litherland	
Round Hill	143-145	Teed	211, 212
Orepuki	145	Improvements in the Treatment of Precious	
Preservation Inlet	146-150	Ores, by Henry Livingstone Sulman	213
Chalky Inlet	146, 147	Improvements in, or relating to, the Treatment	
Explorations of Mr. Carrick	146-150	of Ores, by Henry Livingstone Sulman	214
Te Whara Beach	147, 148	Improvements in precipitating Precious Metals	
Cunaris	148	from Cyanide or Similar Solutions, by John	
Sub-alpine	148, 149	Stewart MacArthur	214, 215
Timber-belts	149	Improvements in the Method or Process of	
The Lakes	149, 150	treating Gold and Silver Ores, &c., by Edward	
Dredging	150-157	D. Kendall	215
Otago	151-156	Improvements in Processes of and Solvents for	
Waipori	151	separating Precious Metals from their Ores,	
Glenore	151	by William A'Court Granville Birkin	216
J. Nelson and Co.'s Dredge	151	Improvements in extracting Gold and Silver	
Clutha River	152-156	from Ores and other Compounds, by James	
Golden Gate Company	152	Alexander Walker	216, 217
Golden Run Dredge	152	Improvements in extracting Metals with New	
Bennett and Party's Excelsior Dredge ..	152	Solvent Materials, by John James Hood ..	217, 218
Pringle and Party's Dredge	152, 153	Improvements in Electrolytic Apparatus for	
Brazil and Party's Dredge	153	decomposing Chloride of Sodium or Potas-	
Richardson and Party's Claim	153	sium in Solution, and for leading away the	
Golden Treasure Dredge	153	Products of Decomposition, by Trevenen	
Miller's Creek Dredge	153	James Holland	218, 219
Roxburgh Dredge	153	Improvements in making Potassic Cyanide and	
Dunedin Dredge, No. 2	153	Apparatus therefor, by William McDonnell	
Dunedin Dredge, No. 1	153, 154	MacKey	219, 220
Etrick Dredge	154	Improvements in obtaining Gold and Silver	
Dumbarton Rock Dredge	154	from Ores and other Compounds, and Ap-	
Edina Dredge Company	154	paratus therefor, by James Nicholas ..	220, 221
Manuherikia Dredge	154	Improvements in and in connection with the	
Eureka Dredge, Alexandra	154, 155	Extraction of Gold and Silver from Ores or	
L. Gard's Steam-dredge	155	Compounds containing the same, and in their	
L. Gard's Steam-dredge, No. 2	155	Recovery from Solutions, by John Cunning-	
Enterprise Dredge	155	hame Montgomerie	221-223
Chicago Dredge	155	Improvements in the Extraction of Gold and	
Clyde Dredge	155	Silver and in Solvents of these Metals, by Dr.	
Sew Hoy Company	156, 156	Albrecht Smidt	223, 224
Sandhills Company	156	An Improved Process for the Treatment of	
West Coast	156, 157	Auriferous and certain other Metalliferous	
Collingwood Dredge	156	Ores, by John James Christmas	224
Cocksparrow Dredge	156, 157	Pulverising Machinery	224-228
Alexandra Dredge	157	An Improved Rotary Grinding and Pulverising	
Matakitaki Dredge	157	Machine, by Richard Durrant Langley ..	224-226
Explorations in the Urewera Country, Report on by		A New and Improved Gold-saving Machine, by	
H. A. Gordon, Esq., and A. McKay, Esq. ..	157-165	William Henry Dawson	226, 227
Coal-mining	165-185	An Improved Crusher and Pulveriser, by Gustaf	
North Island	165, 166	Frederick Phillip Lenz and William Paynter ..	227, 228
Kawakawa	165, 166	An Improved Machine or Apparatus for pul-	
Hikurangi Mine	165, 166	verising or reducing Gold-bearing Quartz or	
Ngunguru	166	Ores or other Hard Substances, by Edward	
Waikato	166	Waters	228
Middle Island	166-172	Amalgamating and Concentrating Auriferous Ores ..	229, 242
Collingwood	166, 167	Improvements in the Construction and Method	
Collingwood Coalfield, Report on, by N. D. Coch-		of operating Electrical Apparatus for the	
rane, Esq., Inspector of Mines	166, 167	Treatment of Ores containing Gold and other	
West Coast	167-171	Precious Metals, and for amalgamating the	
Mokihinui	168	same, by William Joseph Weedon	229-231
