(iii) In any estimate of the total number of men held in industry, allowance should be made for *appeals unheard on 31st March, 1943*. These totalled 5,596 in the classes covered in this table.

(iv) Apart from the classes included above there are some thousands of men in the eighteen years, nineteen years, forty-one to forty-five years and Grade II classes who were held in industry on 31st March, 1943. As their numbers were at the time in a state of flux, owing to the release of the eighteen-year-old and nineteen-year-old classes and the redistribution of man-power as between the Army and industry, no details of these classes are given in this Appendix.
