Nore.—(1) The foregoing dairy-produce purchase and sale accounts represent the purchase of dairy-produce from dairy companies at the guaranteed purchase-prices, and returns from the sale of the produce at the level of the prices ruling at the stabilization date, 15th December, 1942. (2) The proceeds of increases in sale-prices received after 15th December, 1942, are credited, in terms of the stabilization agreement between the Government and representatives of the farming industries, to the Dairy Industry Stabilization Account (see last year's annual report, pages 3 to 6).

Note.—(1) The Dairy Industry Stabilization Account was opened in terms of the stabilization agreement between the Government and representatives of the farming industries (see last year's annual report, pages 3 to 6). The debits to the account will be the costs allowances and other costs of stabilization in terms of the stabilization agreement. The credits to the account are (a) the surplus in the Dairy-produce Account, and (b) the proceeds of increases in sale-prices received after 15th December, 1942. (2) The proceeds of the increases in sale-prices of butter (26s. 14d. sterling per hundredweight) which apply for the 1943-44 season, and which are referred to on page 5 of this report, were not received at the date of closing the accounts, and consequently will be shown in next year's Dairy Industry Stabilization. Account.
