ALLUVIAL MINING

Two of the three companies operating in the West Coast District, the Moonlight, Blackball, and the Golden Sands, Barrytown, suspended operations during the early part of the year due to the exhaustion of available payable ground.

In the Southern District the Golden Arrow Mining Co. worked during the early part of the year on the Arrow River. Operations were then suspended and the company went into voluntary liquidation.

A number of small parties are still working alluvial claims in these districts, but there have been no major developments.
