Arithmetic—The simple and compound rules to long division.

## 3. SCHOLARSHIPS AND EXHIBITIONS.

There are many scholarships so arranged that, taken in succession, they cover the whole period of school life from an early age until the higher limit of age for junior University scholarships has been reached. The entrance scholarships are open to all boys who have not already entered the school; the others, both to boys already attending it and to those from other schools. For Some's Scholarships a preference is to be given *ceteris paribus* to the kin of the foundress, Mrs. Maria Some, or of her husband, the late Joseph Some; and candidates must be members of the Church of England, or of some church in communion with it. This restriction does not apply to entrance scholarships, or to the special grants of free education sometimes made by the governing body to meet special cases.

In 1903 the number of scholarships held was fifty-six (foundation).
