DEPARTMENT OF LANDS: REPORT ON A BOTANICAL SURVEY OF STEWART ISLAND.

By L. COCKAYNE, PH.D.

Presented to both Houses of the General Assembly by Command of His Excellency.

•	CONT	ENTS.	
Part I. Introduction—	Page.	Part III. The plant formations—continued. B. Lowland vegetation—continued.	Page.
A. General remarks	2	2. Heath—	
B. Early history of Stewart Island C. History of botanical research	3 4	$(a.)$ General \dots	25
D. Physiography	6	(b.) Heath of ancient dunes,	
E. Climate	7	valleys of Rivers Fresh-	
		water and Rakiahua	$\frac{26}{26}$
Part II. Special ecology—	9	(c.) Mason Bay (d.) Heath at Port Pegasus	26
A. The ecological conditions	ð	3. Bogs and swamps—	40
B. Ecology of the plants— 1. General	10	$(a.)$ General \dots \dots	26
1. General 2. Life-forms		(b.) Freshwater and Rakiahua	
(a.) Trees	10	Valleys	26
(b.) Small forest trees and		(c.) Old dune bogs near Mason Bay	27
shrubs	11	$(d.)$ Swamp \dots	27
(c.) Low trees and shrubs of the scrubs and heaths	11	(e.) Bogs near Port Pegasus	27
(d.) Herbaceous and suffruti-	1.	(f.) Boggy meadow	27
cose plants—	į	C. Mountain vegetation—	20
(a.) Cushion plants	12	1. General 2. The manuka formation	28 28
$(\beta.)$ Rosette plants	12	Scrub of the lower hills;	20
(γ) The tussock form	13 13	Pryce's Peak	28
$(\delta.)$ The yucca form $(\epsilon.)$ The large - leaved	19	3. Subalpine scrub—	
plants	13	$(a.)$ General \dots \dots	28
(5.) Leaves and leaf.	i	(b.) Composition of the forma-	29
anatomy	13	tion List of the species	29
(e.) Lianes	14	(c.) Distribution	29
(f.) Epiphytes	14 14	(d.) General character and phy-	
(g.) Ferns	12.	siognomy	29
ment—		4. Boggy meadow	30
(a.) Large leaves	15	Colonisation of new ground 5. Bog	31 31
(b.) Effect of wind and soil	16	6. Rock vegetation	31
4. Prolonged juvenile forms; hete-	16	Part IV. History of the flora-	
rophylly	10 4	1. General	31
