

ing bodies—having the programme of work determined very strictly by the statutes of the University, and the examination-tests of the bulk of their work conducted by examiners in Great Britain—possess very little real freedom in teaching, and very little power to direct or modify the character of the work of their students.

The beginning of research-work is provided for in the conditions attached to certain of the higher degrees; but so far not much has been done to encourage advanced research; probably the conditions have not been altogether favourable to it.

In two of the University colleges, the lectures are delivered mainly, but not entirely, in the evening; in the other two most of this work is done during the day; so that in the former institutions the students are at liberty to follow other occupations, and a large proportion of them actually do so. While this fact no doubt increases the number of students, its tendency is to bring down the standard of the work accomplished; as far as the holders of University scholarships are concerned, a recent decision of the Senate will render this impossible in future. The raising of the standard of matriculation, and the acceptance of evidence of the satisfactory completion of a four-years secondary course as a qualification for admission to the University would also make it easier for the colleges to raise their standard of work. At the present time proposals in reference to the modification of the course for the ordinary degrees of Bachelor of Arts and Bachelor of Science are under consideration, having been referred to the University colleges for report and suggestions. In regard to the preparation of students for professions, the University and the several colleges have done valuable work, and through their means many of the lawyers, doctors, and teachers of the Dominion have received the greater part of their training. The affairs of the University are controlled by the Senate, which under “The New Zealand University Amendment Act, 1902,” consists of twenty-four members or Fellows—four elected by the Governor in Council; eight by the governing bodies of the four affiliated institutions, two by each; four, one each, elected by the Professorial Boards; and eight, two each, elected by the four District Courts of Convocation, consisting of the graduates belonging to the several University districts. The revenue of the University is derived mainly from the statutory grant of £3,000 per annum, examination and diploma fees, and from interest upon sums invested—the savings of past years. By the decision of the Senate, half the amount of the statutory grant is allocated each year to the Scholarship Fund, and, as the income of that fund is never fully expended in any year, the result has been the building-up of a reserve putting the scholarship scheme of the University on a sound basis.

The chief items of income and expenditure of the University of New Zealand for 1908 are shown below:—

<i>Income.</i>				<i>Expenditure.</i>
