OCEAN BEACH DOMAIN.

Sections Nos. part 28 and 31, Block VII, Otago Peninsula Survey District, and 4 and 6, Block XII, Dunedin and East Taieri Survey Districts. Area, 22½ acres 2 roods 11 perches.

Salt-water baths have been installed since last year, and are proving a great success. The swimming-baths have been frequented by a very large number of bathers. The St. Clair beach has not improved during the year, westerly winds having caused a continuous scour. Unusually heavy pedestrian traffic has also tended to reduce the level of the beach for a distance of some chains. The progress at St. Kilda beach has been slow compared with past years, caused by the absence of south-west winds, which usually bring up a supply of sand. Tracks have been cut through the lupins, and, where possible, covered with clay. Surf bathing has become a popular pastime. It is proposed to have an area prepared for tree-planting, and also to plant marram-grass and lupins where required. Reclamation and general maintenance will also be continued. (NOTE.—This report is for the year ended 31st March, 1911.)

OTOKIA DOMAIN.

Section No. 47, Block I, Otokia Survey District. Area, 12 acres 2 roods.
