

EXTRACT FROM THE THIRTY-FIFTH ANNUAL REPORT OF THE
MINISTER OF EDUCATION.

HIGHER EDUCATION.

NEW ZEALAND UNIVERSITY AND AFFILIATED COLLEGES.

The New Zealand University, the body which has general control of higher education in New Zealand, was founded by the New Zealand University Acts of 1870, 1874, and 1875. In 1876 the University was recognized by Royal charter as entitled to grant the degrees of Bachelor and Master in Arts, and Bachelor and Doctor in Law, Medicine, and Music. The Amendment Act of 1883, and the supplementary charter issued in December of the same year, added the degrees of Bachelor and Doctor of Science. Moreover, in 1904, the University Degrees Act gave the University authority to confer degrees of Doctor of Literature, Master of Laws, Surgery, and Science, and Bachelor, Master, and Doctor of Veterinary Science, Dental Surgery, Mechanical, Electrical, Civil, Mining, and Metallurgical Engineering, Naval Architecture, Agriculture, Public Health, and Commerce. For these latter no further charter has been given, so that nominally they must be considered as having currency only in New Zealand.

The affairs of the University of New Zealand are controlled by a Senate, which, under the New Zealand University Amendment Act, 1902, consists of twenty-four members or Fellows—four elected by the Governor in Council; eight by the governing bodies of the four affiliated institutions, two by each; four, one each, by the Professorial Boards; and eight, two each, by the four District Courts of Convocation, consisting of the graduates belonging to the several University districts. The revenue of the University is derived chiefly from a statutory Government grant of £3,000 per annum, from examination and diploma fees, and from interest on money invested.

The University is an examining, not a teaching, body, and four teaching institutions are affiliated to it—the Auckland University College, Victoria College, Canterbury College, and Otago University. Of these four institutions the two first mentioned—Auckland University College and Victoria College—each receive an annual statutory grant of £4,000, supplemented during each of the last three years by grants of £1,200 and £1,500 respectively, while the two others—Canterbury College and Otago University—are endowed with reserves of land. The affairs of these University colleges, including the appointment of professors and lecturers, are entirely in the hands of their various Councils.

Each of the four affiliated University colleges specializes in certain directions, and to further this purpose Government makes to each an annual grant of £2,000. Otago University has attached to it Medical and Dental Schools and a School of Mining and Metallurgical Engineering; Canterbury College has a School of Engineering (mechanical, electrical, and civil); Auckland University College has a School of Mining and Metallurgical Engineering and a School of Commerce; while the grant to Victoria College is intended to enable it to specialize in law and science.

While the University colleges thus perform the actual teaching-work, the University exercises most important functions in regulating the scope of the degree examinations, in appointing examiners, in awarding scholarships, in conferring degrees, and in many other directions. At the outset it was the policy of the
