

*Infant Mortality.*

In Auckland and suburban boroughs,—

Deaths of infants under 1 year were .. .. .	143
Deaths of infants between 1 and 5 years .. .. .	60
	<u>203</u>

Deaths of children under 1 year per 100 births,—

Auckland City and suburban boroughs .. .. .	6.30
---	------

This is satisfactory when compared with the mean for the five years, 1907–11—namely, 7.66—  
and for previous quinquennial periods, as the following table shows:—

	Auckland City.	Auckland and Suburban Boroughs.
Mean for five years, 1901–5 .. .. .	11.22	10.45
Mean for five years, 1906–10 .. .. .	9.23	8.12

Mean for the whole Dominion, 1901–10, 7.26.

*Causes of Death.**Zymotic Diseases.*

Deaths in Auckland and suburban boroughs				102			
For the last five years,—				Deaths.			
1907	..	..	103	1910	..	..	125
1908	..	..	139	1911	..	..	102
1909	..	..	74				
The 102 deaths were from—							
Diarrhoeal diseases	..	..	69	Whooping-cough	..	..	2
Influenza	..	..	10	Measles	..	..	2
