One of the engines coupled to a generator was running hot, and was about to be shut down when an explosion occurred in the crank-chamber ; the force of the explosion blew the cover off the lubricating-oil chamber, with the result that a large quantity of boiling oil was discharged upwards ; the oil struck the top portion of the engine, and, descending in a shower, inflicted severe injuries on the four men who were engaged near the machinery, burning their faces, arms, and body. Brown was wheeling a truck of leather across the cage of the lift when the cage dropped down ; he fell to the floor below and fractured his left leg.
