\* In respect of gold, ounces of the fineness of 20 carats and upwards. † Including lime, 15 tons; greenstone,  $\frac{3}{2}$  ton; building-stone, 37 tons; pumicestone, 104 tons; pumice sand, 2,739 tons; also marble and dressed stone of weight unspecified by the Customs Department.

‡ For a number of years prior to 1918 the value of the output of coal-mines consumed in the Dominion was estimated at 10s. per ton, being pit's-mouth cost. During 1918 and 1919 the estimated value was increased to that of exported coal f.o.b., which is excessive for all classes and grades of coal at the pit's mouth. The estimated value for 1920, as given above, is on the basis of £1 per ton at the pit's mouth.
