

SESSION II.
1921.
NEW ZEALAND.

UREWERA LANDS CONSOLIDATION SCHEME

(REPORT ON PROPOSED).

Laid on the Table of the House of Representatives by Leave.

To the Hon. D. H. GUTHRIE, Minister of Lands, and the Hon. J. G. COATES, Native Minister,
Wellington.

DEAR SIRS,—

Wellington, 31st October, 1921.

We have the honour to submit our detailed report on the Urewera lands, and the proposals for the consolidation of the interests acquired therein by the Crown and of the interests of the Native non-sellers.

1. HISTORICAL REVIEW.

For a better understanding of the position at the 1st August, 1921, when we met the Natives at Ruatoki pursuant to your instructions, we desire to give a brief review of the circumstances which led up to the special legislation affecting the Urewera country, of the history of land-titles in that territory, and of the purchases carried out by the Government therein.

Prior to the year 1896 it may be said that the Queen's writ did not run in the area which the Legislature in that year defined as the "Urewera District Native Reserve." The tribal lands were unsurveyed, the Native Land Acts were inoperative, and Native customs and institutions were dominant. But already there were signs of dissatisfaction with the existing state of things, serious quarrels arising out of land claims, and a demand for a tribunal to investigate the same and determine the matters in dispute. These and the desire of the Government to bring the Urewera Tribe and their titles within the pale led to a Ministerial tour of the territory, undertaken by the Prime Minister (Mr. Seddon) and Mr. (now Sir James) Carroll. The negotiations between them and the Ureweras resulted in the passing of the Urewera District Native Reserve Act, 1896. That Act—

- (1.) Constituted and defined the boundary of the Urewera District Native Reserve, containing approximately 656,000 acres.
- (2.) Empowered the appointment of seven Commissioners (two Europeans and five Urewera Natives) to investigate and determine by sub-tribal areas the ownership of Urewera lands according to Native custom and usage; the Government at its own cost providing the sketch-plans as the basis of the investigations.
- (3.) Provided for the appointment of Local Committees (one for each block), from which would be elected a General Committee "to deal with all questions affecting the reserve as a whole, or affecting any portion thereof in relation to other persons than the owners thereof." The powers of these committees were very vaguely defined, and were left to be prescribed by the Governor in Council. One power, however, was defined beyond dispute, "that the General Committee shall have power to alienate any portion of the district to the Crown, either absolutely or for any lesser estate, or by way of cession for mining purposes."
- (4.) Provided that the Government could take not more than 400 acres (except with the consent of the General Committee) for accommodation-houses, camping-grounds for stock, and other public purposes; and could lay out roads and landing-places.

The Act of 1896 also provided that the findings of the Commissioners were subject to appeal to the Native Minister, who had power to finally dispose of the appeals upon such expert inquiry as he might direct.

The preparation of sketch-plans took some time, and the Commissioners did not begin work till the 1st February, 1899. In 1900 an amending Act (the Urewera District Native Reserve Act Amendment) was passed which brought the Ruatoki Block under the jurisdiction of the Commissioners, and empowered the Native Minister on behalf of the owners to lease such portions of the Urewera District as were not required for immediate settlement. It was provided that the land should be leased under Part V of the Land Act, 1892. Nothing was ever done under this provision.

The Commissioners completed their investigations towards the end of 1902, and meantime made an interim report (Parliamentary Paper G.-6, 1902). Their complete orders, defining the owners of all hapu blocks and their shares, were printed and presented to Parliament as Paper G.-6, 1903. This may be termed the first stage of the ascertainment of titles. It was open to any aggrieved party to appeal to the Native Minister, who could under the 1896 Act direct an expert inquiry into the appeals and dispose of them on their report. There were 173 appeals (published in *New Zealand Gazette* dated the 15th November, 1906). These were dealt with by Commissioners between 1906 and March, 1907. Their report is printed as Parliamentary Paper G.-4, 1907, which also contains the final orders under the hand of the Native Minister dated the 30th August, 1907. These orders form the basis of the land-titles in the Urewera district.

Parliament in the same year made the Urewera Native Reserve subject to the Mining Act, and empowered the Governor to make regulations to carry out a promise of the late Mr. Seddon to the Ureweras in regard to prospecting and mining for gold. (The Maori Land Claims Adjustment and Laws Amendment Act, 1907, sections 7 and 8.) It also empowered the Native Land Court to investigate the title of one block (Pukepohatu) which the second Commission (on appeals) found not to have been investigated by the original Commission.

It will be noted that up to 1907 the Urewera lands had been dealt with apart, that the Native Land Court had no jurisdiction, and the ordinary rules relating to the issue and registration of titles, surveys, and alienation did not apply. No private person could deal with any Urewera land, and it is doubtful whether the Crown could purchase except from the General Committee, which could not be appointed until the titles were finally ascertained in 1907. Thus the period from 1896 to 1907 was wholly occupied with the litigation relating to the thirty-four tribal blocks into which the territory was divided, involving an area of 650,000 acres. The titles could not be issued because the sketch-plans on which the investigations were based were magnetic surveys. In 1908 the Native Land Commission (Stout-Ngata), in G.-1A, 1908, reported: "To complete the titles so far as investigations have proceeded proper surveys are required. The titles, however, are far enough advanced to allow of the Native Land Court exercising jurisdiction in partition, succession, and other cases"; and recommended that the other steps contemplated in the principal Act of 1896—namely, the appointment of Local (Block) Committees and the election of a General Committee—be carried out. The Ureweras had offered to the Native Land Commission an area of 28,000 acres, portions of ten different blocks, to be dealt with for settlement by way of lease. The Maori Land Laws Amendment Act, 1908, sections 20 to 22, gave effect to some of the Native Land Commission's recommendations. In March, 1909, the General Committee was constituted. In 1909 the Urewera District Native Reserve Amendment Act was passed. It provided for the conversion of the Urewera title orders into freehold orders under the Native Land Act, 1909, and registrable as such; extended the jurisdiction of the Native Land Court in all matters (the consent of the Governor in Council being required to partition and exchange) to Urewera lands, and emphasized the provision that no Urewera land could be purchased by the Crown otherwise than from the General Committee in pursuance of the principal Act. The rules (*New Zealand Gazette*, 8th September, 1910) provided that this consent should be given by resolution of the committee under its seal.

During 1908, 1909, and 1910 numerous attempts were made by the Ureweras, by petition and otherwise, to reopen some of their titles. The right of appeal was conceded by legislation in 1910 (the Urewera District Native Reserve Amendment Act), and some appeals were dealt with by the Native Appellate Court. But the amendments to the titles were not serious.

In the meantime a large section of the Ureweras, led by Rua Kenana, then at the height of his influence, demanded that some of the lands should be sold to the Crown. This led in the winter of 1910 to an arrangement with the General Committee whereby lands in the Waimana or Tauranga basin, between Waimana and Maungapohatu, were authorized to be purchased by the Crown. A special valuation was made by an officer of the Lands and Survey Department, who reported favourably on the Waimana Valley lands, and the Government authorized the Lands Department to conduct the purchases in seven blocks, approved by the General Committee. By March, 1912, the area acquired, all in the Waimana basin, was 40,795 acres, at a cost of £31,353 6s. The negotiations were made difficult by the constant disputes as to titles, by the necessity of conforming to the wishes of the General Committee, and the doubt as to the legality of the course pursued in the purchases by the Crown. The procedure was first to obtain the written consent of the individual owner to the sale of his share, a payment being made to him on the assessed value of his interest. It was contemplated that when a sufficient area was acquired the Crown would define by partition the interests of those who had sold, and the General Committee would then affirm the sale of that portion by resolution and thus comply with the law.

Political changes in 1912 were partly responsible for the temporary cessation of the purchases. It appeared to be necessary to push the Urewera titles to completion by undertaking proper surveys. It was said of the old magnetic surveys that "they were useless for title purposes, and in many cases impossible to redefine on the ground, present-day Natives being unacquainted with the location of the named places on the boundary-lines." It was clear that a re-establishment of the old surveys would be a costly proceeding. In the meantime the Ureweras everywhere were clamouring for a resumption of the purchases; private syndicates were alleged to be in treaty for the acquisition of timber-cutting rights. During 1915 officers of the Lands and Survey Department made a special valuation of the balance of the Urewera lands, and especially of the timber resources. Except in part of the Whaiti Block the latter were not extensive, were not in sufficient quantities or in locations suitable for milling purposes. The Native Land Purchase Board towards the end of 1914 decided to resume the purchases, and to purchase direct from individual owners without reference to the General Committee. The policy of Crown purchase from individual Native owners had been approved

by Parliament in the Native Land Amendment Act, 1913, in regard to Native lands generally. In the Urewera country the then Native Minister, Mr. (now Sir) W. H. Herries, decided to broaden the scope of the purchases, which had hitherto been confined to the Waimana basin, and to conduct them as part of the general Native-land-purchase policy of the Government. The Native Land Purchase Officer, Mr. W. H. Bowler, resumed the Urewera purchases at the beginning of June, 1915. The blocks under purchase numbered forty-four (some of the original blocks having been subdivided), covering a total approximate area of 518,329 acres. For various reasons several blocks, totalling about 130,000 acres, were excluded from the operations, including the Waikaremoana Block.

The progress of the purchases up to the end of July, 1921, may be gauged from the following table :—

Acquired by Lands Department—			A.	R.	P.
From June, 1910, to 31st March, 1912	..	..	40,795	0	0
Acquired by Native Land Purchase Department—					
From 5th June, 1915, to 31st March, 1916	..	..	84,770	0	0
From 1st April, 1916, to 31st March, 1917	..	..	56,741	0	0
From 1st April, 1917, to 31st March, 1918	..	..	64,303	1	4
From 1st April, 1918, to 31st March, 1919	..	..	42,672	2	1
From 1st April, 1919, to 31st March, 1920	..	..	29,996	1	15
From 1st April, 1920, to 31st March, 1921	..	..	9,404	0	0
From 1st April, 1921, to 31st July, 1921	..	..	16,394	0	28
			345,076	1	8

Valued at £193,076 4s. 11d.

At that date, in the forty-four blocks under purchase the Native non-sellers retained 173,252 acres 2 roods 32 perches, valued at £78,479 15s. or approximately one-third, besides holding six large and two small blocks intact.

Parliament had in 1916 (section 4 of the Native Land Amendment and Native Land Claims Adjustment Act, 1916) made it clear that the old and recent purchases of Urewera lands were legal, and that every individual Native owner "shall be deemed to have and to have had power to sell his interest to the Crown, but to no other person." It became clear during 1918 and 1919 that the Urewera purchases were dragging. The Native Land Purchase Officer combed the district through on successive occasions, with diminishing success. It seemed as if the limit of those willing to sell was nearly reached. There was a strong and insistent demand in the Press and by local bodies in the Bay of Plenty to have the areas purchased by the Crown made available for settlement. It became necessary to concentrate attention on the problem of how best to dis sever the Crown from the Native interests without the intrusion of the latter into the Crown's sphere of settlement prejudicing a comprehensive scheme of roading and cutting-up and the reservation of forest and watershed areas. Heroic measures entailing the compulsory acquisition by the Crown of outstanding interests were suggested but could not be entertained. The alternative procedure of a Native Land Court partition defining and locating the proportions in each block bought by the Crown and retained by non-sellers did not appear to be satisfactory either for the Crown or for the non-sellers. In not one of the forty-four blocks under purchase had the Native interests been wholly acquired. But the chief stumbling-block was the fact that in order to make such partition orders effective and registrable it was necessary to undertake a comprehensive and very expensive survey of the whole territory. There was no guarantee that the areas awarded to the Crown would conform to any comprehensive settlement or roading scheme, or that the Court would be guided by settlement conditions. On the other hand, the Court was more likely to be bound to respect the Native occupations and clearings and to make these the nuclei of Native sections, irrespective of whether their locations fitted in or interfered with the roading and cutting-up of the Crown awards. The Crown's experience in the King-country under somewhat similar conditions was not to be lightly repeated.

The obvious solution, provided that it did not occupy too much time, was to arrange with the Native non-sellers a scheme that would consolidate the interests acquired by the Crown and those of the non-sellers. The position of the latter was indeed worse than that of the Crown. Their interests were scattered over a huge territory in many different blocks, without any hope under existing law of their ever being brought together into compact areas. Exchanges among themselves would be too costly even if it were practicable to comply with the requirements of the law, which seemed very doubtful. It was as much to their interest as to that of the Crown that a consolidation scheme should be carried out affecting the whole territory. Consolidation of interests as a remedy was suggested to the Native Minister, the Hon. Sir W. H. Herries, during the 1918 session, but, while he approved of the suggestion if the Natives were willing to effect the exchanges, "he did not think that the time was ripe for the Government to start cutting-out in the Urewera country." There was still a possibility of acquiring more shares from Natives willing to sell, and this opinion was justified by the fact that a further 60,000 acres were bought before the consolidation scheme was actually undertaken. But during 1919 and 1920 consolidation as a solution of the Urewera problem was constantly in the official mind. It was approved by the Minister of Lands (Hon. Mr. Guthrie) and officers of his Department. The *Kahiti* (*New Zealand Gazette*) of the 20th November, 1919, published a list of non-sellers in the Urewera district, giving the amounts to which they were entitled and the blocks in which they were interested. Early this year the Natives adopted the suggestion, and made strong representations, first to the parliamentary party which visited the Bay of Plenty and East Coast districts, and later to yourselves when you visited Ruatoki in May last. It was at the conference held by you with the Natives during May of this year that it was definitely decided to proceed with a consolidation scheme.

2. THE UREWERA LANDS CONSOLIDATION SCHEME.

The preparation of the necessary data was undertaken by the Native Department, and was carried out by the Native Land Purchase Officer, Mr. W. H. Bowler, and the Registrar of the Native Land Court at Rotorua. Lists were compiled giving the names of the Natives who retained their interests, and the value of those interests expressed in pence. Armed with this information, and in accordance with your instructions, we met the Natives at Ruatoki on the 1st August, 1921. They had been first notified through the *Kahiti* to attend on the 18th July, but that date was altered by a subsequent notice to the 1st August.

The officers who attended were Mr. R. J. Knight, of the Lands and Survey Office, Auckland, representing the Crown; Mr. H. Carr, Commissioner of the Native Land Court, representing the Native Department; Mr. H. R. H. Balneavis, Private Secretary to the Native Minister; and Mr. W. H. Bowler, Native Land Purchase Officer. The Hon. A. T. Ngata attended to represent the Native interest; and was later joined by Mr. H. M. Awarau and Mr. H. T. Fox, gentlemen who had considerable experience and expert knowledge of the execution of consolidation schemes in the Gisborne district.

The Ureweras attended in large numbers, every family of non-sellers being represented. A committee of thirty-seven representatives was selected to receive the proposals of the Crown, and the Hon. Mr. Ngata was unanimously asked to act on behalf of the non-sellers. The following is the list of the representatives selected to consider the proposals of the Crown, and who authorized the Hon. Mr. Ngata to conduct the negotiations on behalf of the non-sellers; and as in the subsequent grouping of the non-sellers the majority of these representatives retained that character, their corresponding group number is given:—

Akuhata te Hiko	..	..	11	Takurua Tamarau	..	..	32
Albert Warbrick	..	..	L	Tahuri te Hira	..	..	30
Te Ao Tangohau	..	..	39E	Takao Tamaikoha	..	..	12
Eparaima te Hapi	..	..	17B	Taipeti Matatua	..	..	40

Rehua te Wao	..	..	24	Wharepouri te Amo	..	..	25
Rotu Kereru	..	..	1	Whetu Paerata	..	..	15

The proposals of the Crown were outlined by Mr. R. J. Knight at the opening meeting, and, briefly, were as follows:—

1. The consolidation scheme to cover only those blocks in which the Crown had purchased interests. Summarized, the position was that in forty-four blocks, totalling 518,329 acres, the Crown had bought 345,076 acres 1 rood 8 perches, valued at £193,076 4s. 11d., and the non-sellers retained 173,252 acres 2 roods 32 perches, valued at £78,479 15s., the total estate involved being valued at £271,555 19s. 11d. The Crown would not exchange Urewera interests for any Crown lands outside the Urewera country, and for Native interests in blocks other than these under purchase.

2. The Crown asked for complete awards of Te Whaiti 1 and 2, Maraetahia, Tawhiuau, and Otairi Blocks, subject to small reservations at Te Whaiti Settlement for non-sellers, who would take the bulk of their interests elsewhere in the territory.

3. The Crown asked that the bulk of its purchases should be located in the area between the Whakatane River and the Waimana basin south of the Ruatoki Settlement.

4. The Crown asked that the non-sellers should contribute £32,000 worth of land towards the cost of the arterial roads, connecting Ruatoki with Ruatahuna, and Waimana via Maungapohatu with Ruatahuna.

5. The Crown proposed that the existing titles and surveys and tribal boundaries be cancelled and abolished, and new titles issued to the non-sellers for properly surveyed and roaded sections under the Land Transfer Act.

These proposals are outlined here because in the main they were the principles to which the details of the Urewera consolidation scheme were made to conform.

The subsequent proceedings occupied us at Ruatoki up to the 25th August. It was found necessary to pay visits of inspection to Te Whaiti and the Waimana Valley, these being made by Mr. Knight, accompanied by Mr. H. M. Awarau. Later, to complete negotiations relating to Waikaremoana Block and the Urewera Reserves, we visited Wairoa and Waikaremoana between the 8th and 15th September.

Procedure.

Having the compiled lists of non-sellers, and the Crown proposals outlined by Mr. Knight, it was decided to proceed at once to sort out the owners according to their family affinities or proposed locations. The lists were read in public, block by block, the representatives (who had been allotted

group numbers or letters) indicating to which group an owner should go. Disputes as to grouping were determined there and then. The individual names numbered 8,931. Aliases and duplications were thus revealed and noted, misspellings of names corrected, and the names of deceased owners to whom successors had not been appointed were marked off. This was a laborious proceeding, and occupied, off and on, the whole of our stay at Ruatoki.

The names of deceased owners having been ascertained, Mr. Carr, a Commissioner of the Native Land Court, assisted by Mr. Balneavis and Mr. Awarau, held an inquiry into the appointment of successors. There were over four hundred deceased owners, and the succession orders made numbered 1,081. Legislation is required to validate these as part of the consolidation scheme. We have anticipated this in our grouping of the non-sellers, and incorporated the proposed successors and the interests derived by succession in the proposed new title lists attached to this report.

The grouping was done in group-books provided for the purpose. The complete interests of each individual member of the group from whatever source derived were scheduled. There was continual shuffling and reshuffling of individuals composing a group, the relatives claiming inclusion in one group or the other according to the sources from which rights were derived. This may be accepted as the basis of any scheme for the consolidation of interests in Native land—namely, the formation of the group, the determination of the individuals composing the same, the scheduling of interests in all blocks affected by the scheme, and the location of their consolidated interests in one section, or in as few sections as possible. The appointment of successors to deceased owners should also precede the final and complete grouping and locating. As an instance, there was one deceased owner whose interests totalled £300 in value and whose successors were distributed among seven groups. The apportionment of value to each of these groups would, of course, affect the area of the section that each group would be entitled to receive. The final grouping was determined by the proposals for location. There were 150 groups (a subgroup being reckoned as a distinct group for the purpose). These appear in consecutive order in the Second Schedule hereto, together with the proposed location of each group or subgroup.

Scope of Scheme.

The Crown proposals sought at first to limit the scheme to the blocks actually under purchase, forty-four in all, and discouraged exchanges with any Crown lands outside the Urewera Native District Reserve as defined by statute. But during the progress of the negotiations it was deemed advisable to extend the scope of the scheme so as to include Waikaremoana Block and four reserves (known as the Urewera Reserves) on the south and south-west of Lake Waikaremoana, and also to permit of exchanges with portions of the Whirinaki Block (Crown land) and Hereheretau B 2 (Crown land in the Wairoa County). The Ruatoki Natives asked for the inclusion of Ruatoki 1, 2, and 3 Blocks, but it was found impracticable on account of the valuations. Finally the scheme excluded Ruatoki 1, 2, and 3, Whaitiripapa, Tapatahi, Manuoha, and Paharakeke, and added,—

Waikaremoana	..	..	..	..	..	..	Ares.
Urewera Reserves—							73,667
Whareama	..	..	..	..	..	..	300
Ngaputahi	..	..	..	..	..	..	298
Kopani ..	..	..	..	..	..	..	800
Heiotahoka	..	..	..	..	..	..	1,100
							———— 2,498

The scheme is set out in detail in the First Schedule to this report.

Proposed Legislation.

The present scheme has been formulated without jurisdiction, and with no authority other than the Ministerial instructions. The whole of the proceedings are therefore informal. Legislation is necessary to give effect thereto, and to determine by whom and the manner in which it shall be carried out. We recommend that the opportunity shall be taken of revising the existing legislation, and to that end place on record our views, viz. :—

1. That all existing legislation relating to the Urewera Native District Reserve be repealed. This means, *inter alia*—

- (a.) The abolition of the Local Committees and of the General Committee. There is now no need for these, and the majority of the Ureweras are opposed to their continuance.
- (b.) The repeal of the provision relating to the operation of the Mining Act and of any Proclamations issued thereunder.

2. That the consolidation scheme detailed in the First Schedule be confirmed, and that special officers be appointed charged with the duty of carrying the same into effect.

For the purposes of the scheme the Native ownership is determined by reference to the group-lists given in the Second Schedule. The special officers shall have power to amend these names and the shares set opposite them, or to transfer any name from one group to another, either for the whole or part of the interest shown opposite such name, or to amend the proposals for the location of the area that any group may be found entitled to, or to amend the proportion that may be awarded to the Crown. This precaution is necessary because in handling the huge mass of material of the Urewera titles errors or miscalculations may have crept in.

It is contemplated that differences may arise between the officers appointed to execute the consolidation scheme, or between them and the Natives concerned, prior to the making of an order

under the proposed legislation. In such cases it is advisable that the matters in dispute shall be referred to the Chief Judge of the Native Land Court, whose decision shall be final.

The orders made in pursuance of the scheme shall be signed by the special officers and counter-signed by the Chief Judge of the Native Land Court, who shall affix the seal of the Court thereto. Such orders shall operate as vesting-orders of the Native Land Court, and be registrable as such.

An order vesting title under the Act shall not be subject to appeal, but it is advisable to have powers of amendment such as were provided by section 39 of the Native Land Court Act, 1894.

3. *Crown Awards*.—These are set forth in the First Schedule. Where any block is completely awarded to the Crown the Act declares it to be Crown land. Where the rights between Crown and consolidated non-sellers require to be readjusted the Crown will derive its title from a vesting-order made under the Act.

In addition to any area to which the Crown is now entitled by purchase from the former Native owners, the Crown is entitled to a contribution towards the cost of arterial roads (up to £20,000 worth of land distributed over the whole of the Urewera country) and to take in land the approximate cost of the survey of the Native sections. These are deductible from the areas of the Native sections, and their extent and location is to be determined by the special officers.

The obligation is on the Crown to survey the Native sections in accordance with the direction of the special officers, and to reimburse itself for the cost of same in land.

4. *Alienation*.—A considerable period must elapse between the passing of the proposed legislation and the issue of the new titles thereafter for the Native sections. The existing Urewera Acts restrict all private alienations. Only the Crown is permitted to deal with Urewera lands either by sale or lease. It is clear that the scheme must be carried out to completion before any alienations are permitted, and we recommend that until the title to any Native section is completed by the making of an order and the endorsement thereon of a proper plan no alienation shall be permitted either to private persons or to the Crown. As regards the Crown, however, cases may arise where a sale to the Crown is desirable in order to adjust a difficulty, and in that case the purchase can take place on the recommendation of the special officers. When the titles are completed the general law relating to Native lands shall apply.

5. *Rates*.—The same provisions shall apply to local rates. No Native section shall be liable for rates until, say, a period of one year after the completion of the title thereto, and then only by notification under the hand of the Native Minister. It would not be fair to make these lands rateable until the roading scheme, to the cost of which they are contributing, is carried out.

6. Special provisions are required for those blocks which, though within the Urewera Native District, are not included in the consolidation scheme—namely, Ruatoki 1, 2, and 3, Whaitiripapa, Tapatahi, Manuoha, and Paharakeke. It was not possible to bring them into the present scheme, but it may be possible to deal with them, or some of them, partially before the details of the scheme can be carried out, and authority should be given for the purpose. In any case the restrictions against alienation should be applied to them as well as to the lands now included in the scheme.

7. *Waikaremoana Block and the Urewera Reserves*.—The former is already within the Urewera Native District Reserve, but the latter are not. They were, in fact, Crown lands granted as reserves to the Ureweras in the early days. Two of the reserves, Whareama and Ngaputahi, become Crown land by virtue of the scheme, the other two remain to the consolidated owners. Waikaremoana Block becomes Crown land by virtue of the scheme (a) by exchange as to Native interests consolidated to the north, (b) by agreement to sell as to Native interests owned by Natives living to the south of the lake and at Wairoa. The consideration for sale in the latter case is stated in the scheme, and the authority of Parliament is required for the necessary finance.

8. Authority is required for the grant of Crown lands to Natives in accordance with the scheme out of Whirinaki Block and Hereheretau B 2. These will become Native lands subject to the jurisdiction of the Native Land Court.

General Remarks.

We may say that the course decided upon by the Government in the case of the Urewera lands was probably the best that could have been adopted under the circumstances—namely, the carrying-out of negotiations in an informal way, unhampered by legislative and other restrictions—for the settlement of every question affecting this huge territory. The ordinary machinery of the Courts would have been at a serious disadvantage. A Court, acting judicially under statute, could not have conducted negotiations such as resulted in the acquisition of the Waikaremoana forest area, or the settlement of the Te Whaiti Blocks, where the Crown's objective was the large area of valuable milling-timber. Its own rules would have caused delays and adjournments at a time when the fullest advantage had to be taken of the complete representation of all non-sellers' interests at one place.

The Urewera consolidation scheme, if approved and completed, will effect a great saving to the country, especially to the Native Department, and will enable the Lands Department and those Departments associated with it in the settlement of Crown lands to commence operations on a comprehensive scale without any further delay. The following would be some of the chief results of the scheme:—

- (a.) A complete stock-taking of the ownership of lands in the Urewera country, which comprises 656,000 acres. That ownership is brought up to date in all details. Instead of being the most backward, they will be as far advanced as the best Native titles in any part of the Dominion.
- (b.) The work of the Native Land Court will in the future be reduced to making partitions among members of a family, which in practice would mean giving effect to family arrangements, and carrying on the successions to deceased owners.

- (c.) Useless and expensive surveys will be obviated, because there is now no need to re-establish and redefine the old magnetic surveys. The surveys necessary to complete our scheme will be Land Transfer surveys done once to enable the issue of certificates of title.

In conclusion, we venture the opinion that among the younger Natives of the Urewera country there is a strong and a genuine desire to be put in a position to farm some of their lands. They have been hampered in the past by the unsatisfactory nature of the titles, which, as will have been noted from a perusal of this report, have been in a state of turmoil since 1896, formerly during successive investigations and litigation, and later in the confusion occasioned by the Government purchases. The Urewera Natives were moved to agree to the consolidation proposals chiefly by the consideration that out of the scheme would emerge for the non-sellers defined sections, ready surveyed and accessible by or handy to arterial roads; that these sections would be free of the old-time restrictions, and owned not tribally or by hapus, but by compact families, with eyes looking forward, and whose only link with the past would be that the sections comprise the homes and cultivations of their ancestors.

We have, &c.,

MEMORANDUM BY THE HON. A. T. NGATA.

To the Hon. Minister of Lands and the Hon. the Native Minister.

DEAR SIR,—

I have perused the report on the Urewera consolidation scheme prepared by the departmental officers who were associated with me in the Urewera negotiations, and have much pleasure in certifying that it is a correct statement of the scheme and the proceedings in relation thereto.

I desire to impress on the Government the following matters :—

1. That the execution of the scheme should not be left to the ordinary machinery of the Courts and Departments. I strongly urge that special officers of the Native and the Lands Departments should be detailed to carry out the same, and I know of none better fitted for the work than those who have been engaged on the preparation of the scheme during the last three months. There should be attached to them a surveyor who has a thorough knowledge of handling the location of disputed Native sections, and who would have the necessary tact in dealing with the Natives of the district.

2. The exploration and definition of the Native areas should proceed *pari passu* with that of the Crown awards. It would be a breach of the spirit of the negotiations so successfully conducted if the Crown, on whom the responsibility for surveying and roading has been thrown, were to complete its own titles first and place settlers on the areas awarded to it, leaving Native claims in the air.

3. The concluding remarks of the report dealing with the utilization by the Ureweras of the lands remaining to them cannot be too strongly emphasized. I go further than the officers in urging that the State should inaugurate in this district a special scheme for rendering financial and other assistance to the young Urewera farmers. The human material is good. The men are good bushmen, efficient in all that relates to work in bush country. They require not only financial assistance, but above all business assistance. It would not be sufficient—in fact, it would be risky—merely to lend them money on the security of their lands. There must be business guidance as well to see that the money is applied to the best use to secure the best return.

4. The report is necessarily silent as to any policy for dealing with the areas awarded or to be awarded to the Crown under the scheme. I may in this connection direct your attention to the history of the Waimarino Block, which was purchased by the Ballance Government in 1886. As a purchase of a large compact forest area in the shortest possible time it stands as a record. In some respects it affords a parallel to the Urewera country. Waimarino was over 600,000 acres in extent, situated in the interior, surrounded on all sides, but at a distance, by a fringe of cultivated lands. It was not penetrated by arterial ways except the Wanganui River. It was unexplored territory. The country had then no forestry policy. The Waimarino area was nibbled at from all sides; it was the hinterland of two land districts, the hinterland of many County Councils, a kind of “No-man’s Land.” The demands of settlement forced it and its magnificent timber resources piecemeal into the market. It was not till the completion of the North Island Main Trunk Railway in 1908, twenty-two years after the purchase, that the country realized what a magnificent forest asset it had had and lost.

History repeats itself in some respects in the Urewera country. Once more the fate of a territory of over 600,000 acres of forest land, also hinterland, on the edge of two land districts, and of two Native Land Court districts and two Maori Land Board districts, the converging point of possibly four County Council areas, is in the hands of the Government to make or mar. Is it to be left to the nibbling process, to the varying claims of contending jurisdictions, to a gradual evolution pioneered by the axe and fire? Or shall we have now an illustration on a grand scale of what is meant by a comprehensive scheme of land-settlement? We have or are about to have a properly equipped Forestry Department, with its schemes for demarcation, reservation, and so forth. We have the dearly bought experience of Bay of Plenty farmers in handling bush farms in that district. We have on the East Coast the example of what Maoris can do with their lands if intelligently assisted, financed, and organized. We should be able to benefit by a combination of such talent and experience in the handling of the last important land problem of the North Island.

Yours faithfully,

A. T. NGATA.

FIRST SCHEDULE.

THE UREWERA LANDS CONSOLIDATION SCHEME.

1. THE scheme is based on data supplied by the Native Department, which gave the lists of non-sellers and the valuations of their interests expressed in pence, and a schedule showing the value of the interests acquired by purchase by the Crown; and on the compiled plan 12500 in the Lands and Survey Office, Auckland, of Urewera blocks, giving boundaries, areas, and partitions effected by the Native Land Court.

2. The scheme embraces all blocks within the Urewera District Native Reserve, as defined by the Urewera District Native Reserve Act, 1896, except Ruatoki 1, Ruatoki 2, and Ruatoki 3, and subdivisions thereof; Whaitiripapa; Tapatahi; Manuoha; and Paharakeke.

It includes lands not within the above reserve but which it was found necessary to include—namely, Whareama, Ngaputahi, Kopani, and Hei-o-Tahoka (known as “Urewera Reserves,” Wairoa County); Hereheretau B2 (undivided interests acquired by the Crown); Whirinaki Block (portions required for exchange with the Natives).

3. The non-sellers have been grouped as shown in the Second Schedule to the report. The process of grouping involved the incorporation of successors appointed by the Native Land Court, and of successors proposed as part of the scheme to owners reported to have died prior to the formulation thereof. The names of deceased owners have therefore disappeared from the lists, and those of the successors have been incorporated in the groups to which they rightly belong. The interests of each individual have been aggregated opposite his name, or if he is in more than one group, the same are distributed according to his wishes.

All the steps in the process of grouping successors and distribution of interests are shown in group-books numbered A to G, deposited in the office of the Registrar of the Native Land Court, Rotorua. The results of the process are the group-lists set forth in the Second Schedule, which should be confirmed as a complete statement of the present Native owners and their interests in Urewera lands.

4. The proposals for the location of the interests of the various groups are given in the summaries at the head of the group-lists; one summary giving them in consecutive order of the groups, and the other in the order of the blocks to which the groups are assigned. From the latter summary the approximate awards to Crown or Natives are compiled. In some cases awards are complete and definite enough for immediate execution of surveys, in others further inquiries are necessary involving preliminary topographical surveys and adjudication of disputes between the Crown and Natives, or among Natives only. But in most cases the data is sufficient to determine the proportions which the Crown or Natives, or the Natives *inter se*, are entitled to receive.

5. While adopting the former magnetic surveys and the areas and boundaries thus ascertained for the purposes of the scheme, it is understood that they are useful only for the purpose of calculating the proportions to which the respective parties to the scheme may be entitled—that the boundaries may be disregarded on eventual survey, although the nomination of a group or of the Crown to any locality described by the former block-names and sketch-plans should be respected as far as possible.

6. As between the Crown and Natives no variation in area is to be made on the ground of unequal values, or for reasons of accessibility, or otherwise.

7. The areas of the Native sections are subject to an assessment as a contribution towards the cost of surveying and forming the proposed arterial roads shown on plan 12500 deposited in the Lands and Survey Office, Auckland. The extent of the liability is £20,000 worth of land, and the assessment against each Native section is to be made by whatever tribunal is authorized to carry out this consolidation scheme.

The blocks referred to in clause 2 hereof as not included in the scheme, and also the lands referred to in that clause as being outside the Urewera District Native Reserve, but which have been brought into the scheme, are not affected by the proposed roading contribution.

8. The survey of all Native sections shall be carried out by the Crown, at the cost of those sections, to be paid for in land. The cost of the survey shall be estimated beforehand, and the area of land to defray the same shall be deducted from the area of the Native section to be surveyed and awarded to the Crown. That area need not be cut off contiguous to the Native section, or it may take the form of scenic or water-conservation or forest-conservation areas within the boundaries of the Native section.

9. If any Native cultivations or clearings or other improvements are surrendered by the non-sellers to the Crown in order to facilitate the Crown's settlement scheme, the Crown shall pay compensation for the same. The amount of the compensation and the persons to whom the same shall be payable shall be determined by the tribunal appointed to carry out this scheme.

10. (a.) The Crown shall receive as part of its award the whole of the following blocks: Otairi, Maraetahia, Tawhiuau, Poroporo, Te Tuahu, Paraoanui South, Ohiorangi, Tauwhare, Te Purenga, Tauwharemanuka 1, Tauwharemanuka 4, Tauwharemanuka 6, Tauwharemanuka 7, Tauwharemanuka 8, Tauwharemanuka 9.

(b.) The Native non-sellers shall receive the whole of the following blocks:—Ruatoki South, Wairiko, Waipotiki, Paraeroa B.

(c.) In the other blocks the proportions as between Crown and Natives, the proportions as between Natives and Natives, and the proposed locations, are set forth approximately in the Second Summary to the Second Schedule, and are subject to adjustment by the tribunal appointed to carry out this scheme.

11. The Crown shall receive two of the Urewera reserves—namely Whareama and Ngaputahi—and shall pay the local rates due by the Native owners on those blocks.

12. With regard to Waikaremoana, it was agreed that this block should be vested in the Crown on the following terms :—

- (a.) By exchange as regards Native owners who have joined groups proposed to be located in lands north of Waikaremoana Block, on the basis of 6s. an acre, the Crown taking the interests thus vacated. The results of these exchanges are already incorporated in the group lists scheduled.
- (b.) By purchase as regards the balance, on the basis of approximately 15s. an acre. The owners entitled to receive this purchase-money are shown in the Waikaremoana Residue Lists 1 to 4 in the proportions set opposite their names.
- (c.) The terms of the purchase are—
 - (1.) That the reserves mentioned in the Waikaremoana schedules shall be made for the owners proposed on those schedules. The actual location and area to be defined by survey.
 - (2.) Suitable land near the Kopani (Urewera Reserve) shall be purchased for the Natives shown in Waikaremoana Residue 1 List, and the cost thereof paid by the Crown and deducted from the proportion of purchase-money to which such Natives are entitled.
 - (3.) Payment in cash to be made to such owners as the tribunal appointed to carry out this consolidation scheme may recommend.
 - (4.) The balance of the purchase-money to be paid in debentures carrying 5 per cent. interest. The debentures to be issued to the Native Trustee. Interest on the debentures to be distributed by the Native Trustee free of cost to the Native beneficiaries.

13. The Crown shall provide suitable areas in Whirinaki Block (adjoining Te Whaiti 1 Block) for Groups L (A. Warbrick) and M (William Bird), and any surplus after satisfying Group M shall be for Te Whaiti 1 Native owners, if required.

The Crown shall, out of such area as may be awarded to it out of Hereheretau B 2 Block, in the Wairoa County, provide land to the value of £299 10s. for group 46 (Toriki Reupena).

14. The survey charges made in favour of the Crown against the Ruatahuna Blocks are to be cancelled and the lands released therefrom.

15. Although the Ruatoki 1, 2, and 3, Tapatahi, and Whaitiripapa Blocks are not included in the consolidation scheme as formulated, the tribunal above referred to may find it possible, and should be authorized, to give effect to any exchanges that may be proposed as between Natives and Natives affecting any of those blocks and the blocks already dealt with in the scheme.

16. The tribunal appointed to carry out this scheme shall have power to amend the group-lists, or to transfer a name from one group to another wholly or for a partial interest, or to alter the proposed location of any group, or to appoint successors to any deceased owner, and amend the lists by the incorporation of such successors.

17. The Native Trustee shall be deemed to be the trustee of all owners under disability, unless any other trustee is appointed by the Native Land Court. The tribunal appointed to carry out this scheme may, on the application of the persons interested, nominate trustees for appointment by the Court.

SECOND SCHEDULE.

(1.) SUMMARY OF GROUPS AND PROPOSED LOCATIONS.

No. of Group.	Group-name.	Number in Title.	Shares in Pence.	Value.	Proposed Location.
				£ s. d.	
1	Rotu Numia	6	322,463	1,343 11 11	Ruatoki South.
2A	Pihitahi Wharetuna ..	8	135,104	562 18 8	Ruatoki South: to include kainga and cultivations east of Whakatane River.
2B	Wiremu te Popoki (Trainor) ..	12	106,001	441 13 5	Ruatahuna 3: to include clearing and adjoin Tarapounamu-Matawhero.
3A	Mika te Tawhao	3	8,689	36 4 1	Ruatoki South (east of river): to cover cultivation. Balance to Parakohe adjoining.
3B	Mika te Tawhao	3	12,494	52 1 2	Ruatoki South (east of river): to cover cultivation adjoining 3A. Balance to Wairiko.
3C	Mika te Tawhao	6	17,191	71 12 7	Wairiko.
3D	Mika te Tawhao	7	210,326	876 7 2	Cultivations on Ruatoki South (east of river). Balance to Waipotiki.
3E	Mika te Tawhao	14	95,865	399 8 9	Waipotiki.
4A	Te Pouwhare te Roau ..	10	129,009	537 10 9	Parakohe: to include kainga and cultivations at Waikirikiri.
4B	Te Pouwhare te Roau ..	16	71,326	297 3 10	Papakanga in Parekohe. Balance in Ruatoki South.
5A	Te Hata Waewae	6	28,095	117 1 3	Parekohe.
5B	Te Hata Waewae	9	107,612	448 7 8	Ierenui-Ohaua and Te Kohuru-Tukuroa.
5C	Te Hata Waewae	21	256,802	1,070 0 2	Tarapounamu-Matawhero.
5D 1	Te Hata Waewae	9	431,045	1,796 0 5	Paraeroa, 400 acres; Taneatua, balance.
5D 2	Te Hata Waewae	1	44,303	184 11 11	Paraeroa B.
5D 3A	Te Hata Waewae	2	7,320	30 10 0	Ruatahuna 1: to join Group 21B.

SECOND SCHEDULE—*continued.*(1.) SUMMARY OF GROUPS AND PROPOSED LOCATIONS—*continued.*

No. of Group.	Group-name.	Number in Title.	Shares in Pence.	Value.	Proposed Location.
5D 3B	Te Hata Waewae	2	49,302	£ 205 s. 8 d. 6	Tarapoumanu - Matawhero : to join Group 5c.
5E	Te Hata Waewae	10	160,491	668 14 3	Ruatahuna 2.
6A	Tawera Moko	6	44,820	186 15 0	Ruatoki South.
6B	Tawera Moko	8	546,577	2,277 8 1	In suspense : may require a section each in Ruatahuna 3, Ierenui-Ohaua, and Ruatoki South.
7	Tupaea Rapaera	15	239,072	996 2 8	In suspense : would take any vacancies in Ruatoki 1 and 2 and Waitiripapa.
8A	Te Raukaraka Ereata	13	192,863	803 11 11	Parekohe. (For dividing-line between this and 10, see Group 10.)
8B	Te Raukaraka Ereata	42	250,830	1,045 2 6	Ruatoki South.
9	Mi Tangohau	23	88,137	367 4 9	Waipotiki.
10	Matehaere te Waara	5	107,929	449 14 1	Parekohe, 120 acres ; balance to Parac-roa B.*
11	Akukahata te Hiko	35	244,114	1,017 2 10	Parekohe (at Raroa to adjoin Tapatahi and Waimana Blocks).
12A 1	Takao Tamaikoha	9	11,466	47 15 6	Omahuru (east of Tauranga River).
12A 2	Takao Tamaikoha	36	89,742	373 18 6	Paraonui North.
12B 1	Hopaea Hakeke	10	238,502	993 15 2	Tauwharemanuka 3 : to adjoin Tauwharemanuka 2 on east of Tauranga River.
12B 2	Hopaea Hakeke	6	80,772	336 11 0	Ruatahuna 1.
13A	Putiputi Paparatu	5	6,405	26 13 9	Ierenui-Ohaua.
13B	Putiputi Paparatu	14	239,435	997 12 11	Waikarewhenua and Ranga-a-Ruanuku.
14A 1A 1	Rua Kenana	11	124,010	516 14 2	Parekohe (Matahi Section).
14A 1A 2	Rua Kenana	3	39,460	164 8 4	Ruatahuna 3.
14A 1B	Hori Hiakita	9	68,732	286 7 8	Parekohe (Matahi Section).
14B	Kamaua te Pou	12	74,968	312 7 4	Parekohe (Matahi Section).
14C	Wairiki te Tokatapu	5	36,392	151 12 8	Parekohe (kainga and cultivations).
14E 1	Ramari Taupae	2	21,690	90 7 6	Parekohe (Matahi).
14E 2	Taupae Karaka	21	80,219	334 4 11	Paraonui North.
14F	Tipu te Awahou	4	17,336	72 4 8	Parekohe (kainga and cultivations).
