Sir,— Department of Lands and Survey, Wellington, 20th July, 1926.

In accordance with the provisions of the Discharged Soldiers Settlement Act, 1915, I have the honour to submit herewith the report of the operations under the Act for the year ended 31st March, 1926.

I have, &c.,

J. B. THOMPSON,

The Hon. A. D. McLeod, Minister of Lands.

Under-Secretary.

# REPORT OF THE CHAIRMAN OF THE DOMINION REVALUATION BOARD.

#### THE DISCHARGED SOLDIERS SETTLEMENT AMENDMENT ACT, 1923.

#### REVALUATION OF SOLDIER FARMS.

The personnel of the Dominion Revaluation Board set up to deal with the revaluation of soldier farms and cognate matters in relation thereto is as follows: Messrs. J. B. Thompson, Under-Secretary for Lands (Chairman); R. A. Rodger; J. Gordon; and J. H. Richardson, C.M.G. Mr. F. W. Flanagan, the late Valuer-General, retired from the Board in January, 1926, and his place was taken by Mr. T. Brook, his successor in office.

As indicated in last year's report, the Dominion Revaluation Board had then practically completed its investigation of the matters relegated to it under the Discharged Soldiers Settlement Amendment Act, 1923. It did not necessarily follow that the original decisions of the Dominion Revaluation Board were a final and satisfactory solution of all the troubles connected with the settlement of soldier settlers on the land. It can be readily understood that in the varied classes of lands dealt with by the Board there were other factors than that of value which vitally affected the operations of the settlers.

In the case of settlement lands it was often found that subdivision had been too close, and it was

only possible to satisfactorily adjust matters by increasing the area of respective holdings.

By making recommendations to the Land Boards quite a number of settlers have been granted additional areas from vacated lands, while others have obtained by transfer the title to adjoining sections. This is not aggregation in the ordinary sense, but special action necessary to place settlers on an economic footing. In certain swamp areas it has been necessary to grant relief from rent until such time as the land consolidated through drainage and became productive. Partially developed bush, pumice, and gum lands have been given special consideration, and the settlers on same have had every encouragement. Settlers on lands infested with blackberry have been given concessions which may be looked on in the light of a subsidy on their personal efforts and expenditure towards keeping this pest in check.

Original determinations regarding leasehold values or capital charges have been reviewed in many cases, and, in the light of further reports and information, the Board has varied its former decision

and extended such relief as the merits of each case demanded.

Shortly stated, the Board has right through its operations endeavoured to size up the possibilities of each holding, and through adjustment of value every settler has been given the chance of making good.

The Board has continued its efforts in the case of mortgages subsequent to the Crown's. It has endeavoured to have them voluntarily discharged in cases where no equity existed, and where that course could not be adopted has negotiated for the purchase of same in line with the margin of security.

#### THE DISCHARGED SOLDIERS SETTLEMENT AMENDMENT ACT, 1924.

The Dominion Board is now investigating Current Accounts under the provisions of the Discharged Soldiers Settlement Amendment Act, 1924, and it has been very gratifying to the Board to see by this means the effect of its decisions under the Amendment Act, 1923. It is very evident from the financial position as disclosed in the reports now coming before the Board that the soldier settlers generally have been placed in a position enabling them to make good. The great majority are now in a solvent position, and are meeting their obligations to the Department as they fall due. The opportunity is now being taken of clearing up anomalies that inevitably occur in a work of such magnitude.

This Act gives the Board power to write off or to transfer to a Suspense Account any amounts which may be shown as having no equity. That it has been necessary to write off so little (at date 0.66 per cent. only of capital invested) tends to show how the main operations of the Board have assisted the soldier settler. Practically three-fifths of the Current Accounts have been dealt with, and it is anticipated that the operations of the Dominion Revaluation Board will cease in about five months' time.

The whole work of Current Account investigation has been conducted with the help and assistance of the District Land Offices. Standard values were established over the Dominion with regard to dairy herds and stock generally. The stock was appraised throughout on the basis of its utility value as part and parcel of a proposition as a going concern. It was inevitable that the inspections and reports on individual securities would extend right through the year, and it was necessary to introduce "standard values" in order to give equal consideration to all mortgagors. The work of collecting and compiling the reports has proceeded smoothly throughout the year. The reports aim to place before the Board a complete statement of the position of each settler as between himself and the Crown, and through this the Board is able to view the whole position.

The Dominion Board desires to record its appreciation of the great assistance given by all District Offices in assisting to complete the work of investigation. The recommendations and general information supplied by each office has materially assisted in revealing the necessity for such treatment as is calculated to place each settler on a reasonably sound footing.

It is considered that the Government has reason to be satisfied with its efforts on behalf of its soldier settlers, and the Dominion may well be proud of the success of its settlement scheme generally. The men generally are determined to succeed, and there is no reason to doubt the ultimate success of

the genuine triers.

Normal and applications for revolution required

The schedules here following show the operations of the Board on the various accounts as at the 31st March, 1926. These figures, as compared with the anticipated loss of 50 per cent. on Great Britain's settlement scheme, will show the careful judgment and sound policy embodied in the effective carrying-out of the Dominion's endeavour to successfully repatriate its returned soldiers under unusual and difficult circumstances. The revaluation work has been effected without causing a general breaking-down of legitimate land-values.

J. B. Thompson, Chairman.

5 3/17

#### FINANCIAL REVIEW.

The two principal accounts controlled by the Lands Department for the repatriation of returned soldiers are the Discharged Soldiers Settlement Account, from which advances for various purposes secured by mortgages have been made, and the Lands for Settlement Account (Discharged Soldiers Settlement Account), through which the purchase of private properties for subdivision and settlement has been made.

The total capital now standing as a liability on	these t	wo accoun	ts is a	s follows :—	
Discharged Soldiers Settlement Account—				£	£
Loans raised by the issue of debentures and	other s	securities		6,535,886	
Redemptions of loans by Consolidated Fund				2,500	
Redemptions of loans by Discharged Soldiers	s Settle	ement Dep	recia-		
tion Trust Account				38,700	
Transfer from Consolidated Fund surpluses				13,500,000

Total capital	 • •	• •	 	£27,103,136

## DISCHARGED SOLDIERS SETTLEMENT ACCOUNT.

Advances authorized.—The total loans authorized since the inception of the Act amount to £22,490,303, and of this amount £282,011 was authorized during the year under review. The

following table indicates the total loans authorized from the inception of the Act and those authorized during the year:—

		from Inception f Act.	Authorized	during Year.
	Number of Returned Soldiers.	Amount authorized.	Number of Returned Soldiers.	Amount $\epsilon$ uthorized.
		£		£
Section 6, Discharged Soldiers Settlement Act, 1915—Advances on Current Account	5,017	4,863,584	99	199,991
Section 2, Discharged Soldiers Settlement Amendment Act, 1917—Advances towards purchase of farms, market gardens, orchards, and discharged mortgages	5,511	8,966,773	4	28,023
Section 2, Discharged Soldiers Settlement Act, 1917—Purchase of dwellings, &c.	11,955	8,659,946	54	53,997
Totals	22,483	22,490,303	157	282,011

In addition to the 5,017 soldiers to whom advances were made for improvements, stock, &c., 5,551 soldiers to whom loans were granted under section 2 also participate in similar loans, the total, therefore, reaching 10,411.

Curtailment of Advances.—Owing to the limited capital available in the account and the necessity that exists for conserving as much as possible of the receipts for loans to develop and stock farms, with a view to increasing production and place settlers on a sound footing, it is regretted that applications for loans to erect houses could not be considered beyond assisting a few T.B., wounded, and other disabled men.

At no time has the Department been unable to accept applications for advances on Current Account to assist in the purchase of stock or for effecting improvements to farms with a view to ultimately increasing production. It has, however, only just been possible to keep pace with these applications, as will be demonstrated by the fact that the cash balance in the account at the end of the year was only £115,000, which is already fully committed.

Current Account Advances.—Loans under this heading are granted to assist in the improvement and stocking of farms, and at the end of the year the balance outstanding was £3,042,786. As indicated last year, it was considered that the time had arrived when Current Account loans for improvements should be transferred to table mortgages in order to provide for the gradual redemption thereof, and although little has been done in this direction an effort is now being made to place development loans on a more satisfactory footing.

The time is rapidly approaching when the bulk of those settlers who have been and are still being assisted on Current Account should be in a position to carry on without further financial assistance. The Department does not aim at finding the whole of the capital required to fully develop farms. With thrift and economy the undeveloped portions of a number of farms should be improved gradually out of the farm revenues, thereby building up a better future than would be the case with everything encumbered. Prior to the advent of the Discharged Soldiers Settlement Act settlement had gone along these lines, and equities had been created by settlers, making their ultimate success more assured. More attention should be given to maintaining the areas now in grass rather than ambitious efforts to bring in large areas beyond the finance that is available to fully develop, fence, and stock same. Increase in the pasture area should be brought about gradually once sufficient pasture to carry on with has been established.

Dwellings.—As previously stated, applications for assistance under this heading are now only being accepted from badly wounded or T.B. men. The number of loans authorized during the year was-Number of loans, 54; amount authorized, £53,997.

From the inception of the Discharged Soldiers Settlement Act to the end of the year the amount provided for the housing of Discharged Soldiers on urban, suburban, and rural lands was as follows—

•			Number.	Amount. £
Erection of dwellings on farms	 	 	4,856	1,495,648
Urban and suburban—				
Erection of dwellings	 	 	4,420	3,723,074
Purchase of dwellings	 	 	7,535	4,936,872
			,	£ $10,155,594$

## SETTLERS PROSPECTS.

Now that settlers have had the benefit of revaluation of their properties by the Dominion Revaluation Board it is considered that they should be in a position to withstand any temporary depressions which might eventuate, and with reasonably stable prices the Department expects prompt payment of accruing charges. Current Accounts are at present under review by the Dominion Revaluation Board in accordance with the Discharged Soldiers Settlement Amendment Act, 1924, and when this task is completed settlers as a whole should have little cause for complaint.

#### Receipts and Payments.

The Receipts and Payments Account shows that the total receipts for the year amounted to £1,629,763, which constitutes a record. Of this amount, £940,596 represents repayments of principal by mortgagors and capital derived from the sale of abandoned properties and stock, while £689,167 represents receipts on account of interest and sundries. The average monthly receipts amounted to £135,813, as against £134,188 during the previous year. The following statement shows the position as compared with previous years:—

	1921-22.	1922-23.	1923-24.	1924-25.	1925-26.
	£	£	£	£	£
Principal	 553,345	716,667	795,841	882,977	940,596
Interest, &c	 556,301	649,463	627,921	726,674	689,167

Cash advances on Current Account during the year show an increase of approximately £20,000 over the previous year, but this is in a large measure due to the fact that the Department has had greater control over the proceeds from farms during the past year, and to a large extent the advances represent readvances from sales of stock and other farm proceeds for the payment of rent and interest charges and for development of the properties.

The following table furnishes a comparison of cash advances made for each of the past four years:—

* ''	Yea	г.	Current Account.	Farms.	Dwellings.	Total.
			£	£	£	£
1922-23		, .	 681,623	74,345	469,785	1,225,753
1923 -24			 583,633	41,727	571,727	1,196,521
1924 - 25			 567,748	32,552	92.439	692,709
1925-26			 588,412	35,965	61.245	685.622

#### Revenue Account.

The total income of the account for the year was £871,110, mainly made up of accrued interest on advances. The year's operations resulted in a net loss of £371,986, and the total loss on the Discharged Soldiers Settlement Account to the end of the year is £781,208. A perusal of the Revenue Account will show that the accrued interest on advances was insufficient to meet the interest on debentures, there being a deficit of approximately £45,000. The reason for this is not far to seek. The Dominion Revaluation Board reduced mortgages by £767,928, which is a dead loss to the account. Furthermore, the properties which have been bought in by the Crown through the exercise of power of sale and those in course of realization appear in the balance-sheet at not less than £1,492,955, and this asset also results in a large loss of interest. It therefore follows that the Department, while it must pay interest on the total capital borrowed, is in the unfortunate position of not being able to collect interest on capital to the extent of £2,260,883. This more than explains the deficiency in interest. Added to the above, the Revenue Account bears a charge for management expenses amounting to £38,768; rebates, £42,940; charges and expenses of raising loans, £11,782; and losses on the realization of securities, £250,841. When the whole of the adjustments arising out of the decisions of the Dominion Revaluation Board have been finalized in the books of the Department and the total loss definitely ascertained it will doubtless be possible to relieve the Discharged Soldiers Settlement Account of the necessity for paying interest on the capital loss to the account. This will be taken up with the Treasury.

It seems inevitable that losses should have resulted on the repatriation of discharged soldiers, and while it is unfortunate that the losses are so high it is submitted that the position in New Zealand compares more than favourably with the experience of other countries where the repatriation of discharged soldiers was undertaken on a large scale.

#### Arrears and Postponements.

The total amount of rent, interest, and instalment of principal in arrear was £526,178, while rents and instalments of interest and principal the payment of which has been postponed was £279,137. The total outstanding may therefore be set down as being £805,315. Following on adjustments granted by the Dominion Revaluation Board, it was expected that the arrears would have been much less, but the long winter, followed by short spring and summer seasons, adversely affected the returns in some of the districts. However, a large number of settlers should have been in a position to pay their way or at least substantially reduce their arrears. An investigation of these cases is being made with a view to deciding whether the accounts should be wound up. It may here be remarked that the postponements granted by the Dominion Revaluation Board will result in a considerable loss to the State, as had the money been paid on due date it could have been invested and in turn have become revenue-bearing.

## Property Account and Realization Account.

The liabilities on properties acquired by the Crown through the exercise of power of sale now stand at £993,353, representing an increase in the previous year's figures of £43,839, while the liabilities on properties in course of realization stand at £499,602. A special effort has been made

by the Department to dispose of all unoccupied properties, and a large number of sales have been completed during the year. The following shows the farms disposed of by way of sale and lease:—

				Sale.	Leases.
Number of farms	 	 		$\sim 276$	104
Area (acres)	 	 		91,737	39,493
Purchase price	 	 		£442,414	
Annual rental	 	 	٠		£5.930

The loss on the realization of these properties amounted to £230,808 inclusive of expenses of realization and arrears of interest. The position at the end of the year is that the Department had available for disposal 677 freehold and leasehold farms, totalling 240,416 acres, on which the liabilities amount to £1,171,767. It is anticipated that there will be a considerable further loss from the sale of these properties, but every effort will be made by the Department to dispose of the properties to the best advantage with a minimum of delay. With this end in view attractive terms will be offered. The Department has found it necessary in many cases during the past year to give exemption from interest for varying periods up to three years to enable purchasers to recondition abandoned farms which have deteriorated either during the period they were held by the previous occupier or during the period they were vacant. This is a further cause of loss to the account, but the concession is one which is absolutely necessary if properties are to be brought back into a state of productivity. Although the book debts in connection with farms taken over by the Department show a slight increase in the figures of the previous year, it must be remembered that greater activity has been shown by the various Commissioners in winding up unprofitable loan transactions than hitherto. Where it is abundantly clear no good purpose is served by continuing these accounts, it is better to wind them up and have the properties open for reselection by suitable settlers at fair prices. Unfortunately, a number of properties suitable only for sheep-farming have been cut up into areas too small for this purpose, with the result that dairying has been attempted with small success. Upon these properties coming back to the Department an effort is made to regroup them to permit of their more ready disposal.

#### LAND FOR SETTLEMENTS ACCOUNT.

The amount raised to finance the purchase of land for settlement by returned soldiers through the above account is £3,222,050, but the actual capital value of land appearing in the balance-sheet is now £2,035,107. Values have been reduced by the Dominion Board by £866,796.

#### Revenue Account.

It is regretted that the position of this account is also unsatisfactory. As stated above, the capital value of the land is considerably less than the total capital raised for the purpose of the account, and it naturally follows that the account revenue in the account is insufficient to meet the interest of loans.

#### LANDS PROCLAIMED.

Some 7,477 acres were set apart for selection by discharged soldiers during the year. From the inception of the scheme to the 31st March, 1926, a total area of 1,419,817 acres has been proclaimed for soldier settlement. This area is made up as follows:—

Class of Land.				Area (Acres).
Ordinary Crown lands	 		 	593,225
Cheviot Estate land	 		 	3,356
Land-for-settlements land	 	, ,	 	392,238
National-endowment land	 		 	430,998
${\rm Total} \qquad$	 `		 	1,419,817

Proclamations have been issued revoking the setting-apart of 202,044 acres of Crown lands, and 84,165 acres of land-for-settlement lands.

## APPLICATIONS FOR LAND.

Applications for land under the Discharged Soldiers Settlement Act to the number of 109 were received during the year. The following table gives the number of applications and the area allotted during each year from the inception of the soldier-settlement scheme:—

				İ	Applications	Allotm	ents made.
		Year en	ding		received.	Number.	Area.

## APPENDIX

## REPORTS OF COMMISSIONERS OF CROWN LANDS.

#### NORTH AUCKLAND.

(H. J. Lowe, Commissioner of Crown Lands.)

The relief afforded by the revaluation of soldiers' farms under the Discharged Soldiers Settlement Amendment Act, 1923, has been followed up by revaluation of Current Accounts for advances for stock, implements, and improvements. The work has not yet been completed, it necessarily being a slow process, involving as it does individual valuations. It is hoped that on completion of this investigation values will have been reduced in keeping with the producing-capacities of the farms, and the average soldier farmer afforded such relief as will enable him to meet his future obligations and assure him an adequate competence.

Very few applications have been made by discharged soldiers for land, thus showing that the work of repatriation is practically complete. Land previously proclaimed and set aside for discharged

soldiers is now being made available for general selection.

In comparison with the average civilian farmer, the soldier is more than holding his own and proving a good husbandman. Sufficient time has not yet elapsed to determine the measure of success

attendant on the relief afforded by the revaluation.

Applications under the Discharged Soldiers Settlement Act.—Except in the case of permanently disabled soldiers, no advances have been made for the erection of dwellings. The total number of applications received was 958, of which 716 were recommended for approval, as follows: Purchase of farms, 18; transfer of farms, 32; postponements, 287; erection of houses, including additional advances, 37; transfer of houses, 159; advances on Current Account, 183.

The total amount recommended on Current Account was £28,890.

Up to date the number of dwellings abandoned totals 70, of which 56 have been disposed of, the sum of £350 having been written off. The remaining 14 houses are let at good rentals sufficient to meet

interest and all other charges.

Farms.—Sixty-one farms were abandoned during the year, and forty were disposed of. Every endeavour is being made to get these farms occupied, as deterioration is rapidly taking place. A progressive policy has been instituted, and liberal terms are being offered in order to ensure occupation and production.

#### AUCKLAND.

## (K. M. GRAHAM, Commissioner of Crown Lands.)

A general review of the position of the discharged soldiers settlement in this district shows that steady development and progress has taken place, and indicates that with added experience, and with the maintenance of fair market prices for produce, success is assured or in sight for the majority of settlers, who are diligently applying themselves to the work of improving not only their holdings, but also the class of stock being carried.

The benefits directly attributable to the revaluation of holdings and to the granting of concessions by way of remissions or postponements of rent and interest are becoming more apparent as time passes, and it is confidently expected that the additional assistance granted to many settlers during the year by way of further advances on Current Account will enable them to carry out productive improvements to the extent of placing them in a position to meet their commitments to the Department as

these in future become due.

During the year the investigation of Current Accounts has been continued by the Field Inspectors, and it has been found that with very few exceptions the security in stock and chattels has been fairly well maintained. In many instances a surplus in stock has made up for the fall in values since the original purchases were made. Securities in stock, especially dairy cows, are always more or less of a fluctuating nature, and are largely dependent on the attention and skill of the settler in looking after the animals in his charge. The lack of proper care and attention has in many cases been responsible for the Department's losses in the past, but with the elimination of the careless or indifferent settler there will not in the future be the same proportion of loss due to this cause.

The number of Current Accounts in operation is 1,147, and the several amounts of loans and advances outstanding at the end of the year were as follows: Instalment mortgages on farms, £942,728;

instalment mortgages on dwellings, £435,471; Current Account advances, £724,244.

#### GISBORNE:

## (E. H. FARNIE, Commissioner of Crown Lands.)

General Remarks.—As anticipated last year, the soldier settlers in this district have now settled down as the result of revaluations, and are, in the majority of cases, doing well. In some instances the Board has found it necessary to take drastic action with regard to the non-payment of rent, but in no case has it been necessary to go to the length of absolute forfeiture. Investigation of Current Accounts by the Dominion Board showed that the Department's securities in this respect were quite sound. Only in two instances was it found necessary to effect any reduction. Four holdings in the Opotiki County held by discharged soldiers reverted to the Crown during the year as the result of the inability of the holders to carry on on what is known as "deteriorated lands." The position of these four men was hopeless, and they wisely decided to cut their losses and abandon their farms. Stockvalues showed a marked falling-off through the drought, but those settlers who are able to hold their stock should do very well next year. Speaking generally, the various settlements are in quite a prosperous position, and the outlook of the soldier settlers is distinctly hopeful.

#### HAWKE'S BAY.

## (J. D. THOMSON, Commissioner of Crown Lands.)

The sharp contrast in prices of wool and fat stock for this season as compared with the phenomenally high prices for last season has been strongly reflected in the present financial position of the soldier settler, and much of the good work done by the Dominion Revaluation Board has been nullified for the present, though as a matter of fact the prices realized for wool—which averaged over 11d. per pound—and for stock have been far from famine prices and have not seriously affected the older and better-established settlers.

The dairy-farmer has passed through a particularly trying season—cold rains and high drying winds set in during August and continued practically throughout the season, with the natural result of a reduced output and the stock in low condition to face the coming winter.

The one class of settler to be congratulated on having a good season is the orchardist. Costs of labour and spraying have been at a minimum, while the yield has been heavy and the prices good.

A recompense for the ill effects of the dry season on stock and pasture has been the opportunity presented to clean up dirty areas on the holdings, and a number of the settlers have taken full advantage of the chance to do so.

The great benefits derivable from top-dressing with suitable manures are now fully realized by an ever-increasing number of settlers, and it is confidently expected that increased productivity of the soil may be looked for in the future, particularly in the pumiceous areas of the northern portion of the district.

No new areas were acquired for settlement, but a number of abandoned farms have been disposed of, and during the coming year it is anticipated that this unpleasant feature in connection with the discharged soldier settlement will soon disappear.

## TARANAKI.

#### (W. D. Armit, Commissioner of Crown Lands.)

The soldier settlers in common with the general farming community have experienced an uncertain year, and returns generally show a decrease from the previous season.

The dairymen experienced a cold, wet spring, and factory returns were a month later coming in as compared with the year preceding. The drop in wool-prices has required a sympathetic administration of Current Accounts where securities are represented in sheep. A number of soldier settlers have been compelled to draw on capital, but as the sheep securities are more or less in a healthy condition the position is expected to right itself during the coming season, provided a normal year is experienced by graziers. Generally the grazier in Taranaki, whether soldier or civilian, is faced with the problem of deterioration, and the administration of the recent legislation will have a large bearing on the success or failure of the hill-country farmer in this district.

Owing to the Dominion Revaluation Board's determinations a number of deserving soldier settlers have been put on a satisfactory financial position and given a reasonably clear start. The concessions in many cases have been generous, and it is incumbent on soldier mortgagors to realize their obligations to the State if they desire to remain on the holdings.

Abandoned properties present a constant problem in the district. Invariably the properties have been neglected prior to foreclosure or abandonment, and it has been necessary to write the charges down with concessions under the new mortgages to secure fresh purchasers. The Department has been fairly successful in securing purchasers for these properties. The number of farms abandoned or bought in under the powers of sale in the Crown mortgage during the past year is forty-five, and sixty-four farms have been sold.

At present there are 457 soldiers on farms, who have received advances for their purchase under section 2 of the Discharged Soldiers Settlement Amendment Act, 1917, and a further 529 have obtained assistance for the purchase or erection of house properties.

The total amount outstanding on mortgage, including Current Account advances, is £1,341,098.

During the past year the total revenue received was £176,560 11s. 1d., and moneys advanced amounted to £88,048. Arrears of interest and instalments are still fairly considerable, but in the

majority of cases a commendable effort is being made by the men to reduce their liabilities. The total amounts owing are as follows: Farm properties, £19,055 7s. 6d.; house properties, £1,826 17s. 1d.; Current Account interest, £7,498 5s. 11d.

There is an increasing number of soldier house-property transfers coming up for the Land Board's consideration each year, partly brought about through changed conditions in the mortgagors' employment. There are still a number of these house-property owners in arrears, but a determined effort is being made to reduce the amounts owing and to get rid of unsatisfactory mortgagors.

#### WELLINGTON.

## (H. W. C. Mackintosh, Commissioner of Crown Lands.)

The remarks made in connection with the aspects of general settlement apply equally to soldier settlers. These men met with the same conditions climatically as their fellow civilian farmers, and they experienced the same instability of prices for farm-produce, &c. The soldier settler is better off, however, in that he has had the benefit of advances and remissions made by the Department, whereas his civilian colleague has been thrown on his own resources.

Dairy-farmers began the season under cold and wet conditions, which hindered growth of pastures, and consequently curtailed the milk-supply. The latter part of the season was more equable, and good cheques were received.

Sheep and cattle did not come up to expectation, the markets being very unsteady. Wool averaged about 1s. per pound, and although this was only half of the price realized in the previous season the price was a payable one where the fleece was well grown.

Those soldiers who elected to go in for poultry-farming for a livelihood have, except in isolated cases, not been successful. The high cost of laying-birds and the almost prohibitive price of fowl-feed reduce the profits to practically nil. It would appear that the poultry-farmer should grow his own feed; but then, again, if the land will grow wheat it is too valuable for poultry-farming. This class of security is not regarded with favour by the Department.

Soldier settlers will be beginning to feel the benefit of the concessions granted by the Dominion Revaluation Board, and when their Current Accounts have been investigated by that Board they should be on the high road to success.

The receipts for the year, interest and principal, amounted to £309,240, somewhat less than last year.

year.

The amount of loans and advances outstanding at the 31st March, 1926, was—Instalment mortgages on farms, £1,007,440; instalment mortgages on dwellings, £1,441,088; Current Account advances, £534,886; miscellaneous accounts, £348,039 3s. 3d.

## NELSON.

#### (A. F. Waters, Commissioner of Crown Lands.)

The Dominion Revaluation Board completed the investigation of the Current Account advances of most of the soldier settlers in the district during the past year, and this together with revaluation of the properties has placed most of the settlers on a sound financial basis. The exceptions are chiefly those whose farms on account of their limited carrying-capacity are unable to maintain a settler and enable him also to meet his liabilities.

There are still a few settlers who show little capacity for farming and whose properties have depreciated under their management. These farms are gradually coming back into the hands of the Department, and are being disposed of to other settlers.

A promising feature is the effort that is being made by the soldier settlers who are dairying to improve their herds and increase their output by the introduction of pedigree stock. A good deal could still be done to improve the class of sheep in the Nelson District, as too many of the settlers seem to be satisfied with a wool-clip of 5 lb. per sheep or less.

The fruitgrowers have had a phenomenal crop; but as the bulk of the fruit is being exported it remains to be seen if the Home market will be glutted and prices suffer accordingly.

The hopgrowers have been in an unsatisfactory position for several years past; but a Co-operative Hopgrowers' Association has been formed whereby the growers are entitled to put 60 per cent. of their previous years' output into a first pool. The benefit of this policy is still to be proved.

## MARLBOROUGH.

## (J. Stevenson, Commissioner of Crown Lands.)

Soldier Settlement.—Generally, I am pleased to report in a more hopeful strain than last year. The improved position is directly traceable to the liberal concessions in valuations and adjustments of Current Accounts made by the Dominion Revaluation Board.

Regarding those settlers engaged in dairying: Following the concessions made by the Dominion Revaluation Board, and with the object of assisting the settler to meet his payments of rent and interest to the Department on due dates so that he would get all the benefit of rebates for prompt payment, a system of taking milk orders up to 50 per cent. on the dairyman's milk-yield was adopted in this district. This has worked admirably in the interests of both the settler and the

15  $C_{*}-9.$ 

Department, and, I think I am safe in saying, has resulted in the Department getting in better returns than formerly, and the settlers generally appreciate this method.

Several of the weaker men who had got into a hopeless position have abandoned their farms.

On the soldier settlements—Erina, Goat Hills, Moorlands, Alberton, Linkwaterdale, &c.—the progress is slow, but generally the type of settler left is good, and I feel sure that the men will eventually become satisfactorily established.

#### WESTLAND.

## (W. T. Morpeth, Commissioner of Crown Lands.)

The position generally with regard to soldier settlement in this district is satisfactory, the operations of the Revaluation Board having to a large extent permanently stabilized the soldier settlers' finances. There are only one or two cases which still occasion some concern, and it is noteworthy that almost without exception the settlers who have given the Department the most trouble have been single men engaged in dairying. The great majority of married men have won through, and cases of partnerships between single men have also been successful, which goes to prove that it is a mistake for a single man to take on a dairy proposition unless conditions as regards soil, herd, position, &c., are exceptionally good, or unless he has private finance available, and it seems clear that remissions and postponements which are satisfactory in the case of a family man are not sufficient where a single man is concerned. There are only four abandoned places not disposed of, but I regard these as almost unsaleable. The undesirable class of settler has been eliminated, and those who are on the Department's books are almost without exception men of a good stamp who in the ordinary course of events will come out all right and meet their obligations to the Crown.

#### CANTERBURY.

#### (W. Stewart, Commissioner of Crown Lands.)

The concessions given soldier settlers by the Dominion Revaluation Board have given them a fair chance of making a decent living, and it is now felt that it rests with the individual settlers themselves to make a success of their undertakings. There are still some cases where second mortgagees are preventing soldiers from recovering by persisting in holding valueless mortgages which overload the land beyond its interest-earning-capacity; but these are gradually being eliminated by sales through the Registrar of the Court. There are also a few cases where soldiers who are being financed for stock by private firms are not clearing enough to pay both the firm and the Crown.

There has been an insistent call for tractors to replace horse teams, as thereby an added area of usually about 30 acres per farm is freed to produce something for export; and also in a delayed season like the present the work could have been rushed through so much quicker and fuller advantage taken of each suitable occasion to push work ahead. In dealing with these applications due weight has been given to the fact that a tractor is a rapidly depreciating security, especially in unskilful or careless hands, and that the running-expenses of a tractor means finding actual cash, whereas with the horses their upkeep is supplied on the farm and does not mean additional imports. only cases where the purchase has been sanctioned are where there was sufficient heavy work to justify the expenditure, and where the applicant was substantial enough to supply a fair proportion of the original and recurring expenses himself.

The total receipts during the year for credit of the Discharged Soldiers Settlement Account were £265,584 14s. 4d., an increase of £25,692 11s. 10d. on the preceding year, the main items being made

up of — Payment on account of farms, £57,611 5s. 4d.; payments on account of houses, £106,375 14s. 6d.; payments on account of Current Account, £88,580 18s. 5d.

The amount of loans outstanding at the end of the year was as follows: Instalment mortgages (farms), £987,633; instalment mortgages (dwellings), £1,113,311; Current Account advances, £242,291.

#### OTAGO.

## (R. S. Galbratth, Commissioner of Crown Lands.)

The soldier settlers throughout the district may now be said, speaking generally, to be in a fairly sound position. The concessions made to them by way of revaluations, adjustments, remissions, and postponements have been of very real benefit and have put fresh heart into many men who were struggling bravely with impossible propositions. There are still some who will require careful watching and, possibly, further help. A difficult type to deal with is the man who works hard with his hands but lacks understanding—the man who is an excellent servant but appears to require some one to lean on. The recent ballot for the Wilden runs attracted fewer applicants than the Mount Pisa and Teviot runs, and I think it can now be said that there is no longer any need to offer any land for selection by discharged soldiers only.

### SOUTHLAND.

### (N. C. Kensington, Commissioner of Crown Lands.)

During the year soldier settlers have met with good firm prices for their products, and the prices obtained have been generally of higher value than the basis of production for the individual farm when investigated for the purpose of revaluation.

Since the revaluation of soldiers' holdings the soldier settlers generally have become more settled and are taking a good lively interest in bettering their position by close attention to good farming. The recent investigation of Current Accounts may be regarded as very satisfactory, showing in most cases that the advances on stock and chattels have been well secured. The position of soldier settlers in this district can be regarded as sound as a whole. There are still individual cases where either the holding is too small or the land, even with the best of farming, is of such quality that a reasonable living cannot be made off it. In these cases the settler is encouraged to endeavour to effect a transfer or sale to an adjoining owner. Cases also occur where the soldier settler has not had the incentive or required energy to make a success of his holding; but these cases are now becoming the exception to the rule and can only be taken as the usual risk incurred by all mortgagees. The records here show that very few farms which have come back on to the Department's hands in this district have not been reselected, and in this respect I do not suffer any concern at not being able to pass on any reasonably priced farms which are bound to occasionally revert back. These farms when put on the market offer an inducement on account of the easy terms offered, equal to land acquired under the Land for Settlements Act, and which usually require a large initial outlay in buildings, fencing, &c. A large amount of money has still to be expended and will require to be advanced for improving holdings and bringing them up to their full carrying-capacity. It is very marked that soldier settlers, having now received the benefit of revaluation, are not anxious to load up their farms, and governed by this spirit the necessary advances now made can be viewed as good investments.

In all settlements bought under the Land for Settlements Act and set apart for soldier settlement

good progress is reported, and these settlements can now be considered as on a firm footing.

Note.—The numbers above represent the number of loans authorized. A large proportion of soldiers who received advances to assist in the purchase of farms and discharge of mortgages also received advances on current account for stock, &c. The actual number of soldiers to whom advances have been authorized as at the 31st March, 1926, was 22,483.
