# GOVERNMENT RAILWAYS BOARD

(REPORT BY THE).

Laid before Parliament pursuant to Section 21 of the Government Railways Amendment Act, 1931.

## ANNUAL REPORT OF THE GOVERNMENT RAILWAYS BOARD.

The Right Hon. the Minister of Railways.

New Zealand Government Railways,

Wellington, 27th July, 1934.

Pursuant to the provision of section 21 of the Government Railways Amendment Act, 1931, the Government Railways Board transmits herewith the accounts of the Working Railways Department for the financial year ended 31st March, 1934, and, in doing so, desires to submit the following

report on the working of the Department for the year:—

For the first year since 1929 an increase in gross revenue has been recorded in comparison with the previous year. The total revenue actually exceeded the estimate made in the Board's previous report

The revenue for the year was £6,332,711, as compared with £6,034,403 in the previous year, an increase of £298,308 (4.94 per cent.). The expenditure increased from £5,183,859 last year to £5,247,153 this year, an increase of £63,294 (1.22 per cent.).

The net revenue was £1,085,558, as compared with £850,544 for the previous year, an increase of £235,014. The net revenue has increased progressively over the last three years to an aggregate extent of £396,831, equal to 57.62 per cent., but whereas in the two previous years the improvement in the net revenue was secured solely by reductions in expenditure, this year it is the result of increased revenue. The Board regards this as a satisfactory feature of the year's operations.

Further comments on the finances of the Department will be made later in this report under appropriate headings.

## CO-ORDINATION OF RAIL AND ROAD TRANSPORT.

#### Passenger-services.

The Transport Licensing Act, 1931, is now in its third year of operation, for licensing purposes, with respect to road passenger-services. As mentioned in the last report of the Board the licensing for the first year (1932–1933) was largely an automatic process. In the second licensing year (1933–1934) licensees desiring renewals of their licenses were required by the Act to show sufficient justification for the continued running of their services. Some measure of stabilization in the industry was achieved during the second year, but the degree of regulation varied according to the particular ideas on the subject of transport held by the various Licensing Authorities. Following the procedure mentioned in its last report, the Board continued the policy of being represented at the public hearings of the Licensing Authorities in order that full information regarding railway and co-ordinated services might be placed before the Authorities to enable them to give proper consideration to the matters which the Act provides that they should take into account. The Act makes express provision for the submission of evidence and representations by the Government Railways Board and local bodies, and also gives to the Board a right of appeal against the decisions of the Licensing Authorities. The Board found it necessary in the public interest to appeal against a number of the decisions given. In these cases the Board was definitely of opinion that the decisions of the Licensing Authorities were opposed to the best interests

D.—2.

of the Dominion and the Board was seeking to assist in the formulation of principles for application to given classes of cases. The licensing of passenger-services for the third year (1934–1935) has now been completed in the North Island, and will shortly be completed in the South Island. With the progress of the work of the Licensing Authorities the Board is able more definitely to know its position with respect to road competition for passenger traffic and, having regard to the decisions of the Licensing Authorities and the Transport Appeal and Co-ordination Boards, may require to adjust its business in such manner as may be deemed advisable in the public interest.

Recently the Board decided to purchase the passenger-service business that was being carried on between Wanganui and Wellington by S.O.S. Motors, Ltd. The granting of the license to the vendor company has, however, been challenged, and the completion of the purchase and the transfer of the license has, therefore, been held in suspense pending the result of the litigation. The Board believes that in co-ordination with the railway services it will be able to provide upon a sound economic basis

an efficient service of high standard.

The policy of the Board in connection with the operation by it of road services is founded on what it conceives, after a careful examination of all the facts in each case, to be the best thing to be done in the general interest. The Board has not in contemplation any plan of extensive road operations. When it appears that the public interest will be best conserved by the Board undertaking road services in conjunction with its railway operations, the Board feels that there is no inherent reason why it should not do so. In New Zealand there is ample precedent for the Railway Department operating road services. Hitherto its activities have been confined more particularly to bus operations and to operations in connection with the collection and delivery of goods and parcels traffic. The difference is, however, more one of degree than kind, and with changing conditions fresh methods are required, and fields of action may require to be extended. The Board believes that the Railways Department is capable of affording a service that will be of an entirely satisfactory nature so far as the various districts served by its road service are concerned, and its operation of the road services which it has undertaken will enable it to bring about a co-ordination between those services and the railways which will be more effective and achieved with less friction than could have been the case with separate ownership of the railway and road services.

Another co-ordination measure put into effect by the Board during the year was the institution of an omnibus service in the South Island, between Edievale and Waipahi, in place of the passenger-service given on the Tapanui Branch by mixed trains. As a result, it has been possible to effect considerable economies in working rail traffic on the line, while the omnibus service is already almost self-supporting. This omnibus service makes connections with the express trains operating between Dunedin and Invercargill, and provides a better service for passengers, mails, and parcels

than was possible by the former mixed train service.

## Goods-Services.

As in the case of the licensing of passenger-services, provision was made by the Transport Goods Order, 1933–34 (by which the Transport Licensing Act, 1931, was applied to goods-services), for the granting of licenses automatically to operators who were carrying on the services in respect of which they sought licenses at the passing of the Act (11th November, 1931), and the majority of the licenses granted during the first licensing year (1933-1934) were of the automatic class.

Officers of the Railways Department represented the Board at the public sittings of the various Licensing Authorities when applications for goods-service licenses were being considered and gave evidence regarding the services provided by the railways and co-ordinated carriers for the carriage of

goods and live-stock and the charges made for the carriage thereof.

Applications for the renewal of licenses granted last year are now being heard by the Licensing Authorities, and the Board is opposing the running of long-distance goods-services which it believes to be operating in wasteful competition with the railways. The railways are faced with intensive competition for general merchandise—the more payable traffic—in every part of the Dominion. The effect of this competition upon the financial position is such that unless the position is rectified through the operation of the Transport Licensing Act the Board will be compelled to consider making some radical changes in its rating system in districts most seriously affected.

The significance of this fact is a matter that the Board desires to emphasize. The Board has stressed on previous occasions, particularly in connection with branch lines, that the decisions of the Licensing Authorities would have an important bearing on the Board's ultimate policy regarding the operation of some of these lines. Hence, pending consideration of the operation of road motor services by the Licensing Authorities, the Board has deferred taking any drastic action either to curtail services

or alter charges in these cases.

The Board is bound to accept the decisions of the Licensing Authorities, and if a decision is given to license road motors in competition with a railway service, which experience has proved cannot be operated on a payable basis having regard to the traffic offering from the district served, the Board can only interpret the decision as meaning that road transport and not rail transport will best meet the needs of the district in question. In such circumstances the Board would feel compelled to give serious consideration to the position thereby created. It is charged by its constitution to work the railways economically and to eliminate wasteful expenditure; and there can be no justification for continuing to meet operating losses out of the public purse on any railway-line which is not essential to the transport needs of the district which it was built to serve. It must be obvious, therefore, that the decision of the Licensing Authority in each case carries with it a responsibility regarding the transport needs of the district and the consequent adjustment of services other than the road services to an economic basis, having regard to the decision of the Authority.

#### COASTAL SHIPPING.

During the year representations were made to the Board by delegations representing the shipping and harbour interests. These representations took the form of protests against competition by the railways with coastwise shipping and the consequent adverse effect on Harbour Board revenues. Almost invariably the statement was made that the railways were competing at uneconomic rates.

With regard to the broad question of competition, those making the representations were unable to suggest any formula to relieve the position. It was obviously impossible to lay down categorically that the railways should not under any circumstances compete for traffic with coastwise shipping. Indeed, such a formula could not be effective, for the simple reason that it would ignore two very vital factors in the situation—namely, the development of road services, and the construction and operation of new railways through districts where coastwise shipping formerly had a virtual monopoly of the business of the district.

A conference was held between representatives from the Railways Department and the harbour and shipping interests, for the purpose of generally reviewing the position and, in particular, examining

rates that were alleged to be uneconomic.

The Board made it clear that it had no intention of charging uneconomic rates, and obviously it has no incentive to do so. Very little was gained from the conference, for, in the judgment of the Board, it was not established that the railway rates were uneconomic. The Board is sympathetic to the interests of the harbour and shipping authorities with whom it is desirous of co-operating to the fullest practicable degree. Competition between railways and coastal shipping services is by no means new. It has existed practically since railways commenced to operate in New Zealand. The competition has, however, undoubtedly developed in intensity during recent years. This has not, as in some quarters appears to be supposed, been due to a policy of aggression on the part of the railway authorities directed against coastal shipping, but has been due to circumstances over which the Railways Board has had no control and of which it has been a victim probably as much as the coastal services. In every case regarding which complaint has been made the Board's policy was dictated by the obligations resting upon it in connection with the effective working of the railways. It is unfortunate that an almost phenomenal development of transport facilities has synchronized with the depression in trade and industry and a consequent substantial diminution in the quantum of transport work available. These two factors interacting have created difficulties not only for coastwise services, but also for the other services engaged in the transport industry.

#### FINANCIAL.

On the 31st March, 1934, the capital invested in lines open for traffic, including the steamers and plant on Lake Wakatipu and other subsidiary services, was £53,909,347, as compared with £51,480,949 on 31st March, 1933, an increase of £2,428,398.

The taking-over from the Public Works Department of the Tahora-Okahukura Section, the final link in the Stratford-Main Trunk Railway, was mainly responsible for the increase, the

capital cost of this section being £2,311,821.

The only other capital expenditure incurred during the year was in connection with the new terminal facilities at Wellington and the Tawa Flat deviation, and was distributed as follows: Wellington new station and yard, £53,974; Wellington-Paekakariki electrification, £9,979; Tawa Flat deviation, £55,660.

The sum of £379,351 was spent during the year out of the Depreciation Fund in replacing worn-out assets, the main items being: Locomotives, £100,645; cars and vans, £89,880; wagons,

£98,683; bridges, £47,417.

The financial results of the operations for the year ended 31st March, 1934, were as follow:—

					Year ended	Year ended	
					31st March,	31st March,	Variation.
					1934.	1933.	
					£	£	£
Gross revenue				 	6,332,711	6,034,403	+298,308
Gross expenditure				 	5,247,153	5,183,859	+63,294
Net revenue				 	1,085,558	850,544	+235,014
Interest charges				 	2,282,365	2,230,655	+51,710
Excess of interest ch	arges ov	ver net re	venue	 	1,196,807	1,380,111	-183,304

The gross earnings for the year were £6,332,711, an increase of £298,308 (4.94 per cent.), compared with the previous year and a decrease of £1,238,826 (16.36 per cent.), compared with the year ended 31st March, 1931.

The gross expenditure totalled £5,247,153, an increase of £63,294 (1.22 per cent.) over the previous year's figures and a decrease of £1,635,657 (23.76 per cent.) compared with the year ended 31st March, 1931.

Interest charges totalled £2,282,365, an increase of £51,710 compared with the previous year. This increase principally was due to the taking-over of the Tahora-Okahukura Section of the Stratford - Main Trunk Railway.

## Renewals, Depreciation, and Equalization Accounts.

During the year the sum of £229,203 was charged against revenue for renewals, and the amount expended from this fund for electric equipment, overhead lines, and track renewals was £134,220. The credit balance at 31st March, 1934, in the Renewals Fund was £660,545.

During the year the sum of £482,735 was charged against revenue on account of depreciation. The position in regard to the undermentioned equalization funds is as follows:—

	 Credit Balance broughtforward from 1933.	Contributions, 1933–34.	Expenditure, 1933-34.	Credit Balance at 31st March, 1934.
Slips, Floods, and Accidents Fund Workers' compensation	 £ 76,042 20,222 64,754  161,018	£ 19,746 33,893 14,300 67,939	£ 6,215 27,118 5,057 38,390	\$9,573 26,997 73,997 190,567

## REVENUE.

The income in respect of railway operation under the main headings, and the percentage under each heading to total income, compared with the previous two years, are as follow:—

	1934.	Per Cent. of Operating Revenue.	1933.	Per Cent. of Operating Revenue.	1932.	Per Cent. of Operating Revenue.
Passengers, ordinary Season tickets Parcels, luggage, and mails Goods	£ 1,164,731 171,603 281,889 3,911,245 99,367  5,628,835	$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$	£ 1,031,103 176,193 283,822 3,745,777 102,180 5,339,075	$   \begin{array}{c}     19 \cdot 31 \\     3 \cdot 30 \\     5 \cdot 32 \\     70 \cdot 16 \\     1 \cdot 91 \\   \end{array} $ $   \begin{array}{c}     100 \cdot 00 \end{array} $	£ 1,138,940 200,649 316,245 4,019,600 113,531 5,788,965	19·68 3·47 5·46 69·43 1·96

The earnings from passenger traffic for the year have increased by 10.69 per cent. as compared with the previous year and the earnings from goods traffic have increased by 4.42 per cent.

The operating earnings per average mile open and per train-mile are as follow:—

		Per Average	Per
		Mile open.	Train-mile.
		£	d.
1934	 	 1,704	$132 \cdot 92$
1933	 	 1,611	$130 \cdot 37$
1932	 	 1,746	$136 \cdot 63$

The railway operating receipts for the last three years (exclusive of subsidiary services) from the North and South Island Main Lines and Branches shown separately are as follow:—

:	North Islan	d Main Line an	d Branches.	South Island Main Line and Branches.			
<u></u>	1934.	1933.	1932.	1934.	1933.	1932.	
Passengers, ordinary Season tickets Parcels, luggage, and mails Goods Labour, demurrage, &c.	\$ 741,020 115,454 187,010 2,188,126 54,302 3,285,912	£ 658,006 116,731 188,098 2,085,640 59,091 3,107,566	£ 724,694 131,941 213,532 2,307,518 65,464 3,443,149	£ 412,078 53,009 89,711 1,625,376 40,651 2,220,825	£ 363,336 56,190 90,428 1,558,391 38,768 2,107,113	£ 403,922 65,108 96,591 1,593,100 41,897 2,200,618	

The operating earnings for the last three years for the North and South Island Main Lines and Branches separately per average mile open and per train-mile are as follow:—

			North Island Main	Line and Branches.	South Island Main Line and Branch			
		Year,		Per Average Mile open.	Per Train-mile.	Per Average Mile open.	Per Train-mile.	
				£	d.	$_{\mathfrak{L}}$	d.	
1934				2,235	$126\cdot 61$	1,393	$142 \cdot 49$	
1933				2,145	$124 \cdot 13$	1,296	$139 \cdot 52$	
1932				2,376	$131 \cdot 49$	1,353	143.83	

#### EXPENDITURE.

The total expenditure for the year ended 31st March, 1934, was £5,247,153, an increase of £63,294 as compared with the previous year's figures.

	1933–34. £	1932 <b>–</b> 33. ₤	1931–32. £
Expenditure on train operation	 4,877,146	4,833,754	5,301,653
Subsidiary services	 370,007	350,105	369,302
•			-
	£5,247,153	£5,183,859	£5,670,955

### Operating Expenditure.

	1933-34.	Per Cent. of Operating Revenue.	1932–33.	Per Cent. of Operating Revenue.	1931-32.	Per Cent. of Operating Revenue.
	£		£		£	
Maintenance—Way and works	993,207	$17 \cdot 65$	931,273	$17 \cdot 44$	997,629	$17 \cdot 23$
Maintenance—Signals	110,298	1.96	105,586	1.98	107,584	1.86
Maintenance—Rolling-stock	1,220,102	$21 \cdot 67$	1,188,474	$22 \cdot 26$	1,270,585	$21 \cdot 94$
Examination, lubrication, and lighting of vehicles	52,376	0.93	52,652	0.99	59,619	1.03
Transportation—Locomotive	1,012,451	17.99	1,062,149	19.89	1,195,151	$20 \cdot 64$
Transportation—Traffic	1,253,833	$22 \cdot 27$	1,255,280	$23 \cdot 51$	1,424,520	$24 \cdot 60$
General charges	58,944	1.05	61,252	1.15	69,280	1.20
Superannuation subsidy	175,935	3.13	177,088	$3 \cdot 32$	177,285	3.06
	4,877,146	86.65	4,833,754	90.54	5,301,653	91.56

## Maintenance of Way and Works.

The expenditure for the year under this heading totalled £993,207, as compared with £931,273 for the previous year, an increase of £61,934 (6.65 per cent.).

Compared with the average expenditure for the five years ended 31st March, 1930, the expenditure for the year under review represents a decrease of 12.0 per cent. The increase of £61,934 over last year's figure is due to the writing-off of abandoned assets, adjustments of capital charges, additional ballasting work, the taking-over of the last section of the Stratford-Okahukura line, repairs to tunnels, provision of additional motor-velocipedes, additional repairs to and painting of bridges and buildings, and extensions to water services.

#### Maintenance of Signals and Electrical Appliances.

The expenditure under this heading for the year totalled £110,298, an increase of £4,712 compared with the previous year.

For the five years ended 31st March, 1930, the average annual expenditure in this branch was £107,716, and the expenditure in the year under review represents an increase of 2.4 per cent., on this average figure.

Maintenance work in this branch is heavier than in past years, due to the development of automatic signalling, train-control, level-crossing alarms, &c. Telephone facilities have also been considerably extended since 1930; the mileage of telephone and telegraph wires is now 16,956, as compared with 11,920 in 1930, and the number of telephones has increased from 2,256 to 2,663 in the same period.

## Maintenance of Rolling-stock.

The expenditure under this heading totalled £1,220,102, an increase of £31,628 (2.66 per cent.) compared with the previous year. The average annual expenditure in this branch for the five years ended 31st March, 1930, was £1,460,114, and the figures for the past year represent a reduction of 16.4 per cent. on this amount.

 $\hat{\mathbf{A}}$  review under the various headings is as follows:—

Locomotive Repairs.—The expenditure on locomotive repairs amounted to £525,024, an increase of £36,839 (7.55 per cent.) compared with the previous year.

During the year 430 engines were passed through the shops, as compared with 381 in the previous

year.

The average mileage run by engines before being forwarded to the workshops for heavy repairs

1933 the mileage was 72,573. during the year was 70,159 miles. For the year ended 31st March, 1933, the mileage was 72,573.

Maintenance of Carriages, Vans, and Wagons.—The total expenditure for the repair and painting of carriages and vans was £249,055, an increase of £2,360 compared with the previous year. A total of 1,600 carriages was repaired, of which number 1,351 received heavy repairs. During the previous year 1,575 carriages were repaired, of which 1,314 received heavy repairs.

The expenditure on maintenance of wagons totalled £429,469, a decrease of £2,796 (0.65 per cent.) compared with the previous year; 19,457 wagons passed through the shops. The corresponding number in the previous year was 17,300.

#### Examination, Lubrication, and Lighting of Rolling-stock.

The expenditure on examination and lubrication of rolling-stock was £25,784, a decrease of £1,370 compared with the previous year. The decrease under this heading was due chiefly to general economy measures.

The expenditure on the lighting of coaching vehicles increased by £1,094, the principal cause

of this being additional train services.

## Locomotive Transportation.

The expenditure under this heading was £1,012,451, a decrease of £49,698 (4.68 per cent.) compared with the previous year, the decrease being principally due to the more extensive use of soft coal in the North Island.

The quantity of coal used was 361,239 tons an increase of 39,347 tons compared with the previous year. This increase is due to the fact that a larger proportion of brown coal was used during the year than in the previous year. For the year ended 31st March, 1934, the consumption of brown coals was 182,942 tons, as compared with 99,389 tons in the previous year; while the quantity of bituminous coals used decreased from 222,503 tons in 1933 to 178,297 tons in 1934. The cost of the fuel used was £441,146, representing a reduction of £46,487 on the cost of the previous year's supplies.

The following table furnishes statistical information regarding locomotive transportation:—

		1934.	1933.	1932.	1931.
Cost per engine-mile	 	17·88d.	19·25d.	20.73d.	23·31d.
Cost per train-mile	 	23·68d.	25.66d.	27.92d.	31.72d.
Cost per engine-hour	 	189·87d.	201.61d.	213.29d.	233.98d.
Cost per 1,000 gross ton-miles	 	118.66d.	133.81d.	144·16d.	160.71d.
Engine-miles per engine-hour	 	10.62	10.49	10.29	10.04
Gross ton-miles per engine-hour	 	1,600	1,507	$1,\!480$	$1,\!456$

These figures show that while a greater quantity of work per engine-hour has been obtained from the engines the cost of working the engines has actually been reduced.

Statistics of the consumption and cost of coal are as follow:

Coal.					Consun	aption.	Cost.		
Cc	0&1.				1934.	1933.	1934.	1933.	
Per engine-mile Per engine-hour Per thousand gross ton-mil		• •	••	• •	lb. 60·55 643·08 399·97	1b. 55·25 579·50 383·19	d. 7·92 84·14 52·33	d. 8 · 97 94 · 06 62 · 20	

Although the pounds of coal consumed per engine-mile increased by 5·30, or 9·59 per cent., this was due to the lower calorific value of soft coal, of which a much greater proportion was used this year. It will be noticed, however, that the cost of coal per engine-mile fell by 1.05d. or 11.71 per cent.

## Traffic Transportation.

The expenditure under this heading amounted to £1,253,833, a decrease of £1,447 (0·12 per cent.) compared with the previous year. The average annual expenditure in this Branch for the five years ended 31st March, 1930, was £1,793,396, and the expenditure for the year under review represents a reduction of 30·1 per cent. on the average figures.

Notwithstanding an increase in traffic this year as compared with last year, a reduction in expenditure was found possible by the exercise of the strictest economy.

## General Charges.

The expenditure under this heading totalled £234,879, a decrease of £3,461 compared with the previous year, due to general economies.

#### Subsidiary Services.

Subsidiary Service Revenue.—The Revenue from subsidiary services amounted to £703,876, as compared with £695,328 for the previous year, and an analysis of the figures is as follows:—

		1933–34. £	1932–33. £	1931–32. £
Lake Wakatipu steamers		 9,617	7,864	8,013
Refreshment service		 73,657	69,505	82,234
Bookstall service		 20,786	12,385	6,792
Advertising service		 32,707	33,614	39,312
Departmental dwellings		 137,238	137,575	138,725
Leases of bookstalls, &c.		 15,749	16,224	17,822
Road-motor services		 79,184	78,644	72,740
Miscellaneous	• •	 334,938	339,517	354,345
		£703,876	£695,328	£719,983

	£ 923,182 73,196	£ £ 923,182 829,836 73,196 70,131 131,136	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$

D.—2. viii

The variations in ordinary passenger traffic were distributed between first class and second class as follow:—

First Class.			Second (	llass.	Total.			
Journeys	••	••	No. -14,742	Per Cent. 3·21	No. +655,518	Per Cent. 10·23	No. +640,776	Per Cent. 9·33
Revenue			+6,145	2.73	$\pm 127,483$	15.81	+133,628	12.96

Standard-fare revenue, which represents approximately 80 per cent. of the ordinary passenger traffic, showed a continual decline from 1926 to 1933, but some improvement was shown for the year ended 31st March, 1934, when revenue returned to just below the 1932 level, principally as the result of two Easter holiday periods having fallen during 1934 as against none in 1933 and one in 1932. The revenue for 1934 showed an increase of £93,346 over 1933, but of this amount approximately £55,000 is attributable to the Easter holidays, leaving £38,346 (or 4·6 per cent.) as the increase due to additional traffic. Eliminating Easter traffic, revenue every four-weekly period of the year showed a slight rise over that of the corresponding period of 1933, the increases ranging from 2·2 to 9·5 per cent. Suburban journeys showed an increase of approximately 8 per cent. over 1933 and the same

Suburban journeys showed an increase of approximately 8 per cent. over 1933 and the same increase over 1931, but revenue, while showing an increase of 4·4 per cent. over last year, declined by 9·2 per cent. as compared with 1931. The decline from the 1931 revenue figure in face of the increased volume of traffic is due to fare concessions granted during the financial year ended 31st March, 1932, when suburban traffic reached its lowest level for the years 1926 to 1934. Revenue from this class of traffic has shown a slight improvement during the last two years, while the number of journeys in 1934 was the highest since the pre-depression year of 1930.

Revenue from day and special excursions totalled £168,353, an increase of £37,217 (28·38 per cent.) compared with the previous year. The total passenger journeys under this heading amounted to

2,033,764, an increase of 230,618 journeys compared with the previous year.

Although the prevailing economic conditions have been adverse to the development of special day and week-end excursions passenger traffic, every opportunity has been taken to promote this class of travel. In addition to catering for all classes of special events, numerous day and week-end excursions to selected resorts and between the main centres of population have been organized, the

results from which have been quite satisfactory.

The following particulars of two long-distance excursions are given as indicating the potentialities of this class of business. The first of these two outings was run from Invercargill to Christchurch on the occasion of the Ranfurly Shield Football Match, Southland v. Canterbury. Three special trains were required to accommodate the 1,118 excursionists, and the revenue amounted to £1,483. The second excursion consisted of two special trains from Christchurch to Queenstown on behalf of the Corsair Social Club, and attracted 768 passengers, giving a revenue of £1,234. The total distance travelled by rail and lake steamer was approximately 850 miles. The time occupied in travelling was about thirty-three hours, and the transport arrangements allowed the excursionists one complete day

at Queenstown.

The widespread public interest in the Waitangi celebrations occasioned the travel of a large number of people to Opua en route to Waitangi. In all, a total of 4,218 passengers (principally Maoris) were conveyed by special and ordinary trains from various parts of the North Island. Everything possible was done to facilitate the transport of the visitors, and appreciative reference was made to the efficient manner in which this big undertaking was carried out by the Department.

The policy of issuing tickets at cheap fares for Saturday-to-Monday travel in certain of the more populous areas has been attended with a considerable measure of success, and the question of

extending the issue of such tickets to other suitable districts is engaging consideration.

The revenue from season tickets amounted to £171,603, as compared with £176,193 the previous year, a decrease of £4,590. Eighty-four per cent. of the decrease was under the heading of "All Lines" and sectional annual tickets, and of the decrease of £3,867 in this group official tickets issued to Government Departments account for £3,114. Workers' weekly tickets increased by 4,550 and revenue by £863, the improvement being fairly well maintained throughout the year.

## PARCELS, LUGGAGE, AND MAILS.

The receipts under this heading totalled £281,889, a decrease of £1,933 (0.68 per cent.) as compared with the previous year. An analysis of the revenue is as follows:—

						1933-34.	1932–33.	Variation.
						£	£	£
Parcels						164,452	171,102	-6,850
Excess	nggage					6,810	6,907	97
Left lug	gage, lus	rgage-c	checks, bic	ycles, an	d dogs	33,992	31,885	+2,107
Mails	••	<b>→</b> •				76,635	73,928	+2,707
	Total					£281,889	£283,822	£1,933
	,							

ix D.—2.

Although parcels revenue shows a decline of 4 per cent. for the whole year, traffic has shown a distinct improvement over the latter half of the year. For the first six four-weekly periods of the year receipts dropped by £7,223 or 10·1 per cent. During the next three periods the rate of decline diminished until in January (the tenth period) it showed practically no variation. For the last three periods of the year an increase of £2,149 (or 5·3 per cent.) was recorded. These figures indicate an upward movement in this class of traffic.

The increase in revenue from luggage, &c., is in keeping with the increase in passenger traffic. The variations in revenue under the heading "Mails" are as follow:—

						1934.	1933.	Variation.
Mails carried in	guards'	vans	at	half	parcel	£	£	£
rates						43,588	42,024	+1,564
Railway travelling	g postal-v	vans				27,596	27,596	
Mails carried in v	vagons					5,451	4,308	+1,143
$\operatorname{Total}$						£76,635	£73,928	+£2,707
						****		

#### GOODS AND LIVE-STOCK.

The revenue from goods and live-stock was £3,911,245, as compared with £3,745,777 for the previous year, an increase of £165,468, or 4·42 per cent. A comparison of the total revenue and tonnage of this year's traffic with that of the previous year is as follows:—

		1934.	1933.	Increase.	Per Cent.
Revenue	• •	£3,911,245	£3,745,777	£ $165,468$	$4 \cdot 42$
Tonnage		5,642,199	5,490,686	151,513	$2 \cdot 76$

A comparison of the tonnage of goods and live-stock carried, together with the revenue derived therefrom for the past seven years, is as follows:—

				Tonnage.	Variation as compared with Previous Year in each Case.	
Year.				Tons.	Tons. Per Cent	; <b>.</b>
1928				$7,358,388$	+49,939 0.68	
1929				7,613,445	+ 255,057 3.47

A comparison with 1933 of the tonnage of commodities under six main headings is as follows:—

		1934. Tons	1933.	Variation.		
<del></del>			Tons.	Tons.	Per Cent	
Agricultural products		574,383	563,458	+10,925	1.94	
Animals and their products		1,230,014	1,214,147	+15,867	$1 \cdot 31$	
Products of mines		1,746,648	1,699,054	+47,594	$2 \cdot 80$	
Products of forests		362,805	315,519	+47,286	$14 \cdot 99$	
Benzine, cement, and manures		710,361	768,882	-58,521	$7 \cdot 61$	
General goods and miscellaneous		1,017,988	929,626	+ 88,362	$9 \cdot 51$	
Totals		5,642,199	5,490,686	+151,513	2.76	

Agricultural products increased by 10,925 tons. Grain showed an increase in the South Island of 12,277 tons. The 1933 grain harvest was an exceptionally heavy one, with the result that from April to December, 1933, inclusive, the quantity carried increased by 46,038 tons, but with the commencement of the new season this year traffic showed the very heavy decline of 33,761 tons for

the months of January, February, and March. Traffic in February and March was adversely affected by a lighter yield, but, in addition, a late harvest also affected the position. From January to March, 1934, the quantity of wheat and oats threshed in the Canterbury, Otago, and Southland districts showed a decline of approximately 4,000,000 bushels (or 44 per cent.) on the corresponding months of 1933. In the North Island grain decreased by 3,196 tons.

Meals increased by 4,352 tons, fruit decreased by 3,135 tons, root crops and fodder decreased by 4,279 tons, flax increased by 1,658 tons, and seeds by 5,591 tons.

Animals and their products increased by 15,867 tons. The total number of cattle and calves carried was 918,111, compared with 687,027 the previous year. The increases were 12,767 cattle (4.27 per cent.) and 218,317 calves (56.28 per cent.). As the total number of cattle slaughtered for food (home consumption and export) showed an increase of 14 per cent. it would have been natural to expect a greater increase in the number railed than the 4.27 per cent. shown. In 1933 the number of cattle carried represented 67 per cent. of the total slaughterings, while in 1934 the number railed represented only 61 per cent. making it appear that in the year under review a larger proportion was driven to saleyards, freezing-works, &c.

The substantial rise in calf traffic is due to a rise in the price obtained for "bobby" calves. Exports of veal increased by 47 per cent. over last year.

The North Island recorded an increase of 354,140 sheep (7.5 per cent.) over last year, as the result of greater movement of store sheep. Compared with the average of the three financial years, 1931, 1932, and 1933, the number carried in 1934 increased by 19,987, or 0.4 per cent. In the South Island a decrease of 734,044, or 13.5 per cent., was shown compared with last year. This decrease may be ascribed partly to a later season for lambs this year and partly to the holding of lambs consequent upon the rise in wool prices. The number of sheep carried in the South Island in 1933 was well above normal, the excess over the previous year having been 381,986 head.

An increase of 96,370 in the number of pigs carried was due to an increase in the exportation of frozen pork. For the year ended 31st March, 1934, exports showed an increase of 129 per cent. over the previous year.

The tonnage of frozen meat carried increased by 4.5 per cent. and revenue by 13.4 per cent., the latter being due to the longer average haul.

The total production of butter for the year ended March, 1934, showed an increase of 19,266 tons (12 per cent.) over last year, while the commodity statistics show that the tonnage carried by rail remained stationary. This is due in a measure to the operation of "truck rates" in the North Island. Butter forwarded in wagons at "truck rates" is not included under the butter commodity, but under the truck-rate heading. Revenue registered the substantial increase of £13,236, or 9·2 per cent. The average haul was 71 miles, as against 64 last year; and the average receipt per ton was £1 1s. 6d. compared with 19s. 9d.

The North Island shows a falling-off of 4,669 tons in cheese, but, as in the case of butter, revenue shows an improvement. The receipts from this commodity in the North Island increased by £7,416, or 11.5 per cent. The South Island recorded a decrease of 1,264 tons and £1,238. The total figures for the two Islands are, therefore: Tonnage decrease, 5,933; and revenue increase, £6,178. Total production increased by 3,592 tons (3.6 per cent.).

The substantial rise in prices this season resulted in 7,289 tons more wool being railed in the North Island, with a consequent increase of £16,235 in revenue. The average haul in the North Island was 90 miles, as against 79 miles last year, and the revenue per ton-mile was 4·15d., as compared with 4·38d. last year. Revenue in the South Island showed an increase of £946, but the quantity carried decreased by 4,727 tons.

Revenue from tallow, fat, hides, and skins showed the substantial increase of £6,754 (19.2 per cent.).

In products of mines the principal variations were as follow: Agricultural lime increased by 21,543 tons; New Zealand bituminous coal decreased by 59,523 tons; New Zealand soft coals increased by 71,180 tons (North Island, 55,136 tons; and South Island, 16,044 tons). The increase in soft coals was due to increased demand which followed the rise in the quantity of primary products this year, freezing-works and dairy factories having been responsible for the bulk of the increased consumption.

The traffic in road-metal again decreased, the quantity carried being 13,809 tons less than last year.

In products of forests there was an increase of 47,286 tons. New Zealand timber increased by 46,496 tons, mainly as the result of a much greater demand for timber following the granting of a subsidy on building-costs by the Unemployment Board. An increase in the quantity of white-pine timber exported from the West Coast also played an important part in the improvement in this traffic in the South Island. Exports of timber from the Dominion increased by 10·3 per cent. over last year.

Revenue from benzine in bulk increased by £8,550, but benzine, kerosene, &c., in drums and cases declined by £10,561, leaving a net decrease of £2,011 in this traffic.

An increase of £12,445 in revenue from cement carried in the South Island was mainly due to the railing of cement to Kurow for use in the construction of hydro-electric works. Traffic in the North Island showed practically no variation from last year.

D ---2.

Manures showed the very heavy decline of 69,378 tons and £20,594 revenue in the North Island, while the South Island recorded an increase of 8,633 tons and £1,466.

The traffic in miscellaneous goods, which comprise all commodities not listed under the groups already mentioned, amounted to 1,017,988 tons, an increase of 88,362 tons compared with the previous year.

#### STATISTICS.

The following are some statistics dealing with the operation of goods traffic:-

			Variati	on.
	1934.	1933.	Amount.	Per Cent.
Goods-train mileage	 5,612,915	5,480,086	+132,829	$2 \cdot 42$
Goods earnings	 £3,911,245	$\pounds 3,745,777$	+165,468	$4 \cdot 42$
Revenue goods tonnage	 5,642,199	5,490,686	+151,513	$2 \cdot 76$
Revenue net ton-mileage	 383,520,359	363,449,162	+20,071,197	$5 \cdot 52$
Average haul (miles)	 68	66	+2	$3 \cdot 03$
Average revenue per ton-mile	 $2 \cdot 50 d.$	$2 \cdot 52 d$ .	-0.2d.	$0 \cdot 79$
Average revenue per ton	 14s. 2d.	14s.	+2d.	$1 \cdot 13$

An increase in tonnage of 2.76 per cent., coupled with an increase of 1.13 per cent. in the average receipt per ton (the latter due to the longer average haul), has resulted in an increase in revenue of 4.42 per cent.

<b>T</b> .			Variatio	n.
	1934.	1933.	Amount.	Per Cent.
Total gross ton-miles revenue freight	1,292,840,024	1,210,602,612	+82,237,412	$6 \cdot 79$
Goods-vehicle miles (loaded)	106,328,407	99,952,604	+6,375,803	$6 \cdot 38$
Goods-vehicle miles (empty)	51,147,662	47,325,690	+3,821,972	8.08
Total goods-vehicle miles	157,476,069	147,278,294	+10,197,775	$6 \cdot 92$

The increases reflect the general improvement in goods traffic. The fact that empty vehicle miles have increased in a greater ratio than other items is due to an improvement in timber traffic in the Ohakune district, which increased by 20.73 per cent., and, as other traffic did not increase at the same rate, a greater haulage of empties occurred. Excluding Ohakune district (loaded + 12.48 per cent.; empty, + 22.18 per cent.), the figures for loaded vehicle miles increased by 5.54 per cent. and empty vehicle miles increased by 5.84 per cent.

		Averages :	Revenue,	Freight Traffic.	Vari	ation.
Per	Mile of Line:—		1934.	1933.	Amount.	Per Cent.
,	A 1		£1,203	£1,160	+£43	$3 \cdot 71$
	Total tonnage		1,736	1,700	+36	$2 \cdot 12$
	37		117,970	112,523	+5,447	$4 \cdot 84$
	Gross ton-miles		397,675	374,800	+22,875	$6 \cdot 10$
	Goods revenue per trai	n-mile	167·24d.	164·05d.	+3.19d.	$1 \cdot 94$
	Train load, gross (tons)		000 00	$220 \cdot 91$	+9.42	$4 \cdot 26$
	Train load, net (tons)		$68 \cdot 33$	$66 \cdot 32$	+2.01	3.03
	Number of vehicles		18.94	$18 \cdot 24$	+0.70	3.84
	Number of vehicles (empty)	$\begin{array}{ccc} \text{per} & \text{train} \\ \cdots & \cdots \end{array}$	$9 \cdot 29$	8.64	+0.65	$7 \cdot 52$
Per	1,000 Gross Ton-miles	:				
_ 0.	Revenue		£ $3.025$	£3.094	-£0.069	$2 \cdot 22$
	NT		297	300	<del>-3</del>	$1 \cdot 00$

As the rise of 6.79 per cent. in gross ton-miles was greater than the 4.42 per cent. rise in revenue (due mainly to the greater haulage of empty wagons) the revenue per thousand gross ton-miles fell by 2.22 per cent.

			v con	iauion.
Wagon User:—	1934.	1933.	Amount.	Per Cent.

New business written up during the last four years is as under :-

Miscellaneous	tising	••	 1934. £ 17,235 2,915  613 13	1933. £ 24,069 1,295  621 127	1932. £ $26,415$ $1,859$	$ \begin{array}{c} 1931. \\ £ \\ 47,948 \\ 3,338 \\ 1,442 \\ 904 \\ 151 \end{array} $
			£20,776	£26,112	£29,790	£53,783

The past year has been a very difficult one in the advertising field, and the amount of new business written up was £20,776, as compared with £26,112 for the previous year. This, together with the expiry of contracts made in pre-depression years, accounts for the decrease of £2,328 in outdoor advertising revenue. Increased advertising in the *Railways Magazine* is responsible for the increase of revenue under "Publications," the revenue obtained from this source being £2,170 as against £1,114 last year, an increase of £1,056.

Expenditure for the year was approximately the same as the previous year.

The total return to the Department in respect of operations of the Advertising Branch during the past five years was as follows:—

•			1934.	1933.	1932.	1931.	1930.
Rent, land, a	nd buil	dings	800	1,000	1,000	1,000	1,000

xiii D.—2.

Revenue.—An analysis of receipts discloses the following variations:—

			1004	1000	Variation.		
			1934.	1933.	Increase.	Per Cent.	
Dining-rooms Counter-rooms Miscellaneous	••	• •	£ 9,361 61,909 2,387	£ 9,236 58,042 2,227	£ 125 3,867 160	$1 \cdot 35$ $6 \cdot 25$ $7 \cdot 18$	
Totals			£73,657	£69,505	£4,152	5.97	

The number of meals served in dining-rooms totalled 74,924, an increase of 1,034 over the

previous year.

The increase in revenue is a reflection of the cheaper service being offered to the travelling public by reason of the reduced prices for counter refreshments which, as mentioned in the Board's last report, came into operation on the 13th August, 1933. While the dining-room sales show comparatively little variation, the number of meals sold having increased by only 1,034 (or 1.39 per cent.), and the revenue by £125 (or 1.35 per cent.), the counter sales show a marked increase, the revenue advancing by £3,867 (or 6.25 per cent.). Of this increase, £1,321 is directly attributable to the opening of rooms at Te Kuiti in April, 1933. The increase after excluding Te Kuiti was £2,546 (or 4.38 per cent.).

From the 13th August, 1933, the cost of counter refreshments was reduced, and, while this resulted in an increase in business, the results to the end of the financial year were not sufficient to reimburse the Department for the concession made. The total expenditure increased by £6,295, of which amount stores and provisions were £4,211 and replacements of crockery and renewals £1,011. A certain proportion of this increase is due to the fact that the financial year under review included the larger share of requirements for Easter, 1933 and 1934, while the remainder is due to the increased

turnover in dining and counter rooms.

The actual return to the Department in respect of the operations of the Refreshment Branch for

the past five years is as follows:

			1934.	1933.	1932.	1931.	1930.
			£	£	£	£	£
Rent	 	 	9,230	9,100	9,100	9,100	11,170
Commission	 	 	620	584	715	996	970
Rail fares	 	 	1,066	1,066	1,066	1,287	1,287
Rail freights	 	 	1,818	1,851	2,349	2,991	3,234
Interest	 	 	1,124	1,129	1,291	1,184	1,099
Net profit	 	 	786	2,928	1,681	3,341	6,981
			£14,644	£16,658	£16,202	£18,899	£24,741

#### BOOKSTALL SERVICE.

Four bookstalls were controlled by the Department at the commencement of the year, and the stalls at Te Kuiti, Dannevirke, Thorndon, and Ashburton were taken over during the year, making a total of eight bookstalls operated by the Department at the 31st March, 1934.

The revenue amounted to £20,786 and expenditure totalled £19,102, leaving a net profit of £1,684 for the year's operations.

The actual return to the Department in respect of the operation of bookstalls is as under:—

					1933–34 <b>.</b> £	1932–33. £
Net profit					1,684	1,070
$\operatorname{Rent}$					2,079	1,238
Railages	• •	• •	• •	• •	40	• •
Commission	1	٠	. • •	• •	145	87
					£3,948	£2,395

With reference to bookstalls, the Board desires to make the following comment regarding its policy:—

Prior to the appointment of the Board the Department was already operating some of the bookstalls. The Board found that this was due to circumstances which necessitated the Department taking over the stalls in order to continue the service to the public. Later developments and

D.—2. xiv

the experience gained in the management of the bookstalls convinced the Board that much could be done under departmental control to improve both the standard of service and the financial return. So far as standard of service is concerned, there is no doubt at all that the bookstalls which are being operated by the Department have given a service superior to that which was previously provided. The layout, quality, and variety of the stock have been improved in every case, and the service to the public has been maintained at a high standard. On the financial side the returns have been satisfactory, as the following figures will show:—

			Former Private Rental.	Net Return to Railway Department, Year ended 31st March, 1934.		
				£	£	
Auckland				$1,\tilde{3}53$	1,220	
Thorndon				433	582	
Christchurch				595	1,147	
${f Ashburton}$				103	192	
Dunedin				580	722	

The private rental shown against the Auckland bookstall is that charged for the site in the old station which, owing to its position at the foot of Queen Street, received a fair proportion of trade from other than railway passengers and commanded a higher rental than would be obtainable from the site in the new station.

The Board is of opinion that the operation of the bookstalls is an integral part of railway operation in the sense that a complete service to the public cannot be given without the provision of bookstalls. It concludes, therefore, that there is no reason why the Board should not itself operate the bookstalls if the requirements of standard of service and financial returns are met. As the foregoing figures indicate, actual experience has left no room for doubt on these two points; and the Board has therefore adopted a policy that, except in some isolated cases where it would not be an advantage to do so, the bookstalls are to be controlled by the Department's organization.

## ROAD MOTOR SERVICES.

The year's operations resulted in a profit of £2,368, compared with £521 for the previous year. Details of the fluctuations in revenue and expenditure are set out hereunder:—

		1933-34. £	1932–33. £	$\begin{array}{c}  ext{Variation.} \\  ext{\pounds} \end{array}$
Revenue	 	 79,184	78,644	+ 540
Expenditure	 	 76,816	78,123	-£1,307
Net revenue	 	 £2,368	£521	+£1,847

It is to be noted that the net return shown above is calculated after interest has been debited on the capital invested in the services; and allowance made for depreciation on vehicles and plant.

The total passenger journeys were 2,783,184, as compared with 2,740,263 for the year ended 31st March, 1933.

The results of operating the various services were as follow:—

£ £ £ 16,736 17,485 —			
110 Cmac 10,100			rease. £
Expenditure 16,185 16,688 —	Revenue	Ď —	-749
	Expenditure	8 –	-503
Net revenue £551 £797 $-$ £	Net reve	7 —:	£246

The decrease in revenue was occasioned by the completion of rebuilding operations following the earthquake. Consequent upon this falling-off in traffic, bus-miles were reduced by 7.73 per cent. causing a reduction in expenditure of £503. Eleven buses are now used on this service compared with twelve in 1933.

		]	Hutt V	ALLEY.		
				1933–34. £	1932–33. £	$\begin{array}{c} \text{Variation.} \\ \pounds \end{array}$
Revenue				55,519	55,652	-133
Expenditure	• •	• •	• •	54,000	55,222	-1,222
Net reve	enue ·		• •	£1,519	£430	+£1,089

D.—2.

Passenger journeys totalled 2,083,935, an increase of 23,622 compared with the previous year. This increase was principally in short-distance fares, but a slight falling-off in the passenger traffic on the longer routes resulted in the revenue for the year under review decreasing by £133.

The expenditure decreased by £1,222, which decrease is due to a reduction in operating-expenses. Bus-mileage totalled 879,226 miles, a decrease of 7,332 miles compared with the previous year.

#### Oamaru-Tokarahi.

Revenue Expenditure		• •	••	$ \begin{array}{c} 1933-34.\\ \pounds\\ \dots\\ 1,783\\ \dots\\ 1,741 \end{array} $	1932-33. £ $1,629$ $1,635$	Variation. £ +154 +-106
Net re	evenue			Profit, £42	Loss, £6	+£48

Revenue amounted to £1,783, an increase of £154 over the previous year due to increase in longer distance passenger travel. Passenger journeys totalled 39,826, a decrease of 1,664.

Expenditure amounted to £1,741, an increase of £106 compared with the previous year. This increase is due to the fact that a new bus was placed in this service during the year, thus increasing the depreciation payable for the year by £130.

#### DUNEDIN - PORT CHALMERS.

Revenue Expenditure	••	 	1933–34. £ 4,840 4,541	1932-33. $ £$ $3,878$ $4,578$	$\begin{array}{c} \text{Variation.} \\ \pounds \\ +962 \\ -37 \end{array}$
Net	revenue	 	Profit, £299	Loss, £700	- -£999

This service continues to show increased business. Passenger journeys increased from 139,978 to 175,799, being an increase of 35,821 journeys (or 25.59 per cent.). Bus-mileage increased by 12,425 miles (or 16.69 per cent.).

Expenditure amounted to £4,541, a decrease of £37 on the previous year's figures. Running-costs increased by reason of the increased mileage, but the cost per mile decreased from 8·10d. to 7·25d. (or 10·49 per cent.). A reduction of £148 was made in fixed charges on account of the withdrawal last year of two large buses and their replacement by smaller buses, on which less depreciation is payable.

#### WAIPAHI-EDIEVALE.

			£
 		 	 306
	, .	 	 349
		 	 £43

As a result of investigations made during the year, it was decided to withdraw the mixed trains which had previously operated between Waipahi and Edievale and operate the passenger business with a bus. Suitable arrangements have been made for working the goods traffic by goods trains operating from Clinton.

The road passenger service was commenced on the 18th December, 1933, and had thus been operating for less than four months at the close of the financial year. Having regard to the initial expenditure incurred in establishing the service, including such charges as freight on the bus from Wellington (£30), the result of the operations for the short period the service has been established is satisfactory.

## LAKE WAKATIPU STEAMERS.

			1933–34. £	1932–33. £	Increase. $\mathfrak{t}$
Revenue Expenditure		 	0.09,617 $0.09,610$	$7,864 \\ 8,200$	$\substack{1,753\\1,410}$
	revenue	 	Profit, £7	Loss, £336	£343

Revenue showed a substantial increase, being 22·29 per cent. above the previous year. Passenger revenue increased by £1,086 (or 37·97 per cent.), the passenger journeys showing an increase of 6,601 (or 38·51 per cent.), while goods revenue increased by £717 (or 17·56 per cent.), the bulk of this being live-stock and mining machinery and equipment. The live-stock carried increased by 4,158 head.

The expenditure for the year totalled £9,610, an increase of £1,410 (17·20 per cent.) compared with the previous year.

D.—2. xvi

Repairs to steamers showed a substantial advance over last year. This was due to the fact that both steamers on the service underwent heavy overhaul, involving additional expenditure this year. In addition, the boiler of the "Ben Lomond" failed in July, 1933, while the steamer "Earnslaw" was undergoing overhaul, and it was found necessary to install a new boiler. Both steamers being out of commission at the same time, it was found necessary to hire launches to maintain a service, and this factor contributed to the increase in expenditure this year.

On the whole, the position of this service for the year must be regarded as satisfactory when compared with losses of £336, £2,055, and £4,898 respectively during the three preceding years.

#### DEPARTMENTAL DWELLINGS.

		1933–34. £	1932–33. £	Variation. £
Revenue	 	 137,238	137,575	-337
Expenditure	 	 150,781	145,786	+4,995
*				***************************************
Loss	 	 £13,543	$\mathfrak{£}8,211$	+\$5,332

The slight decrease in revenue was due to natural fluctuation in occupancy of dwellings. During the year the number of dwellings decreased from 3,636 to 3,629.

The increase in maintenance charges this year is due to repairs on dwellings having been kept down to an absolute minimum during the previous few years. Essential painting and repairs this year account for the increase over last year.

#### SICK BENEFIT FUND.

The operations of the New Zealand Government Railways Employees' Sick Benefit Fund for the year ended 31st March, 1934, show a surplus of £5,306 compared with a surplus of £6,604 for the preceding year. The receipts totalled £24,921, including the departmental subsidy of £8,000, as compared with £24,914 for the previous year. The total membership at 31st March, 1934, was 10,096 compared with 9,681 in 1933 an increase of 415.

Sick-benefit payments totalled £19,615, compared with £18,310 for the previous twelve months, an increase of £1,305.

The accumulated funds now stand in the balance-sheet at £26,520.

#### SUGGESTIONS AND INVENTIONS COMMITTEE.

The Suggestions and Inventions Committee dealt with 813 suggestions during the year, as compared with 622 during the previous year. Of these suggestions 57 were recommended for adoption in whole or in part, 343 were referred to heads of branches for their information, or were already in operation or related to matters of policy, 362 were not recommended for adoption, and 51 were, at the close of the financial year, under trial or investigation, and were carried forward for future consideration.

Of the 57 suggestions recommended for adoption 18 were in connection with improvements to rolling-stock, 2 were in connection with workshop equipment, 13 referred to matters connected with the Way and Works and Signals Branches, while the balance dealt with general matters in connection with railway working.

#### STORES BRANCH.

The amount expended in connection with the purchases of stores during the year was £1,277,749 9s. 3d., and was made up as follows:—

		£	s.	a.
To merchants, manufacturers, and others in New Zealand		449,053	7	11
Payments through High Commissioner in London		158,565	6	1
Material manufactured in railway workshops		125,614	10	0
Coal and coke		456,282	9	7
Stationery		17,829		
Manufactured and used material recovered from other branches		36,392	17	4
Timber from railway sawmills		34,011	18	$^{2}$
	€1	,277,749	9	3
		,,		

The increase in this year's expenditure in comparison with that for the previous year was £20,120 15s. 6d. (or 1.6 per cent.). The principal variations were: Payments to merchants, manufacturers, and others in New Zealand, increased £50,944 0s. 11d.; payments through the High Commissioner, London, increased £65,093 12s.; material manufactured in railway workshops decreased £29,181 12s. 5d.; manufactured and used material recovered from other branches decreased £30,950 12s. 6d.; payments for coal and coke decreased £46,246 9s. 7d.

xvii D.—2.

The total issues of stores to all branches for the year amounted to £1,433,287 16s. 3d., as against £1,393,310 19s. 5d. for the previous year, an increase of £39,976 16s. 10d.

The value of stores held at 31st March, 1934, was £609,320, as compared with £526,447 at the end of the previous year, an increase of £82,873.

The increase was due to there having been a greater carry-over at the end of the financial year of materials for the construction of rolling-stock.

A statement of the value of stores on hand at the end of the financial year for the past six years is shown hereunder:—

Vaq	r ended		Stocks on Hand.						
164	rended		Stores.	Coal.	Total.				
			£	£	£				
31st March, 1929		 	714,118	92.167	806,285				
31st March, 1930		 	676,739	154.357	831,096				
31st March, 1931		 	647,627	110,602	758,229				
31st March, 1932		 	481,056	181,073	662,129				
31st March, 1933		 	360,871	165,576	526,447				
31st March, 1934		 	451,683	157,637	609,320				

#### COAL-SUPPLIES.

The average consumption of coal per week during the year ended 31st March, 1934, was 7,411 tons, which was an increase of 838 tons per week compared with the previous year, and a decrease of 736 tons compared with the year ended 31st March, 1931. A comparison of the purchases of New Zealand and imported fuel for eight years ended 31st March, 1934, is as follows:—

Year.		New Zealand. Tons.	Per Cent. of Total.	$\begin{array}{c} {\rm Imported.} \\ {\rm Tons.} \end{array}$	Per Cent. of Total.	Total. Tons.
1926-27	 	187,793	$49 \cdot 30$	193,163	$50 \cdot 70$	380,956
1927 - 28	 	288,646	65.50	152,025	34.50	440,671
1928-29	 	356,724	$84 \cdot 25$	66,675	$15 \cdot 75$	423,399
1929 – 30	 	355,214	$74 \cdot 59$	121,037	$25 \cdot 41$	476,251
1930 - 31	 	367,686	90.00	40,827	10.00	408,513
1931 – 32	 	373,335	89.72	42,756	$10 \cdot 28$	416,091
1932 – 33	 	388,005	100.00			388,005
1933 – 34	 	381,596	100.00	• •		381,596

It will be noted that the purchases during the year were all in New Zealand coal. Of these purchases 184,317 tons were hard coal and 197,279 tons soft coal.

#### STAFF.

The total number of staff employed at the 31st March, 1934, including those on works chargeable to capital was 15,652, as compared with 14,680 for the previous year. The average number actually at work throughout the year was 14,971, as compared with 14,696 the previous year. Of the average number of staff at work during the year 11,819 were permanent and 3,152 were casual employees. The average number of men engaged on works chargeable to capital was 640, as compared with 441 during the previous year.

During the year 114 members of the permanent staff resigned, 75 retired on superannuation, 60 died, and 107 were dismissed or paid off. Fifty employees were engaged.

Eight members of the Second Division were promoted to the First Division.

A total of £27,117 was paid under the Workers' Compensation Act during the year to members of the Second Division who suffered injury in the course of their employment.

## WORKSHOPS.

## NEW LOCOMOTIVE CONSTRUCTION.

Eight Class K locomotives were completed in the workshops during the year, making a total of twelve of this type now completed and passed into traffic.

Twelve new boilers were built for replacement purposes.

The tractive effort of the locomotives in service during the year compared with the two previous years is as follows:—

	1932.	1933.	1934.
Number of locomotives in service	647	626	605
	11,036,771	10,882,459	10,823,029
Average tractive power per locomotive			, ,
in pounds	17 058	17 384	17 889

During the past year twenty-nine engines were scrapped, making a total of 164 obsolete locomotives which have been scrapped since 1926.

iii—D. 2.

#### IMPROVEMENTS.

xviii

Seven Wab and/or Ws locomotives were equipped with improved travelling-bogies and five locomotives were equipped with electric headlights.

One hundred and four locomotives were equipped with "Waikato" spark-arresters in order to enable soft coal to be more extensively used.

#### CARRIAGES.—NEW CONSTRUCTION.

Ten new carriages, comprising two sleeping-cars and eight second-class main-line cars, were completed and passed into service during the year. Construction work on seventeen new main-line carriages is well advanced.

IMPROVEMENTS AND CONVERSIONS.

Two sleeping-cars were converted to second-class day-cars and equipped with chair-seats.

Five carriages were fitted with steam-heating equipment.

The programme of improving the seating-accommodation has been proceeded with during the year. Fifty-four second-class cars which had longitudinal seating were equipped with chair-seats of the "Addington" type.

The lavatory accommodation on seventy-four cars was improved in accordance with an improve-

ment programme which has been under way for the past few years.

The number of carriages in service at the end of the year was 1,500, of which number twenty-one were sleeping-cars.

Seven carriages were equipped with S.K.F. roller bearings, making a total of fifty-nine cars

equipped with these bearings to date.

The installation of ball bearings in the passenger rolling-stock has been an important phase of the endeavours that have been made to improve passenger services. With the ordinary type of axle-box, hot-boxes are liable to occur, notwithstanding that a high standard of care may be exercised in their maintenance. The inconvenience of delay and disturbance of passengers when a hot-box occurs on a passenger vehicle is a serious matter, and one that the Board has been most anxious to avoid. It had been decided, prior to the constitution of the Board, that a number of axle-boxes of the ball-bearing type should be installed, and the result has amply justified this decision. The first bearings were placed in service late in 1931, and up to the present there have been no delays due to axle-boxes running hot on the vehicles that are equipped with roller bearings.

#### Brake-vans.

Two fifty-foot and nine thirty-foot brake-vans were constructed during the year and passed into traffic, and three forty four feet postal vans were converted to brake-vans.

Four hundred and ninty-eight vans were in service at 31st March, 1934, of which total 485 were

brake-vans and thirteen postal vans.

#### WAGONS.

The construction of new rolling-stock to replace vehicles scrapped was continued during the year, a total of 216 wagons being constructed, comprising two petrol-wagons, five bogic horse-boxes, 171 four-wheeled sheep-trucks, ten four-wheeled frozen-meat trucks, and twenty-eight four-wheeled ventilated wagons.

The number of wagons scrapped during the year totalled 494, comprising thirty-six bogie vehicles

and 458 four-wheeled vehicles.

At the close of the year 211 wagons were under construction in the workshops, comprising twenty bogic sheep-trucks, six bogic frozen-meat trucks, sixteen bogic covered goods-wagons, seventy-one four-wheeled sheep-trucks, eight four-wheeled frozen-meat trucks, and ninety four-wheeled ventilated wagons

The total number of wagons in service at 31st March, 1934, was 27,418.

## TRANSPORTATION.

The train-mileage for the year (exclusive of shunting and departmental mileage) was 10,163,474, as against 9,828,853 for the previous year, an increase of 334,621 train miles. Of the total train-mileage run 4,550,559 were passenger-miles and 5,612,915 goods-miles, an increase of 201,792 and 132,829 respectively as compared with the previous year. The particulars of the revenue train-mileage run in the various sections are as follow:—

		Section.		1933-34.	1932–33.	Variation.

D.--2.

#### TRAIN SERVICES.

The Board has, since the commencement of its functions, diligently pursued a policy of improved services. It felt that, with the changing standard of demand in transport matters, the quality of service provided was bound to play a very important part in the results ultimately achieved. Speed in transit and efficiency in the direction of eliminating trouble for the customer immediately impressed the Board as vital factors. On both the passenger and the goods sides the advantage which the railways have in their capacity for night transport, was, in the opinion of the Board, a line of action that could be developed to the advantage of the railway business. Unfortunately, depressed conditions in trade and industry and the necessity for a curtailment of train-mileage to reduce expenditure, have made it impossible to develop night travel on the passenger side to the extent that the Board would have wished. This was due to the fact that the day services which have been provided over a long period of years could not be immediately curtailed, so that any night services that might be provided would involve additional train-mileage and consequent increased expenditure. If the improvement that has taken place during the past year in the financial position of the Department is maintained, the Board feels that its policy of providing night services, which has been held in suspense for the reasons above mentioned, might be gone on with, and the Board is accordingly hopeful that during the coming year it may be able to do something in that direction.

So far as goods services are concerned, the same difficulty did not present itself, as existing day services could be substantially cut down and the night services substituted therefor. A good deal has already been done in this direction, and, taken in conjunction with collection and delivery services which the Board has developed, generally in association with local carriers, the Board is now able to give a rapid and efficient service in connection with the carriage of goods. There are express goods services now operating on the Main Trunk lines in both the North and South Islands. Between such points as Dunedin-Invercargill, Christchurch-Dunedin, Dunedin-Timaru, Christchurch-Timaru, Wellington - Palmerston North, Wellington-Wanganui, and Auckland-Hamilton goods delivered to the Department for transport up to the evening of one day are available at their destination practically at the opening of business on the following morning.

The following table shows the average late arrivals of the express, mixed, and suburban trains for the year:-

AVERAGE LATE ARRIVAL OF TRAINS, YEAR ENDED 31ST MARCH, 1934.

		Period ended												Average for Year
Year ended	April.	Мау.	June.	July.	August.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	March.	March.	in Minutes.

These figures include delays arising from all causes, including slips, floods, washouts, carthquakes, engine and other mechanical failures, and traffic delays at stations.

In previous Statements the foregoing tabulation has included particulars for "long distance mixed trains." These particulars have been omitted from the tabulation in this Statement for the reason that "mixed" trains have now become substantially goods trains, the passenger traffic worked by them being very subsidiary to their main purpose. As the tabulation is intended to serve as an indication of the punctuality with which the passenger trains have been worked, particulars regarding "mixed" trains have been omitted as having little significance in relation to the purpose of the tabulation of the tabulation.

A résumé of the more important alterations to the principal express and passenger trains is as follows:-

From 7th May, 1933, the daily Oamaru-Dunedin return service was accelerated by the provision of passenger trains in lieu of the mixed trains that had run previously.

As from 10th May, 1933, a special passenger service was inaugurated between Timaru and Christchurch on Wednesdays, leaving Timaru at 7.50 a.m. and returning leaving Christchurch at 4.15 p.m. Subsequently the departure time from Christchurch was delayed to 4.50 p.m.

As from 5th June, 1933, the ordinary express train leaving Wellington for Auckland daily at 2.0 p.m. was rescheduled to leave Wellington at 3.0 p.m. to synchronize with the departure time of the ordinary Auckland-Wellington express train, and to provide a more suitable arrival time at Auckland.

### GENERAL.

On 4th September, 1933, the Tahora-Okahukura Section of the Stratford-Main Trunk Line was taken over from the Public Works Department and a thrice-weekly express passenger service from New Plymouth to Auckland and vice versa was brought into operation. Parcels, goods, and livestock traffic has been worked over the new line since the 12th December, 1932.

As from 5th November, 1933, Sunday trains between Wellington and Upper Hutt were reinstated as a trial. The patronage afforded this service, however, was below expectations even during the summer period, and fell away to such an extent that the service was discontinued from the 13th May,

As from the 5th November, 1933, Sunday trains in the Auckland-Helensville and Auckland-Papakura areas were reintroduced. At the present time these trains are not being patronized as well as was anticipated, and their retention is contingent on the result at the expiry of a fixed trial period.

D.—2.  $\mathbf{X}\mathbf{X}$ 

In order to effect economies, and at the same time provide improved transport facilities for residents in the Tapanui-Kelso-Heriot district, the passenger accommodation on the Tapanui Branch trains was discontinued as from 1st January, 1934, and a departmental road motor service, connecting with main line trains at Waipahi was established. Goods transport requirements are met by a return goods service between Clinton and Edievale on four days weekly.

#### Branch Lines.

The operating revenue from branch lines totalled £300,021, an increase of £422 (0.01 per cent.) compared with the previous year. The passenger revenue increased by £2,613 (6·18 per cent.), and goods revenue decreased by £1,794 (0.80 per cent.).

The operating expenditure was £369,898, compared with £399,130 for the previous year, a

decrease of £29,232 (7.49 per cent.).

A decline in traffic on certain of the branch lines necessitated a further curtailment of services, the train-mileage for the year totalling 784,385 miles. This represents a decrease of 20,400 miles (2.53 per cent.) compared with the previous year, and is a factor contributing to the decrease in expenditure. The net loss on branch lines after allowing for the feeder value of branch-line traffic was £4,562 compared with £44,591 in 1933 and £115,058 in 1932.

Interest charges amounted to £388,573 as compared with £412,125 for the previous year.

The total loss on branch lines for the past year, including interest charges was £393,135, or a decrease of £63,581 compared with the previous year. This loss represents 32.85 per cent. of the total deficit (including interest), while the mileage of branch lines was 26.63 per cent. of the total mileage of the

As the Board has stated in its previous reports, its policy has been one of constructive effort directed towards improving the financial position of the branch lines, in the hope of justifying their continued working and thereby avoiding the necessity of curtailing branch-line losses by the drastic alternative of closing the lines. This policy takes on two main aspects—namely, Revenue is a matter which largely rests with the people in the revenue and expenditure. districts affected, and this applies particularly with regard to the operation of competitive services in the branch line districts. The Board made its appeal to the people to do their part in the preservation of the branch lines by placing their business on the lines, since the business done is in the last resort the only real justification for continued operation.

Dealing with expenditure, the Board may fairly claim to have done its part. For the year ended 31st March, 1932 (this being the first year of the Board's operation), the operating loss on account of branch line working was £165,718. For the year ended 31st March, 1934, this loss had been reduced to £69,877, and this improvement in the net position of the branch lines has been brought about solely by the reductions which the Board has been able to achieve on the expenditure side. The

revenue from branch lines has, in fact, not improved, as the following figures will show:-

Year ended 31st March, 1932 308,560 Year ended 31st March, 1934 300.021

No doubt some of this decrease can be ascribed to the depression in trade and industry which has resulted in decreased revenue over the whole of the railway system; but it is well known that there are many competitive services operating in districts served by branch lines which have had the effect of substantially decreasing the revenue from those lines, with, as the Board conceives it, no material advantage to the district. Taking as an example the Otago Central line, the service which this line is rendering to the Otago Central district is undeniable. Two of the principal types of traffic from the district are live-stock and fruit, and neither of these types of traffic could be adequately served by any other means of transport than the railway, and they certainly could not be served at the rates which are charged by rail. This applies particularly to fruit, an industry which has undoubtedly been built up on the cheap rates for transport which have been afforded, and are still being afforded, by the railways. It is found, however, that competitive road services, catering for the higher classes of traffic, are operating over very long distances in competition with this line. It is impossible to believe that there can be any explorated advantaged. petition with this line. It is impossible to believe that there can be any substantial advantage in point of service from the operation of these competitive methods of transport, while it is equally undeniable that, from the point of view of the national interest, any advantage in service that might be claimed would certainly not justify the expenditure that is involved in this duplication of transport facilities. This line showed a net loss on operating (without interest) last year of £7,767, and the Board again desires to emphasize its appeal to the people of the district to do justice by the country in general, which is bearing this loss, in order to provide the railway service that is vital to the welfare of the district. Having regard to the fact that the line is so vital to the district, this loss might be borne by the general taxpayer without serious complaint if it were not for the fact that it is being made larger than it need be through the patronage afforded in the district to competitive services. A responsibility in this matter undoubtedly rests on the Transport Licensing Authorities but, in the last resort, the people of the district have it in their own hands in the sense that they have the power of determining how their transport shall be placed. The case of the Otago Central line has been cited as typical, but the Board does not wish it to be inferred that this is the only line to which the conditions as above described apply. The Board again earnestly appeals to the people in the districts served by branch lines to help the Board to improve the financial position of these lines so as to justify their continued working, and not force the Board to measures as regards services and charges which it would be loath to take, but which will undoubtedly be necessary if the people concerned will not voluntarily exert themselves to remove the inequitable position that at present so largely obtains.

 $D_{-2}$ .

#### Isolated Sections.

The results of operation on isolated sections are as follow:-

Kaihu.—Revenue amounted to £3,824, an increase of £126 over the previous year's figures, all classes of traffic showing a slight increase.

xxi

Expenditure totalled £5,956, a decrease of £96 compared with the previous year. Train-mileage was 13,808, compared with 13,136 in 1933, an increase of 672.

The operating loss for the year was £2,132, as against £2,354 for the previous year.

Gisborne.—Revenue totalled £15,996, an increase of £1,568. Passenger revenue fell by 11.93 per cent., parcels revenue increased slightly, and goods revenue advanced 15.6 per cent. The main items making up the increase in goods revenue were wool, road-metal, and timber.

Expenditure totalled £18,202, a decrease of £745. Train-mileage was 37,108, as against 40,324

the previous year, a decrease of 3,216.

The operating loss on this section was £2,206, as compared with £4,519 the position thus being

improved by £2,313.

Nelson.—Revenue amounted to £11,639, as against £13,402 for the previous year, a decrease of £1,763. Passenger revenue showed an increase of £897. Goods revenue fell by £2,447, due to the termination of the cartage contract between the railhead and Murchison.

Expenditure totalled £19,082, or a decrease of £2,651 on the previous year's figures, all items with the exception of maintenance of rolling-stock showing decreases. The increase in rolling-stock repairs was due to heavy overhauls of locomotive engines and boilers.

The train-mileage for the year was 38,923 miles, compared with 39,240 miles for the previous

The operating loss on Nelson Section for the year was £7,443, as compared with £8,331 for the

previous year.

The financial results of this line last year led the Board to the conclusion that there was a prima facie case for closing the line. After discussion with the people of the district, however, it was decided to adjust some of the rates and to give the line a further trial for another year. The result cannot be considered as satisfactory. The revenue position has not improved. The loss on operating is considerable, and the Board is of opinion that there is little prospect of any substantial improvement.

Picton.—The revenue from this section amounted to £27,317, a decrease of £1,486 compared with the previous year. Passenger revenue increased by £312, but goods revenue decreased by £1,883 (8.64 per cent.), the latter being due to severe drought conditions in Marlborough.

Expenditure totalled £28,702, an increase of £154 over the previous year.

The train-mileage was 43,650 miles, against 42,667 miles for the previous year.

The section showed an operating loss for the year of £1,385 compared with a profit of £255 for the previous year.

Westport.—The revenue for this section totalled £63,322, as compared with £64,065 for the previous year, a decrease of £743. The principal decline is again in coal traffic, which totalled 283,654 tons, as compared with 288,248 tons for the previous year.

Expenditure totalled £54,268, a reduction of £4,191 on the previous year's figures.

Train-mileage was 60,492 miles, compared with 60,671 the previous year.

The operating profit on this section was £9,054, compared with £5,606 in the previous year.

## RAILWAY PUBLICITY BRANCH.

The Board has found that the results of the advertising and general publicity efforts of the Department have been very satisfactory.

Every day the principal newspapers in the Dominion carry some advertising relating to railway activities. By flashing signs in the main centres, by hoardings facing the principal streets, by posters, booklets, handbills, and leaflets, the story of railway service in all its forms is being constantly told.

The Board has found an increasing willingness amongst local bodies and various organizations that are interested in particular localities, to co-operate with the Department in developing travel to such places. The marked success which has followed some of the campaigns already carried through in developing passenger traffic of this kind has assisted in extending this mutually helpful practice.

In the matter of the display of travel posters, the Department now has reciprocal agreements with the following railways: London and North Eastern Railways; Australian National Travel Association (covers all railway systems in Australia); Indian State Railways; South Indian Railway Co.; Biera and Mashonaland and Rhodesia Railways; Japanese Government Railways; Egyptian State Railways; Federated Malay State Railways; Ceylon Government Railways; Netherlands Indian State Railways; Siam State Railways; Canadian National Railways; Canadian Pacific Railways.

This ensures a very widespread distribution in other countries and assists in drawing attention

to New Zealand and the various aspects of this country likely to appeal to prospective tourists or settlers.

The Board feels that the efforts made by the Department to increase public interest in travel within the Dominion are having definite effects that not only help the Department to obtain more traffic, but do good to the public by giving them a fuller knowledge and appreciation of their own country. During the year no fewer than 26,000 posters have been prepared and distributed, and 40,000 handbills, cards, &c. Quite a number of publications have also been issued, including a revised "Picnics by Rail' booklet, a folder for Hanmer Springs, a Railways book-mark, a folder for the Otira Walk, and four "Seeing New Zealand by Rail" folders for the Southern Lakes, Mount Cook, Northern Lakes, and Northland. Besides this work the Branch has assisted in literary work, layout and printing of booklets and folders for firms and local associations interested in the promotion of travel. The Department's own publications of this kind during the year totalled 125,000 copies.

D,--2, xxii

As the principal seller of transport within the Dominion, the Board is necessarily interested in the promotion of tourist traffic to this country. It is well known, of course, that Railway organizations in Great Britain, Canada, United States of America, Germany, France, India, South Africa, and some other big countries are very active and enterprising in their efforts to draw tourist traffic from various countries to their own lines.

A study of the present position justifies a belief that the time has come for the New Zealand Railways to send their message impressively overseas. Happily the Department is fully equipped for the production and distribution of suitable illustrated publicity matter.

The preparation and distribution of photographs through the press and also to the Government Tourist Department has been further extended during the past year. A very fine range of enlarged coloured photographs of the principal scenic resorts in New Zealand has also been prepared and is now ready for exhibition in various centres of the Dominion, in order to assist in still further increasing passenger traffic by rail. The photographs are used largely in the New Zealand Railways Magazine, and also by other publications, to convey pictorial information to the public regarding railway developments and improvements of all kinds. Many overseas publications have used photographs distributed from the Railways Publicity Section, and the High Commissioner's Office, London, has been able to effect distribution of photographs of this type amongst leading British and Continental newspapers and magazines.

Articles illustrated with railway photographs prepared in this Division have been supplied to publications in various countries, such as Messrs. Thos. Cook and Son's Travellers' Gazette, and The

Railway Gazette, London.

Railways Magazine.—Now in its ninth year of publication, the Department's official monthly Magazine maintains its high standard as a modern magazine, and continues to serve in its role as departmental "house organ." Distributed free to the staff, the Magazine provides a comparatively inexpensive, attractive, and readily accessible medium in which subjects of immediate and prospective railway interest and importance may be discussed and clarified.

All subjects within the range of the Department's services and facilities are naturally within the scope of the Magazine, and only authoritative information is published. In making available, in compact form for the guidance of the staff, accurate knowledge concerning the operations of the Department, and by emphasing in other directions the importance of the railways in the national life

of the country, the Magazine is doing a definitely constructive work.

By free circulation amongst the Department's customers, the Magazine exerts an important beneficial influence from the Railway viewpoint, and both inside and outside the Service the Magazine continues to win high commendation from its readers.

The advertising figures for the past year represent a doubling of the revenue from this source—a fact which indicates the increasing appeal of the Magazine to advertisers. The revenue

from sales has also notably increased.

The overall cost of the *Magazine* to the Department is a progressively decreasing one. At the present time the net cost of the *Magazine* to the Department is 1.8d. per copy. The prospect is that with a growing revenue from advertising and sales, the cost to the Department will continue to decrease. If the *Magazine* account were credited with its publicity value to the Department, as house organs usually are in the case of private firms, the position would show a considerable profit.

#### WAY AND WORKS BRANCH.

The following are the principal features connected with the operations of the Way and Works Branch during the year:

Permanent-way.—The relaying done during the year was as follows:—

Main line and b	ranches, 52	lb., 53 l	b., 55 lb.,	56 lb., 6	5 lb., 70 l	b., and 1	00 lb.,	M. Ch.
relaid with	55 lb., 70 l	b., and 1	00 lb. ne	w materia	ıl			$31 \ 72$
Main line and	oranches re	laid with	n second-	hand ma	terial 55	lb., <b>56</b> lb	., and	
70 lb								0.78
To	otal			• •		••		<b>32</b> 70

Sleepers.—The number of new sleepers placed in the track during the year was 152,046.

Ballasting.—During the year 163,336 cubic yards of ballast was placed on the track.

Slips, Floods, &c.—During the year a number of minor slips, floods, &c., occurred at the following places and caused delay to trains:-

Between Ohaupo and Lake Road (Ohakune District).

Between Manunui and Piriaka (Ohakune District).

Between Kakariki and Greatford (Wanganui District).

Between Porirua and Paremata (Wellington District).

Between Ngaio and Khandallah (Wellington District).

On Hokitika line.

Between Taioma and Parera (Dunedin District).

On 5th August, 1933, a fall of about 300 tons of papa rock occurred on the Point Elizabeth line, breaking the centre line. Track was cleared for traffic the following day. A further fall of 20 tons happened on the 10th August, 1933, damaging the centre rail, but traffic was resumed on same day.

xxiii D.—2.

Earthquake.—An earthquake which occurred on the night of the 5th March, 1934, caused damage in the Wairarapa, Hawke's Bay, Manawatu, and Wanganui districts.

One pier of a bridge near Mauriceville was shifted 1 ft. out of place, and the filling of the approaches at each end of the bridge subsided 1 ft.

The filling in the approaches to the Kopua and Ormondville viaducts subsided about 6 in.

At a point just north of Paraparaumu a bank through a swamp settled a maximum of 2 ft. 6 in. over a length of 3 chains.

Several sidings leading to the wharf at Foxton could not be used for a day owing to subsidences. About two hundred chimneys in the districts mentioned were damaged.

Cattle and Sheep Yards.—During the year sheep and cattle yards were provided at Matamata, Whangamarino, Kamahi, Castle Rock, and Ryal Bush Stations.

Buildings.—All buildings have been maintained in satisfactory condition. A hut at Te Kuiti, lamp-room at Taumarunui, bus-garage at Hastings, and a small dwelling at Opapa were totally destroyed by fire during the year. The following were also damaged by fire; Engine-sheds at Taumarunui, Hawera, and Wanganui; store-sheds at Frankton Junction and Lambton; and houses at Kaikohe, Mercer, Halcombe, Longburn, Woodville, Karoro, Purakanui Cliffs, and Mosgiel.

Railway Improvements.—The principal works carried out during the year were as follow: New turn-tables (55 ft.) were installed at Huntly, Putaruru, Waipukurau, Masterton, and Cross Creek; Bus-garage erected at Hastings; improvements and alterations to locomotive depots at Frankton Junction and Taumarunui; additional sidings provided on breastwork at Lyttelton.

Wellington New Station.—Work on the new station-yard was started on 3rd July, 1933. The site for new station building was cleared and drainage laid, a temporary additional platform was constructed at Lambton Station, also temporary wagon-repair shed and temporary carriage standing tracks were provided. Portion of the new goods yard has been constructed and parts of new main lines towards Kaiwarra have been laid.

A contract for the construction of the new station building to be erected near Bunny Street was let to the Fletcher Construction Co., Ltd., in November, 1933. The contract price is £339,173 0s. 11d., and the building is to be completed in February, 1937. The contractors have completed the preliminary work and have started to drive the reinforced-concrete piles for the foundations.

Bridge-strengthening.—The work of strengthening and renewing bridges was continued during the year. The strengthening of the Toi Toi Viaduet and the reconstruction of the Wangaehu Viaduet were completed. In the South Island the strengthening of the Pareora Bridge was completed and the reconstruction of the North Rangitata Bridge is in hand.

Welded Rail-joints.—With a view to reducing maintenance costs, several rail-joints at road crossings have been electrically welded and so far are giving satisfactory service. At present a trial length of one mile of the Lower Hutt suburban line has been laid with "Thermit" welded joints.

It is hoped that in addition to savings in maintenance costs, greater comfort to the travelling public will result. If the anticipated improvements are realized, it is proposed to weld the whole of the new double track between Wellington and Tawa Flat.

By this process as many as five ordinary rail lengths are welded together continuously on straights and shorter lengths on curves according to the radius. In the tunnels all joints will be eliminated.

Mileage.—The mileage of track open for traffic on the 31st March, 1933, was 3,278 miles 74 chains.

## SIGNAL AND ELECTRICAL BRANCH.

The following is a summary of the principal activities of the Signal and Electrical Branch during the year:—

SIGNALLING.

Okahukura.—A new system of key locking and signalling was completed and brought into use before regular passenger services were inaugurated to New Plymouth. The new system has fulfilled expectations, and has worked satisfactorily.

Wellington New Station.—Stage one has been completed. This entailed extensive alterations in the Lambton north signal-box and the complete dismantling of the south box and interlocking. Two additional docks have been provided and interlocked and the new platforms have been flood-lighted. The new down main line between Thorndon and Kaiwarra across the reclamation has been brought into use and the main line connections at Kaiwarra lifted to allow further stages of the new work to proceed.

Tenders for various sections of material for the new yard have been called and those for the interlocking machine and flood-lighting equipment accepted.

The design of the signalling, telephone, lighting, and power reticulation is well in hand.

As the new works have proceeded, temporary alterations to lines, lighting, and signalling have received attention.

Automatic Signalling, Heathcote-Addington.—This work has been commenced and further material ordered to allow of its completion in the present year.

General.—Alterations and additions to existing signalling and interlocking have been carried out at Whangarei, Kioreroa Bridge (lifted), Morningside, Ellerslie Racecourse Siding (lifted), Ellerslie, Westfield, Horotiu, Stratford, Palmerston North, Paekakariki (shunting indicators), Kaiwarra, and Lambton

Repeater light signals have been installed at Drury and Ngaruawahia.

D.—2. xxiv

Home and distant signals and Woods locks have been dismantled at Okahukura.

A switch-locked siding has been installed at the Silverstream Ballast-pit and the switch-locked siding at Andrews' Siding has been removed.

The total number of signalling installations is as follows:— Miles of single-line automatic signalling .. 190 m. 41 ch. Miles of double-line automatic signalling 63 m. 14 ch. . . 33 Automatic crossing-loops .. . . ٠. Automatic switch-locked sidings 34 27 Power interlockings . . . . . . . . Mechanical interlockings ... 98 . . Interlocked tramway-crossings 7 Mechanical fixed-signal and Woods locked stations 305 Tablet locked sidings .. 265 . .

#### TELEGRAPH AND TELEPHONE FACILITIES.

Block-working.—During the year Onoke was closed as a tablet station and Rotowaro and Waikiwi converted to switch-out working. The Waterworks Siding at Heathcote, controlled by the lock-andblock system, has been lifted.,

The present position in regard to block-working is as follows:— Total mileage equipped with tablet instruments... 1,577 847 ٠. 353 . . 313 . . . . Mileage of double-line worked by lock and block 15 Number of stations ... 12 .. .. .. Number of instruments . . . . . . . . . . . . 23

During this the fourth year of the communications rebuilding programme 174 miles of pole-line were rebuilt; 521 miles of copper conductors replaced the worn-out iron circuits on these sections; and 591 miles of copper wire were erected in new circuits.

The sections rebuilt include Helensville-Maungaturoto, Tahora-Stratford, Stratford-Aramoho.

The train-control system was brought into use on the Stratford-Okahukura-Taumarunui Section with a temporary control office at Stratford, and the Stratford-Wanganui Train Control Section was nearing completion at the end of the year.

Larger telephone exchanges were installed at Frankton Junction and Palmerston North, including a voice-frequency repeater at Frankton Junction, and the recovered exchange boards were used for providing additional facilities at Ohakune Junction, Taumarunui, and Wanganui.

The cable on the Wellington Paekakariki Section is now partially installed, and this work is proceeding rapidly now that the route has been made available by the Public Works Department.

A carrier-frequency telephone system from Ohakune to Paekakariki has been installed, and is ready for use when the Wellington-Paekakariki cable extends the circuit to Wellington.

The circuit on the Onerahi Branch line was dismantled when the Branch line was lifted.

The statistics of communication facilities are as follow:-

Morse instrumen	ts		 • •	 	192
Telephones			 	 	2,663
Miles of wire			 	 	16,956
Miles of poles			 	 	3,085
Railway exchang	ges				·
Automatic	•••		 	 	5
Manual			 	 	10
Public exchange	connec	tions	 	 	570

The Board desires to make some comment as to the policy which it has pursued regarding the means of communication in connection with the railway services. When the Board assumed office it found that the standard of communications was much below what was required for efficient and satisfactory working. A programme of improvement had been worked out, and this programme the Board has diligently pursued according to the funds that could be made available for the purpose. The position has now been reached where substantial improvement has been brought about by the adoption of modern appliances, and the effect has already been very noticeable in the carrying-on of the Department's operations. Efficient means of communication have a vital bearing on the organization of the Department. They solve the problem of decentralization, for they admit of that degree of centralization which is inseparable from the operations of a State Department, and, by ensuring prompt communication of question and answer between headquarters and outlying areas, the real effects of decentralization can be obtained. This, the Board is convinced, has had a substantial bearing on the improved service, which has won favourable comment from the public in recent years. On the part of the staff nothing could be more unsatisfactory than poor communications. The effect of the improvement in means of communication on the general efficiency of the Department has been very marked, and this result has afforded the Board much satisfaction.

#### LEVEL-CROSSING ALARMS.

A number of these installations have been equipped with secondary batteries and rectifiers, reducing the more expensive primary-battery renewals.

The total number of level crossings now fitted with automatic warning-devices is 123. In addition, there are also a number with manually controlled bells.

#### Traction.

Christchurch-Lyttelton.—The electrified section between Christchurch and Lyttelton has continued free from any serious trouble.

As a result of the change in field coils of the rotaries at Woolston Substation, a saving in the annual power bill of approximately £1,500 has been effected.

Otira Electrification.—There has been no failures of the overhead at Otira during the year, and the system has continued to function satisfactorily. The overhead girders at Otira have been painted and the equipment generally is in excellent order.

Wellington-Paekakariki.—During the year a commencement was made with the work of electrifying the line between Wellington and Paekakariki.

Poles, bare cable, armoured cable, and insulators have been delivered, and the erection of traction poles between Paekakariki and Tawa Flat has been completed. Tenders for a large quantity of equipment have been received and orders for most of this have been placed. It is expected that with the delivery of the necessary equipment during the coming year rapid progress will be made.

## ELECTRICAL RETICULATION.

During the year a number of motor installations were completed at various workshops and locomotive depots. At the close of the year a total of 2,226 dwellings and 336 railway-stations were electrically lighted and 17 station-yards equipped with flood lighting.

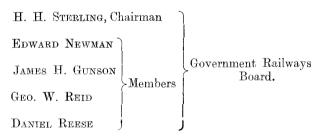

#### CONCLUSION.

The Board is pleased again to record its appreciation of the good work that has been done by the staff during the year. It desires also to express its thanks to the press and the public for much helpful advice and criticism.

The track, bridges, structures, signalling appliances, rolling-stock, and other plant are in good order and in every way efficient for the work required of them in carrying on the business of the Department.

In witness thereof the official seal of the Government Railways Board was hereto affixed by resolution of the Board in the presence of—

[L.S.]

RESULTS OF WORKING.

The following is a statement of the results of working for the past five years:—

	1	Yea	ar ended 31st Mai	reh,	
Particulars.	1934.	1933.	1932.	1931.	1930.
Total miles open for traffic	3,320	3,315	3,315	3,322	3,287
Average miles open for year	3,304	3,315	3,315	3,303	3,287

H. VALENTINE, F.R.A.N.Z., Chief Accountant.

I hereby certify that the Balance-sheet and accompanying accounts have been duly examined and compared with the relative books and documents submitted for audit, and correctly set out the position as disclosed thereby, subject to the above departmental note and to the exception that the cost of exchange in respect of payments made in London for the purposes of this account has not been charged to the account but has been borne by the Consolidated Fund.—G. F. C. Campbell, Controller and Auditor-General.

Fotal cost of 31st March		and uno	pened line	s at	• •		59,35	37,917	••		

Note.—The amount stated in this return as the cost of construction of opened lines includes the Provincial and General Government expenditure on railways. It also includes the Midland Railway and expenditure by the Greymouth and Westport Harbour Boards on railways and wharves under the provisions of section 7 of the Railways Authorization Act, 1885, the information regarding the last-mentioned being furnished by the respective Boards. The rate of interest earned has been computed on the average capital.
