

New Zealand's National Parks

Yours to enjoy

Small isolated islands in the vast South Pacific. New Zealand yet has a rich geological and human history. A variety of landforms equalled perhaps nowhere else in such a small percent of the planet's surface. From the underwater tropics to the cold but fiery heights of the volcanic central North Island plateau. From the jutting snow-capped alps of continental collision to the silent, drowned fiords and rain forests. Today's National and Maritime Park system comprises 13 unique areas, the story of the Parks are told in these magnificent publications, from the breathtaking photography you can catch a glimpse of the beauty awaiting you — the walks, the birds, and the history of the Parks —

160 pages of superb photography History — Landforms — Plant communities, Climate — Animals and the native birds — The walks, yours to enjoy.

A great gift — Send to your friends overseas!
