VOLCANOES OF THE SOUTH WIND

At long last a superbly illustrated book on the volcanoes of Tongariro National Park — the volcanic peaks that lie at the heart of the North Island of New Zealand.

This new book focuses on the fascinating geological history which shapes these distinctive active volcanoes. 'Volcanoes of the South Wind' has 128 pages, measures 208 x 202mm and is illustrated by more than 100 colour photographs. Subtitled a field guide to the volcanoes and landscape of Tongariro National Park this book is ideal for the keen park visitor. It is also highly suitable for your New Zealand or overseas friends.

It is worth noted that 'Volcanoes of the South Wind' is the first publication of the Tongariro National History Society — a non-profit organisation formed to promote a better understanding of the natural features of Tongariro National Park.

A field guide to the Volcanoes and Landscape of Tongariro National Park
