

## Wetlands

### New Zealand's Shy Places

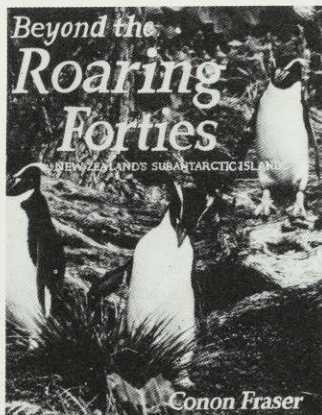

Gordon Stephenson

In recent years concern has mounted over the increasing loss of New Zealand's wetlands. They remain one of the least known and appreciated parts of our environment.

This book seeks to kindle an enthusiasm for wetlands, describing their rich bird, fish and plant life. The author takes the reader with him on visits to a number of accessible wetlands throughout New Zealand.

## Beyond the Roaring Forties

### The Story of New Zealand's Sub-Antarctic Islands

By Conon Fraser (Foreword by Sir Peter Scott)

This fascinating book, on this unique subject, with superb photographs and illustrations is written in a clear and readable style. Situated in the Southern Ocean between New Zealand and Antarctica, these few groups of tiny islands are among the most remote and wild on earth. The Antipodes, Bounty, Snares, Campbell and Auckland Islands have some of the world's last few natural environments unmodified by man.
