

the exciting new book by A. L. Poole, author of
'New Zealand trees and shrubs'

Southern Beeches

For 150 years scientists have been unfolding the story of the southern beech (*Nothofagus*). Now, for the first time, their findings have been brought together to provide an authoritative and very readable account of the distribution, biology, and history of this group of plants.

Mr Poole provides an account of the plants in New Zealand, South America, New Guinea, New Caledonia, and Antarctica.
