

Unseen Fiordland

It is doubtful if there is a more remote and beautiful spot so steeped in history and natural history anywhere in the world, and it's now accessible to you.

Follow the footsteps of Captain Cook, visit the site of the first European house, shipwreck and settlement in N.Z. Learn about the whaling and sealing days, the goldrush, the sawmilling, the attempts at settlement. Visit Puysegur Point and other historical sites. See Fiordland Crested Penguin, robins, and a variety of other bush and seabirds.

Spacious, comfortable vessel with private twin or double cabins, dine on the abundant seafood for which the area is renown.

THE SAFE ALTERNATIVE

There's more to our being "green" than our colour. We're also completely non-toxic and biodegradable; to be safe for you, and the environment. And we know something about financial conservation too: Simple Green is a truly all-purpose household cleaner — you can even use it as a laundry detergent. You won't have to buy as many cleaning products, so you'll save a few pennies. Even as you help save the environment.

Please send me a free sample, and further information.

NEW ZEALAND'S EXTINCT BIRDS

by Brian Gill
paintings by Paul Martinson

57 species of New Zealand's weird and wonderful birds are now extinct. Here, Brian Gill describes each species and discusses their causes of extinction. Paul Martinson has done considerable research from early descriptions and illustrations, bone fragments and fossils, to produce twenty-five stunning paintings. Reproduced in full colour they show how some of these species may have looked.
