### CITY II

Both attractive and functional, this suede/cordura model has quickly become our best selling boot. High density foam ankle cuff forms a scree collar keeping annoying stones out. Like all Van Walk boots the moulded heel and toe keeps your foot firmly in place increasing comfort and reducing chafing and fatigue. With a new heel stabiliser and a large protective round that's bonded to the sole and glued to the boot for protection and safety.

### CLIMBER

Combination of suede for abrasion resistance, cordura for light weight and strength, plus full grain leather for ankle support make this model ideal for tramping. Protective rand that's bonded to the sole and glued to the boot takes the knock and prolongs the life and appearance of your boot. A rear "V" cut on the ankle cuff removes pressure on the achilles tendon and makes for a very active fit. New patterned sole and heel keeps you firmly on track.
