- Plenty of space to write.
- Spiral bound to lie flat.

Retail price \$21.95. Special price to members \$18 (includes post and packing).

Send your order with a cheque to Forest and Bird Mail Order, PO Box 631, Wellington.

What gift can you give to a child that's fun,
educational, doesn't need batteries
or doesn't break after
the first week?

There aren't many today, but a gift membership to the Kiwi Conservation Club is one. The KCC is a Forest and Bird initiative for children from 5 years upward that encourages them to take part in practical, positive conservation activities.

• Positive

With problems such as deforestation, global warming and the hole in the ozone layer, it's easy for children to become worried about the future of their planet.

Through the KCC they learn that by taking personal action they can make a difference.

• Active

All over New Zealand KCC members meet regularly to take part in walks to the coast and bush, replanting projects, and conservation activity days.

• Informative

Every KCC member receives a quarterly newsletter full of news, information and their own poems, pictures and letters about conservation.

Give a gift membership to the Kiwi Conservation Club and encourage today's young Kiwis to become tomorrow's conservationists.

Complete the membership insert in this journal and return it to:

Freepost 669, PO Box 631, Wellington.

Membership only \$10!

Family/Group/School membership \$20.

COVER

Emperor penguins with chicks at Cape Crozier on Ross Island in Antarctica. The emperor is the largest of all penguins and the only one to breed during the harsh Antarctic winter. The male penguins hold the eggs on their feet throughout the winter not eating until the young hatch and the females return from the sea.
