

FOREST & BIRD

N U M B E R 2 8 1 • A U G U S T 1 9 9 6

Forest & Bird is published every February, May, August and November by the Royal Forest and Bird Protection Society of New Zealand Inc.

The society's objectives are to preserve and protect the indigenous flora and fauna and natural features of New Zealand for their intrinsic worth and for the benefit of all people.

Forest and Bird is a member of the World Conservation Union (IUCN) and BirdLife International (ICBP).

FOREST
& BIRD

F E A T U R E S

14 Tale of the white-spotted tussock moth

Discovered in Auckland only in April, this moth may threaten native forests if not eradicated.

by Gerard Hutching

20 Mohua and stoats

Mohua or yellowheads survive on the mainland but their populations are declining. New developments in stoat control are improving their prospects.

by Colin O'Donnell

28 What happened to the kauri national park?

Treaty claims have stalled progress on the proposed park for Northland's great kauri remnants.

by Gordon Ell

32 Magpie wars in the Waikato

Magpies and mynas: some ingenious responses to these pests.

by Jacqui Barrington

36 Lessons from Yellowstone

The world's first national park is facing many problems. Some will affect national parks here.

by Mike Harding

44 Profile of Linda Winch

An advocate for conservation in the Far North joins *Forest and Bird's* executive.

by Jacqui Barrington

R E G U L A R S

2 Comment

The strange case of Colin Boyd.

3 Mailbag

4 Conservation Briefs

Kapiti rat eradication; Lottery funding; environmental reporting; matagouri find; false advertising; weka refuge; taiko; Wairarapa wind farm; Goldman Award for Ballantine; deer impacts; boaties in the Gulf; Kaituna River victory; New Zealand dotterels.

10 World Watch

Fukuoka waterbirds; Australian report card; crayfish take over wetlands; prairie dogs; cranes return; miner pays out in New Guinea.

12 Branching Out

Dunedin firewood campaign; mudflat walks; Limestone Island; Wellington seashore; Auckland postal display; Southland gang connections; South Waikato anniversary.

46 In the Field

Why tall poppies don't grow on mountain tops.

49 Reviews

51 Bulletin

53 Branch Directory

Cover:

Once abundant and conspicuous throughout the South Island, mohua or yellowheads have disappeared from three-quarters of their range. At long last more effective methods of controlling their main predators – stoats – are being developed (see article page 20).
