The Ultimate in Birding

EL BINOCULARS

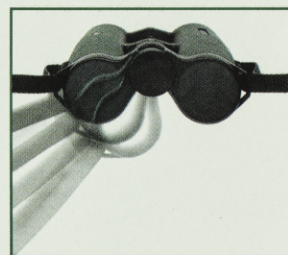

8.5x42 10x42

PRODUCT ADVANTAGES AT A GLANCE

Very ergonomic due to thumb depressions and perfect balance, only 27.5 oz/780g

Focusing from 8 ft/2.5m to ∞ . The adjustment wheel's broad grooves make it easy to handle even with gloves.

A protective ocular cap to keep out dirt and rain which can be adapted to the eye distance of the viewer.

Individually adjustable twist-in-type eyecups which can be removed for cleaning, allowing eyeglass-wearers a full field of view.

Wide-angle ocular for an extra large field of view (62" and 63")

An optimised roof prism system with P and broad-band coating

3-lens objectives with high light gathering power and a patented mechanism for interior focusing.

Torsion-free twin-bridge construction for permanent axis parallelism

Extremely light but still rugged housing of magnesium, the material used in the aviation and aerospace industry.

Unique grip-ability and narrow tubes for simple, fast handling - even with only one hand.

The dioptric compensation system is conveniently interated in the focusing wheel and pulls out to adjust
