These superb Observation Binoculars originally designed for the Chinese Military, have recently been released for sale for Civilian use.

These Binoculars are ideal for use in the home, birding, at your holiday home, in the wilderness or taking in a city view. Each Binocular is carefully inspected by the manufacturer, to the high quality standards of Technology 3000.

This precision optical instrument, offers excellent long range observation and could be used for research, surveillance, security etc.

Until recently only available for foreign military use, these Tripod supported Binoculars offer 25X and 40X magnification, and have a huge 100mm objective lens, to provide excellent light transmission.
