

REED NZ NATURE SERIES  
BUTTERFLIES AND MOTHS OF  
NEW ZEALAND  
Brian Parkinson/Brian Patrick  
0790007347  
\$14.95

Do you know how to tell the difference between a butterfly and a moth? In New Zealand we have fewer than 30 named butterflies, some of which are very occasional trans-Tasman visitors. On the other hand, we have about 2000 moths, and this number is constantly being revised upwards.

This book contains diagrams and text that will help you identify one from the other, as well as being an identification guide to the moths and butterflies you might encounter on bush walks and in the backyard.

NEW ZEALAND FISHES  
Identification, Natural History  
and Fisheries  
Larry Paul  
0790006545  
\$49.95

New Zealand is fortunate in the rich variety of its sea life. In this illustrated guide to New Zealand fish and shellfish, emphasis is given to those of greatest interest to recreational and commercial fisherman. Arranged by family, the species are described, with notes on distribution, habitat, life history and, where known, population size. There are over 300 line drawings and colour photographs.

THE REED HANDBOOK OF  
COMMON NEW ZEALAND  
INSECTS  
Annette Walker  
Illustrations by Eric Heath and  
Geoffrey Cox  
0790007185  
\$34.95

It is estimated that there are at least 20,000 species of insects in New Zealand and probably 90 percent of them are endemic. This gives New Zealand a very special status and our unique insect fauna is renowned throughout the world.

*The Reed Handbook of Common New Zealand Insects* includes information on introduced and endemic pests, what insects eat, collecting insects, insects and the angler as well as an extensive identification guide.

NATURE KIDS: KIWI/WETA  
Kiwi 1869488555  
Weta 1869488504  
\$12.95 each

These are the first books in the new *Nature Kids* series aimed at 5-8 year olds. The series is designed to introduce popular aspects of natural history to a younger age group. Topics covered in each book include a family tree, good looks, feeling and tasting, dinnertime, sounds, eggs and young ones.

THE REED FIELD GUIDE  
TO NEW ZEALAND  
FRESHWATER FISHES  
Bob McDowall  
0790007258  
\$39.95

New Zealand has a rich and varied assortment of rivers, streams, lakes and wetlands that are home to a modest but fascinating and varied freshwater fish fauna. *The Reed Field Guide to New Zealand Freshwater Fishes* is a complete and easy-to-read reference to the fishes throughout New Zealand and her outlying islands, such as the Chathams. Each entry contains colour photographs, a line drawing and a distribution map and information on size, colour, features particular to the type of fish, distribution, habitat and diet.

THE REED FIELD GUIDE TO  
COMMON NEW ZEALAND  
SHOREBIRDS  
David G. Medway  
079000738X  
\$39.95

Shorebirds make up a significant proportion of the New Zealand bird fauna. The best known of these are the gulls, the terns and perhaps the oystercatchers. Godwits and most of the lesser-known visiting shorebirds have migratory behaviour, nesting in the Arctic and travelling thousands of kilometres to spend time here in the southern summer.

This book gives a detailed introduction to common shorebirds, in the hope that this may stimulate readers to look more closely at the birds they see.
