

The New Baby

They say it's hard to be a first baby. So it may have been years ago; but nowadays there is VIROL—which, added to ordinary cows' milk or packed milk, endows it with all the digestible and life-giving elements necessary to baby's health and growth.

Virol contains bone marrow, malt extract, eggs and lemon syrup with the salts of lime and iron. Perfectly balanced, and readily assimilated by the most delicate digestions, Virol is the best and safest food to wean a baby on. Virol builds sturdy limbs, good teeth and a strong constitution.
