ONLY ONE BABY IN TEN—

Only about one baby in every ten develops the right kind of bones and teeth, doctors inform us. The imperfection may be so slight that a watchful mother cannot detect it. To protect her baby she must ensure his getting Vitamin D.

To promote growth in children and protect them against winter ills, Vitamin A is required.

Then again, there is an alarming percentage of children in this country suffering from incipient glandular troubles. This must be corrected by rationing the Thyroid gland with organic iodine. Unfortunately most of our land-grown foods are deficient in organic iodine.

To counteract this deficiency of iodine and certain mineral salts and vitamins, the latest scientific investigation has produced Thyrodene Emulsion. Thyrodene Emulsion is invaluable for correcting glandular trouble and for producing healthy body development and red-blooded vitality and strength. It contains Vitamins A, B, C, D, E and G, and no fewer than 14 of the 16 minerals required by the human body, including organic iodine, calcium, iron, manganese, phosphoric anhydride, creosote, cod-liver oil, lime and soda hypophosphites, etc. Thyrodene Emulsion is superior to all ordinary emulsions because it is an Emulsion Plus—Ask your chemist for it.

Free: Helpful booklet on Vital Medical Facts. Write for same to Thyrodene Development Ltd., Invercargill.

HEADACHES

By **Bernarr Macfadden**

Look out! Danger! That's what a headache says to you. It is a warning signal that some part of your body is not working 100%. Read how to eliminate them by rational treatment. Send for free catalogue and price list.
