THOUSANDS OF LIVES AND THIS £6,000,000 LINER DEPEND UPON BRIMAR VALVES

THE "Queen Mary's" radio equipment is recognised as the world's greatest marine radio installation, handling the largest amount of radio traffic on record—the fact that BRIMAR valves are used throughout is unquestionable testimony to their accuracy and dependability.

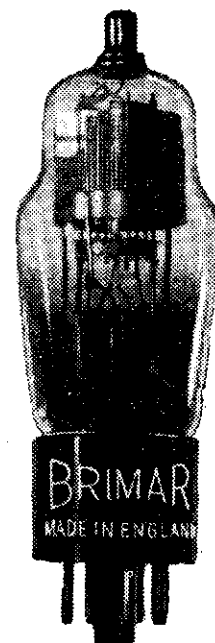

Place your faith in BRIMAR and be assured of the same dependability that keeps this mighty monarch of the sea in constant touch with the world. BRIMAR valves go through ten factory tests before they come to you, ensuring that every one is perfect and matched in quality.

There is a complete range of BRIMAR valves to suit every radio made, even to the earliest model.

BRIMAR

VALVES

Ten Times Tested — 10 Times More Efficient.

"Queen Mary" using
Brimar Valves breaks
all records for Marine
Radio traffic!
