# WIRELESS EQUIPMENT

for use — at sea  
on land  
and in the air

Amalgamated Wireless manufactures all types of radio equipment for coast stations, ships stations, broadcasting stations and aircraft.

Wireless equipment for use at sea is exemplified by the radio apparatus including the ship-to-shore wireless telephone on the M.V. "AWATEA."

Since the inception of radio broadcasting A.W.A. has designed and manufactured over forty transmitters. In New Zealand all the YA transmitters, also those at 2YH Napier and 4YZ Invercargill are of A.W.A. design.

A.W.A. Aeronautical Radio Equipment is in use on aircraft in Australia and New Zealand.

Research in A.W.A. Laboratories assures continuous new developments.
