

# WIRELESS PROGRESS

Established in New Zealand since 1913, Amalgamated Wireless has striven to give good apparatus to users of radio.

Manufacturers and suppliers of radio apparatus for ships, the latest including wireless telephone station in M.V. "Awatea."

Radio telegraph and telephone stations of all sizes for every use on land in New Zealand, Australia, Fiji, New Guinea and Papua.

Broadcast transmitting stations and receivers—the former including the high power station 2YA and the latter the Radiola receiver.

Radio apparatus for aircraft and for aerodromes.

Research in A.W.A. Radio Laboratories assures continuous new developments.
