IN THE VITAL SERVICES BRIMAR "DOES ITS BIT"

The blood pounding "dive" at 500 miles per hour—the body straining "level out"—swooping up to a vertical "stall" then falling away into a breath-taking "side slip." These are the daily conditions under which BRIMAR comes through with "Flying Colours." Reliability is just as essential for pleasure as for protection. Fit BRIMAR the "ten times tested" valve in your radio and be sure of long life and trouble-free service at all times.
