Forget CORNS

1. Sends pain flying
2. Quickly removes corns
3. Prevents corns, sore toes
4. Eases tight shoes

4-Way Relief Acts INSTANTLY

Dr. Scholl's Zino-pads instantly stop tormenting shoe friction; lift painful, nerve-rasping pressure — keep you foot-happy! Separate Medications supplied for quickly removing corns. Cost but a trifle. At Dr. Scholl dealers and chemists.

Dr. Scholl's Zino-pads

The Scholl Mfg. Co. (N.Z.) Ltd., Willeston St., Wgtn.

G.E.C.

THE GENERAL ELECTRIC CO. LTD. OF ENGLAND.

in peace - as in war -

at the service of the Empire

Electrification Schemes

G.E.C. Electrification Schemes have been applied to all industries, including: Aircraft Factories; Chemical Works; Collieries; Food Factories; Gold Mines; Iron, Steel and Copper Works; Locomotive and Railway Carriage and Wagon Works; Motor Car Works; Ships and Shipyards; Textile Mills; Oil Refineries, etc., etc.

An important example of how electrical inventiveness has served the urgent needs of war—afterwards to become of great service to industry generally, now that the war is won—is the Mobile Rectifier Substation.

This is transported by road or by rail to wherever it may be required and, for example, provides direct-current supply to building sites; or to docks where ships are being loaded, unloaded, or undergoing repairs; to centres where it will be available for traction purposes; or to a position adjacent to a permanent substation that is temporarily out of action.

In surmounting the innumerable problems that have arisen in all applications of electricity, including the important one of electronics, the technical experience and scientific advancement of the G.E.C.—the largest British electrical manufacturing organisation in the Empire—have been enriched to a degree that will be of incalculable value to all electrical services. For, just as the resources of the G.E.C. have been available for the war effort, they are now at the disposal of all concerned with reconstruction in any part of the world.

G.E.C. - always in the forefront of electrical progress
