Clean False Teeth this Modern Way

The modern way to keep false teeth clean is the simplest-just put them into half a glass of warm water in which a capful of Steradent has been dissolved. This solution penetrates every crevice, removes stains and sterilises your dentures by its own harmless, active energy in 20 minutes while you dress-or you can leave them in Steradent solution overnight if you prefer it. Rinse well under the tap.

For all Dentures, including the new Acrylic Resins

Steradent
