The new Hillman Minx betters even the reputation of the pre-war Minx for fuel economy. Improvements, born of war-time research, include new type cylinder head, Lo-ex alloy pistons and increased compression ratio, have brought down fuel consumption, yet increased available power to 35 B.H.P. Yet for all its wonderful fuel economy the Minx is BIG among light cars — big in its roomy interior and general comfort, in its capacious luggage boot, and like a big car in the way it handles on the road.
