

*Good for what  
ails you ...*  
**a century ago!**

Hart's-tongue ...

Little Celandine ...

Moon Wort ... these herbs were popular remedies a century ago. Great-grandma loved to mix a potent brew concocted from her favourites. Home-made household medicines are out of fashion today because available to all are the safe and proven medicines which modern medical science has evolved. Of course, when you purchase household medicines you buy on trust, for few people have the knowledge to detect quality, purity or freshness.

But ... you are assured of these essentials when you buy GILSEAL Household Medicines. This particular brand is made exclusively for New Zealand Chemists and is sold only by them. There is no greater recommendation than that. GILSEAL products are safe and reliable. Take advantage of this sure protection by going to your Chemist and asking for GILSEAL. Remember, you buy with *Confidence* from your Chemist.

THE **GILSEAL** RANGE OF 58 DIFFERENT PRODUCTS INCLUDES: Aspirin, Olive Oil, Cod Liver Oil, Paraffin Oil, Plunket Ointment, Healing Ointment, Epsom Salts, Glauber Salts, Medicated Pastilles, Boracic Acid, Calamine Lotion, Bicarbonate of Soda.
