CLEANS WINDSCREENS EASILY

**DON'T GAMBLE WITH YOUR CAR**

Fluidity grading (referred to by S.A.E. number) has NOTHING to do with the quality of an oil.

Inferior oils, even if of the correct fluidity grading, only lead to frequent and costly engine troubles.

Don't gamble! Always play safe! **FIRST** ask for Mobiloil—The World's Quality Oil — and *then* state the grade as recommended by the Mobiloil Chart at all garages and service stations.
