

THE OIL OF TO-DAY -

- for the
**CAR OF
TOMORROW**

COMPOUNDED Motor Oils represent the latest advancement in engine lubrication. Thoroughly tried and tested by the Allied Forces.

WE ARE PLEASED TO ANNOUNCE

THE *New* **EUROPA-LUBE** *compounded*

Compounded EUROPA-LUBE contains four special additives which prevent carbonisation, oxidation, corrosion and foaming:-

OXIDATION INHIBITING ADDITIVE

Prevents the formation of harmful varnish and sludge.

DETERGENT OR CLEANSING ADDITIVE

Cleans old engine deposits and prevents the formation of new deposits.

DEFOAMING ADDITIVE.

Prevents bubbling or foaming, thus ensuring a full flow of oil.

CORROSION INHIBITING ADDITIVE.

Prevents the formation of corrosives harmful to modern bearing metals.

REGULAR MOTOR OILS
DO NOT POSSESS THESE ADDITIVES.
