

IT HAPPENS WITHIN
two seconds

Within two seconds after being hooked, the powerful, hard-fighting Sailfish streaks through the sea at the incredible speed of 60 m.p.h.

MAKE THIS
GLASS-OF-WATER
TEST YOURSELF

 By dropping a Bayer's Aspirin Tablet into a glass of water, you can see why it gives quick relief from Headache. What it does in the water, it does when you swallow it; starts to disintegrate within *two seconds* — begins to work almost instantly!

Within two seconds after you take it for Headache
Bayer's Aspirin actually goes to work, to bring you

fast pain relief!

THREE important steps
... not just ONE ... give
BAYER'S ASPIRIN its
2-second speed.

1. The aspirin powder is tested and compressed into giant tablets eight times larger than normal.
2. These "giants" are crushed — reduced again to powder and passed through an extremely fine screen.
3. Only then are the tablets with the famous Bayer cross finally made.

This explains the amazingly fast disintegration of Bayer's Aspirin and its resultant speed in relieving Headache. If pain persists, see your doctor. He alone should advise you about persistent pain.

"Can you
keep a
secret?"

— says
Mrs. Rawlins

"Only the other day Mrs.

Parkinson was saying, and you know what a pernickety person she is, that she'd never seen her linen such a good colour as she had since I came to do it. But every good laundress knows that **Reckitt's BLUE** in the final rinse keeps your linen a good colour."
