

The amazing versatility of "Perspex" is exemplified by this sleek, modern, crystal-clear table ware, and below a robust wash-basin in lovely opaque pastel "Perspex" and clear corrugated "Perspex" for industrial roof lighting or modern interior effects.

**"PERSPEX"** is  
light, tough and lovely

Chemical reactions between acetone, hydrocyanic acid, wood alcohol and sulphuric acid produce a colourless liquid which is known as "Perspex" Acrylic Resin.

"Perspex" is made in clear, opalescent and coloured sheets and rods, and is also available as a moulding powder.

"Perspex" has a thousand uses in home, farm, shop or surgery. It has many of the properties of glass and ceramics, but is stronger and lighter. "Perspex" resists weak acids and alkalis, does not chip or discolour and can safely be washed in the hottest water. It can be sawn, drilled and machined like wood. "Perspex" is a new material of our time — useful and beautiful — a product of I.C.I. research.

Scott & Turner Ltd., Andrews House, Newcastle-on-Tyne, England.

"Now, it's all right, Mummy, don't worry. Teacher bathed it and put some \*Dettol Ointment on; she said it's wonderful stuff."

\*"DETTOL" OINTMENT is strongly recommended for the prevention and treatment of septic conditions of the skin which require a soothing, antiseptic cream to promote healing.
