

**THIS
NEWSPAPER
MAY SAVE
YOUR LIFE!**

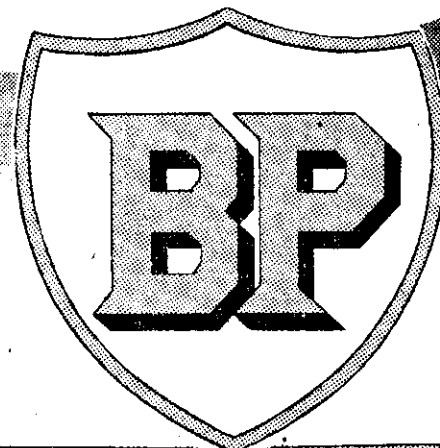

Mister, you are gambling with your life in those dark clothes. Motorists can't see you until they are right on top of you. And then it's too late... So, before you go out at night (especially on dark, wet nights) put on something white or light coloured which will reflect light and give warning of your presence. Or if you *must* wear dark clothes, carry an unrolled newspaper or an opened handkerchief in your hand, or better still, carry a torch. And remember, look out for traffic before you cross the street.

**PEDESTRIANS SHOULD ALWAYS
WEAR SOMETHING
LIGHT COLOURED AT NIGHT**
