

**LABOUR SAYS
YOU HANDLE
MORE MONEY**

Today!

TRUE...

***But-What does
it Buy!***

Do you remember when a good pair of men's shoes cost 15/6d . . . when good pyjamas were 7/6d per pair, and shirts little more? Do you remember when it cost only 1d to post a letter—and letters were delivered twice daily . . . ?

Do you remember salmon for 9d per tin, children's clothing at less than half its present price, and the great variety of women's clothes, footwear and accessories formerly available at less than half present-day prices?

By its policy of deliberate inflation, Labour has cut your wages, not in the actual amount you get but in what it will buy.

It is time to strike a blow for honest money—money which will again give real value.

THIS IS A "COST OF LIVING" ELECTION
