**Clean
False
Teeth**

**this
easy
way**

There is an easy way to keep false teeth stainless, sterilized and fresh. Just put your dentures in a tumbler of water in which 'Steradent' powder has been dissolved, as directed on the tin. This solution penetrates every crevice, dissolves film, removes even old stains and sterilizes your dentures by its own harmless, active energy. Many people leave their teeth in 'Steradent' overnight; others regularly for 20 minutes while they dress. Dentists cordially recommend 'Steradent' and all chemists stock it in tins at 2/- and 3/6.
