Address all Communications — P.O. Box 437, DUNEDIN.

With the Branches:

Dunedin recently held its annual meeting, which was attended by some Timaru members. Five of the foundation members were present.

Broadcast enthusiasts have noted the strong signal from XERB (1090 kc/s), Rosarita Beach, California. The station has been heard in localities where American zones are not strong from 12.30 a.m. 3LK has suffered frequently, being over-ridden by XERB.

KGEI, at San Francisco, broadcasts a news bulletin daily at 5.30 p.m. and again at midnight on 9.53 mc/s. The former is not always received very well because of interference from Paris Mondial on 9.52 mc/s, but the midnight transmission is usually 100% readable.

CEC, a commercial transmitter at Santiago, Chile, has been heard a number of times recently about 12.30 a.m., with a musical programme. Look for it on 10.23 mc/s, but do not confuse PMN Bandoeng, Java, on 10.26 mc/s.

WPIT at Pittsburg — "The Pioneer Shortwave Broadcasting Station of the World" — is being heard with good signals on 11.87 mc/s at 3.30 p.m., when it shifts to 6.14 mc/s. It should be heard on 11.87 mc/s also, from 2.30 a.m.

The Rangoon, Burma, stations, XYZ on 6.007 mc/s, and XZZ on 3.488 mc/s, are now announcing their call-signs in place of the former simple "Rangoon calling." Both can be heard toward midnight with XYZ considerably the better signal.

The Tokio transmitter JWV3 on 11.725 mc/s has a news bulletin in English every day at approximately 9.15 p.m.

HCJB Quito, Ecuador, on 12.46 mc/s, is testing on its new 20 kw/s transmitter on Tuesdays about 2 p.m. Its daily schedule on this frequency is: 4 to 7, 9.30 a.m. to 3 p.m., and 11.30 p.m. to 12.45 a.m., with no transmissions from 3 p.m. Mondays to 11.30 p.m. Tuesdays.

The Chinese Central Broadcasting Administration's station XGOY is transmitting a programme to North America daily from 2 to 2.40 a.m., on 9.64 mc/s, commencing with a news bulletin relayed also to XPSA Kweiyang on 7.01 mc/s. Signals are usually good.

Sarawak is now on the air. VQF, at Kuching, with 50 watts power, is broadcasting news for the benefit of local residents on Saturdays from 12.10 p.m. The frequency is 6.985 mc/s, so there is little chance of its being heard in New Zealand.

SAFEGUARDING
Your
Family's
FUTURE

Established

THE

HERE are certain obligations which are vital to the future welfare of your family. This valuable booklet tells in a simple, straightforward manner how the Public Trust Office can help you to safeguard their future. It explains the full service offered by the Public Trustee in the administration of your estate, should your wife and family be bereft of your advice and support. It is a matter which should be regarded as urgent—not one for to-morrow—but for action to-day.

The booklet is free and will be posted by return—or can be obtained at any of the branches of the Public Trust Office without cost or obligation to you. Send for it now!
