THIS is no "baby," this new H.M.V. Centennial de Luxe. It's a full-sized, all-world receiver, with full-sized H.M.V. features—all Metal tubes, Automatic Volume Control and other refinements.

Spinner tuning and a *big* illuminated Multi-Colour dial with station names clearly marked, help you find stations in a flash... and Magic Eye tells when you're tuned *exactly*. You'll find programmes flooding in when you start globe trotting on either the short-wave band, 19-49 metres, or the broadcast band, 550-1500 kc.

Tone? The tone is all you expect from His Master's Voice, with fidelity assured by a specially matched 8-inch Speaker and the Radiacoustic Cabinet which, incidentally, is finished in laid walnut with a smart metal speaker grille. We're pleased to show it... happy to demonstrate it... just as you'll be proud to own it.
