

A 1941 RELEASE

Model 252

Beautifully executed cabinet design.
Exceptionally realistic tonal quality and balance.
Greater sensitivity.
Elimination of fading especially on short-waves.
Easy and rapid tuning due to the inclusion of a tuning flywheel.
Numbered logging scale enabling the user to tune directly to a shortwave station instead of having to search for it.
New type of tuning indicator.
High fidelity 8½ inch Philips speaker.

ALTHOUGH produced under wartime conditions no feature has been sacrificed and this Radioplayer is a really fine example of its particular class, fully maintaining the exacting standards set by Philips Radio.

The 252 is the outcome of modern design trends which Philips are still maintaining in spite of the war.

You are missing much of interest and pleasure unless your receiver is of modern design and gives that quality of reproduction which makes all the difference to the enjoyment of a programme.

Visit your nearest Philips dealer to-day.

Hear the pure, clear, glorious tone and judge the value of the Philips 252.
