

"DO IT YOURSELF"

No Need To Employ Tradesmen Or Pay Wages

Learn to Use Tools, Make Furniture, Toys, Cupboards, Etc.

The first edition of "Do It Yourself" sold out in a few months—the second should be even more popular.

Not only does it contain the best of the hints and instructions in the first book and more short-cut money-saving ways to repair and modernise a home—but it has a splendid section on the making of furniture.

Simple, complete instructions for building all kinds of useful articles, from kitchen stools and tables to sets of bookcases, and even a modern three-piece bedroom suite.

Other useful sections for beginners deal with the "making of joints" and "how to use and look after your tools in order to get the best results."

This book supplies the answers to most of the problems which worry the handyman, and its use will result in better workmanship, fewer mistakes, a keener enjoyment of home hobbies, more comfortable living, and the saving of considerable money.

IT WILL SAVE YOU MANY POUNDS

Here is an exceptionally valuable new book, published by the New Zealand Dairy Exporter Company, Ltd., Wellington—a great money saver for all who wish to make their home modern, attractive, more cheerful and comfortable to live in. Already its simple, clear-cut instructions and many illustrations have helped thousands of men and women to turn their spare time into profit, to save high labour costs, and to gain a new pleasure in being able to do around the home dozens of jobs neatly and correctly—jobs which at one time they were afraid to tackle.
