

WHEN FARM STOCK ARE SICK

this book will
"Tell you at a glance"
just what to do.

CAN SAVE YOU POUNDS IN ONE SEASON
No "Dangerous and Costly Delays"—Act Instantly—
Act with Confidence—Follow instructions in
128 EMERGENCY CHARTS.

Any of the "Emergency Charts" may help you save the life of a valuable animal, or save you needless expense, worry and trouble. Instructions TELL AT A GLANCE JUST WHAT TO DO. So simple and clear a boy could follow them. Never before has such a book been published in New Zealand. Every farmer will find it saves him pounds in a single season.

PROMINENT N.Z. FARMERS PRAISE THIS BOOK

Mr. W. W. Mulholland, President, N.Z. Farmers' Union:—

"There is a need for a volume like this which gives accurate and complete information on the correct treatments for stock diseases."

Mr. W. E. Hale, Chairman, N.Z. Dairy Board:—

"A practical book which should be very useful to farmers. What I like most about it is the commonsense way in which each subject is treated, with no fancy terms which the ordinary farmer couldn't understand."

Mr. G. H. Bell, former President N.Z. Jersey Association, and prominent Jersey breeder:

"The arrangement of subjects, and simplicity in descriptions of the different diseases and treatments, leaves nothing to be desired."

Mr. A. Linton, member N.Z. Dairy Board, and the Board's representative on the Animal Research Institute:—

"The book will appeal to the ordinary everyday farmer and will be of great assistance to him."

Mr. W. P. BEGG, M.R.C.V.S., the Veterinarian who supervised and edited the work:—

"It has been a privilege to be associated with others in the production of a volume of this nature, which I believe will be of very great value to farmers. My part of the work has been particularly interesting. I know of no veterinary work anywhere written along these lines, where the whole of the information is brought to the farmer in the simplest of terms."

You can never tell when
you might need this
valuable book.
